**IMPORTANT:** All dimensions shown below are nominal and have been rounded to the nearest inch. Refer to the appropriate pricing pages for actual dimensions.
Modesty Panels, Accessories, and Electrical

**Modesty Panels**
- See page 3.37 to specify.

**Undersurface Support Rails**
- See page 3.38 to specify.

- 24"W 30"W 48"W 60"W 72"W 84"W 96"W
- 3"D 10"H

**Ganging Bracket**
- See page 3.38 to specify.

**Cable Management Accessories**
- Leg cable managers
- Loop-style cord manager
- Flexchains
- See page 3.39 to specify.

**Perimeter Single-Circuit Power Components**
- See page 3.40 to specify.

**Interlink® iQ Single-Circuit Power Components**
- See page 3.41 to specify.

**4-Trac® Power Components**
- See page 3.42 to specify.

**Metal Wire Trough**
- See page 3.39 to specify.

- 24"W 30"W 48"W 60"W 72"W 84"W 96"W
- 2 1/4"H

**Statement of Line**

- IMPORTANT: All dimensions shown below are nominal and have been rounded to the nearest inch. Refer the appropriate pricing pages for actual dimensions.
**Dock training tables** are available in dozens of practical sizes and shapes, and can be combined in flexible arrangements for any use. Create dynamic learning environments, training rooms, private offices, collaborative spaces, and cafes, then expand or rearrange as your demands change.

**Tops and legs** are specified separately, increasing the flexibility of the product. Leg applications include:
- Flip/nest
- Fixed height
- Shared fixed height
- Folding
- Height adjustable

For mobility, casters are available for select leg styles.

**Choose from a variety of top shapes and finishes** to create your individual style and adapt to multiple budgets.

**Nesting legs** with casters move easily to quickly set up room configurations to suit your meeting requirements.

**Accessory options** include:
- Modesty panels
- Ganging brackets
- Surface power ports
- Grommets
- Single-circuit and 4-trac multi-circuit power systems
- Wire troughs
- Cable management

**Shared table legs** minimize cost and maximize leg room when used for more permanent table applications.
Dock training tops are available in:
• 11/8”-thick thermally-fused laminate (TFL)
• 11/8”-thick 3D laminate
• 13/16”-thick high-pressure laminate (HPL)
• 13/16”-thick high-pressure laminate (HPL) with a wood rim
• 13/16”-thick wood veneer

Six top shapes are available:
• Rectangular
• Trapezoid
• Half-Round
• Hexagon
• Quarter-Round
• Wedge

Not all top sizes are available for every base application.
➤ See price list pages for each base type and corresponding top size

Rectangular tops are for use with all leg styles and application types. Grain runs with the width.

Trapezoid, half-round, and hexagon tops are for use with fixed height, adjustable height, and shared leg bases. These top shapes cannot be used with flip/nest bases. Grain runs with the width.

Quarter-round and wedge tops are “insert” tops to create various configurations. They are not designed to be used individually, and must be attached to rectangular worksurfaces on both sides with flat brackets (specified separately) and leg(s). Grain runs diagonally.

Connections
Tops do not ship with attachment hardware. Hardware ships with the base.

Flat brackets are required when creating several types of permanent configurations; specified separately.

Planning Factors
When ordering quarter-round or wedge surfaces, 2 flat brackets must be ordered for each joint to attach the tops to the adjoining rectangular surface.

When ordering tops with shared legs, 2 flat brackets must be specified for each joint to attach tops to the adjoining surface.

Flat brackets or ganging bracket kits are required when installing single-circuit or 4-trac multi-circuit electrical systems on 2 or more tables to prevent separation or damage.

24” and 30”D quarter round and 30”D wedge tops can only be used with shared C-leg bases for required support.

24”D wedge top can only be used with fixed-height T-leg or C-leg pairs. A shared leg is not applicable due to interference with the mounting plate.

Undersurface Support Rail Requirements:

Note: Rail width requirements are determined by the base mounting plate size which varies by base type.

Related Products
Factory-installed grommets and cutout options are available; up-charge applies.
➤ See pages 3.11 and 3.12.

Grommets are also available for field installation.
➤ See the Perks chapter in the Kimball Desks & Accessories Price List.

Modesty panels
➤ See page 3.15.

Undersurface wire managers
➤ See page 3.10.
Rim profiles differ based on the top material selected.

**Table Tops**

**Rim Profiles**

- **P** Softened vinyl rim
  - Applies to TFL or HPL surfaces
  - 3mm vinyl edgeband
  - Profile is on all four sides

- **SL** Sloped rim
  - Applies to 3D laminate surfaces
  - Sloped user edge
  - Flat approach/end edges

- **J** Self-edge rim
  - Applies to HPL surfaces
  - Profile is on all four sides

- **F** Softened wood rim
  - Applies to HPL with wood rim or wood surfaces
  - 3mm shaped wood on user edge
  - .5mm flat edge band on approach/end edges

- **M** Reed wood rim
  - Applies to HPL with wood rim or wood surfaces
  - 3mm shaped wood on user edge
  - .5mm flat edge band on approach/end edges

- **S** Knife wood rim
  - Applies to HPL with wood rim or wood surfaces
  - Knife rim on user edge
  - .5mm flat edge band on approach/end edges
Dock provides several flexible options for routing and concealing cords and cables. These include:
- Factory-installed grommet options (G1 and G19)
- Factory-installed C4 and C5 cut-outs for power/data/USB centers
- Undersurface wire trough
- Cord manager clip

Factory-installed grommets and cutouts are available as an option on tops in pre-determined locations.
➤ See pages 3.11 and 3.12 for specification information, upcharges, and locations by top shape or type.

G19 metal grommet is a two-piece unit with black brush access. Top locks in place. Powdercoat finish in the following colors:
- 405 Designer White
- 501 Platinum Metallic
- 514 Carbon Metallic
- 544 Silver Pearl

Grommets for field installation are also available.
➤ See the Perks chapter in the Kimball Desks & Accessories Price List.

C4 cut-outs are for use with:
- Power harness with MHO pop-up power centers (KCE12PHPDUS2PC (shown above) and KCE12PHPDS2PC)
- MHO pop-up power center with 3-prong plug (KCEB2PDPSPC and KCEB2PDUPSPC)

Power centers must be ordered separately for field installation.
➤ See page 3.41 for product information.

C5 cut-outs are for use with:
- Power/data centers with modular feed KCEP1PDMB and KCEP1PDMS
- Power/data centers with three prong plug (KCEP1PDPB and KCEP1PDPS)

Power centers must be ordered separately for field installation.
➤ See page 3.40 for product information.

Perks loop-style undersurface cable manager organizes cords and cables under tops. Cables pressure fit into individual loops. Openings are 1"D x 5/8"W x 1"H and can be removed to expand capacity. Black plastic. Set of 6.

Metal vertical cable manager acts as a sleeve to cover cables on Dock Meeting and Dock Training blade bases only, and features a powdercoat finish to match the base. Snap-on installation can be repositioned and accommodates two power cords or six data cables, or one power cord and three data cables.

Metal wire trough attaches to the underside of top to hold and conceal cords and cables. Use with single-circuit and 4-trac multi-circuit electrical systems. User side is open for easy access. Trough can be used with flip/nest, fixed, and adjustable-height leg applications and is compatible with a modesty panel installed in front of the trough. It is not available for use with folding legs.

Perks flexchain and expandable cable manager manages cables and attaches to the underside of top to route cables and cords to the floor.

</table>

➤ See page 3.10 for details about G1 and G19 metal grommets.

Note: Dimensions listed are from the center of grommet to edge of top.

1. Insert the location and finish designator (for grommets) into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

For example:

- **G1LMB** = G1 grommet, left, matte black
- **G19R501** = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix at left with a designator and price are available.

**Available Finishes**

- **G1 Plastic Grommets:**
  - SL Silver
  - MB Matte Black

- **G19 Metal Grommets:**
  - 405 Designer White
  - 501 Platinum Metallic
  - 514 Carbon Metallic
  - 544 Silver Pearl

See pages 3.40 and 3.41 for corresponding power/data centers.

---

**Related Products**

C4 cut-outs are designed to accept:
- Power harness with Mho pop-up power centers (KCEI2PHPDUS2PC and KCEI2PHPDUS2PC)
- Mho pop-up power center with 3-prong plug (KCEB2PDUSPC and KCEB2PDUPSPC)

C5 cut-outs are for use with:
- Power/data power centers with modular feed KCEP1PDMB and KCEP1PDMB
- Power/data power centers with three prong plug (KCEP1PDPB and KCEP1PDPB)

---

### How to Specify

1. Insert the location into model number sequence as indicated on the corresponding pricing page.

   **IMPORTANT:** Only the cut-out locations shown in the matrix at left with a designator and price are available.
Blade Bases

Flip/nest models are sized 2" smaller than top for all widths; for use with rectangular surfaces only.

Fixed-height T-legs and C-legs mount to the underside of top with a fixed steel plate. Fixed-height models are available with glides or casters.

Fixed-height shared C-leg with glides can be specified for static table configurations to replace two legs. Two flat brackets are required at the seam. Some shape applications will only allow one bracket due to space restrictions, however.

IMPORTANT: For installations where flip/nest and fixed-height tables with casters are arranged in back-to-back, end-to-end, and back-to-end configurations, the table tops will not always have perfect alignment. The unevenness of the building floor and variability of the flip/nest mechanism, combined with the casters not being adjustable, does not allow for perfect alignment.

Column is 2\(\frac{3}{8}\)"-diameter, 10-gauge tubular steel with a cast aluminum foot.

Non-hooded, locking casters on applicable models are available in:
- Black
- White/grey

Connections
Attachment hardware is standard with all bases.

Ganging brackets ➔ See page 3.8.

Related Products
Plastic leg cable managers ➔ See page 3.10.

Metal vertical cable managers ➔ See page 3.10.

Undersurface wire managers ➔ See page 3.10.

Undersurface support rails ➔ See page 3.38.
Tubular Bases

**Details**

**Tubular T-leg bases** are 27 3/4"H. Overall table height with 1 1/8"-thick top installed is 28 13/16"H or 28 7/8"H with 1 3/16"-thick top. Note: Tubular bases are not available with a C-leg column orientation.

**T-leg tubular bases** are available in the following models:
- Flip/nest with support beam and casters
- Fixed-height with casters
- Fixed-height with glides
- Folding with glides
- Adjustable-height with glides

**Leg pairs** comprise a base. Each model provides a set of 2 legs and attachment hardware. See the pricing pages for top shape, top size, and base compatibility.

**Flip/nest bases** include:
- Casters
- Cast aluminum top plate
- Extruded aluminum bottom plate
- Two T-legs
- Cross support beam
- Flip mechanism with easy-release lever(s)

Note: Models for use with 48", 60", and 72"W tops have one release lever in the center; models for use with 84" and 96"W tops have two levers. Lever enables the table to lock in up and down positions.

Flip/nest models are sized 2" smaller than top for all widths; for use with rectangular surfaces only.

**Fixed-height T-legs** mount to the underside of top with a fixed steel plate. Fixed-height models are available with glides or casters. IMPORTANT: For installations where flip/nest and fixed-height tables with casters are arranged in back-to-back, end-to-end, and back-to-end configurations, the table tops will not always have perfect alignment. The uneveness of the building floor and variability of the flip/nest mechanism, combined with the casters not being adjustable, does not allow for perfect alignment.

**Folding T-legs** feature a touch-release mechanism that allows the legs to fold flat for storage. Available with glides only.

**Tubular bases** are available in two powdercoat finishes.

**Column** is 1 3/4"-diameter, 14-gauge tubular steel.

**Connections**

**Attachment hardware** is standard with all bases.

**Ganging brackets** See page 3.8.

**Related Products**

**Plastic leg cable manager** holds cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column.

**Undersurface wire managers** See page 3.10.

**Undersurface support rails** See page 3.38.
Modesty Panels

Details

Modesty panels provide user privacy and conceal electrical components and metal wire trough. Panels are 10"H.

➤ See the pricing pages for modesty panel and top compatibility.

Resin modesty panel is 1/4" thick and ships with a silver coverplate to conceal mounting brackets.

TFL, HPL, and wood veneer modesty panels are 3/4" thick and are edge banded in the same material.

Connections

Mounting bracketry for static, folding, or nesting is indicated as part of the specification for the modesty panel. Select:
- Static for fixed tables
- Folding for folding tables
- Nesting for flip/nest tables

Upcharge applies for folding and nesting options.

Connections

Mounting brackets for use with TFL, HPL, and wood modesty panels are black.

Metal wire trough is compatible with a modesty panel installed in front of the trough.

Mounting brackets for use with resin modesty panels are:
- Silver for flip/nest bases
- Black for fixed-height and folding bases

Modesty panel ships with the following bracket quantities:
- 48"W includes 2 brackets
- 60" and 72"W includes 3 brackets
- 84" and 96"W includes 4 brackets
Dock offers several power options:
- Corded
- Perimeter single-circuit power system
- Interlink iQ single-circuit power system
- 4-trac multi-circuit power system

Corded:
Corded components are stand alone units that plug directly into a wall outlet. They can be used in a single table application or can plug into the 4-trac power system duplex receptacle under the top. UL recognized.

➤ See page 3.44.

Perimeter Single-Circuit:
This non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.

System is comprised of:
- Smart box power in-feed
- Table-to-table jumpers
- Power/data center

➤ See page 3.17.

Interlink iQ Single-Circuit:
This non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.

System is comprised of:
- Sensor box with power in-feed
- Combination power harness and retractable power/data and power/data/USB center
- Table-to-table jumpers select configurations

➤ See page 3.19.

4-Trac Multi-Circuit:
This low profile, non-sequential, 15-amp (2 circuits) or 20-amp (1 circuit), daisy-chain system provides 4 wires, and powers up to 12 duplex receptacles per circuit. All parts are UL listed, with the exception of the 20-amp power in-feed with plug which is UL recognized.

Up to twelve tables can be linked together.

System is comprised of:
- Power in-feeds*
- Modular power kits that include two duplex receptacles and harness
- Table-to-table jumper

* Rotating power in-feed with quick disconnect, hardwire and hardwire for NYC in-feed models are also available.

➤ See page 3.21.

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national codes. Verify code requirements before ordering.
Details

Non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.

Power/data centers are 6 1/4"W x 3 1/4"D and fit C5 factory-installed cut-outs in top. They feature a self-storing lid with a plastic body. Attaches to power in-feed and jumper.

Smart box power in-feed includes smart LED indicators that illuminate green when you have linked the appropriate number of units. A red light means you've linked too many units. 10' black 15-amp power cord plugs into standard wall or floor outlet on one end and connects to jumper or power/data center with modular feed.

Table-to-table jumper continues power from one power/data center to another.

Connections

Ganging brackets or flat brackets are required between power-linked tables.

Up to 8 power/data centers can be powered by one smart box power in-feed.

Details

Non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.

Interlink iQ power in-feed with sensor box includes smart LED indicators that illuminate green when you have linked the appropriate number of units. A red light means you’ve linked too many units. A 10’ black, 15-amp power cord plugs into the sensor box on one end and into a standard wall or floor outlet on the other end.

60”W Mho® power harness with retractable power/data or power/data/USB center provides power to the surface and extends power to an adjacent surface. Power centers are 8¾”W x 4¾”D and fit C4 factory-installed cut-outs in top. Clear, anodized aluminum.

Table-to-table jumpers are required for 72”W tables in runs of 3 or more tables. See next page for diagrams for required components.

Connections

Ganging brackets or flat brackets are required between power-linked tables.

Up to 8 power centers can be powered by one in-feed.

Component Requirements:

**Ganged Power Tables In-Feed Harness Jumpers**

48”–60” Tables
- One Power/Data Center per Table; 8 Tables Maximum

72”W Tables
- One Power/Data Center per Table; 6 Tables Maximum

84”–96” Tables
- Two Power/Data Centers per Table; 4 Tables Maximum

Legend:
- = Interlink IQ Power In-Feed
- = Mho Harness with Retractable Power Center
- = Table-to-Table Jumper

* Table runs using 72”W tables require the use of a table-to-table jumper between power harnesses on tables 2 & 3 and tables 4 & 5 (if applicable).

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national codes. Verify code requirements before ordering.
**Power and Data**

**4-Trac® Multi-Circuit Power System**

---

**Details**

Low profile, non-sequential, 15-amp daisychain system provides 4 wires and 2-circuits. Utilizing a single power in-feed, the system powers up to 12 duplex receptacles per circuit or up to 24 duplex receptacles when using both circuits.

Three types of 15-amp power in-feeds are available to bring power from a wall or floor-mounted power box:
- Hardwire
- Hardwire for NYC/San Francisco
- Rotating with quick disconnect

Determine your need based on the available power source and local electrical codes. There are no restrictions in connection sequence.

IMPORTANT: All power in-feeds require installation by a licensed electrician.

---

**Connections**

- **Ganging brackets or flat brackets** are required between power-linked tables.

---

**Related Products**

- **Undersurface wire managers**
- **Metal wire troughs**
- **Leg cord managers**
- **Cable managers**

---

**Hardwire 15-amp power in-feeds** feature black, liquid-tight conduit (standard model) or metal conduit (NYC model). Modular end connects to modular power kit.

**Rotating 15-amp power in-feed** is available to replace an existing wall outlet. Allows quick disconnect from wall outlet. A 72" jumper, specified separately, connects the rotating power in-feed to a modular power kit. Jumper is encased in black liquid-tight conduit.

**Modular power kits** contain:
- Two 15-amp duplex receptacles
- Harness between the two receptacles, either circuit 1 or circuit 2.

Kits are sized to table top widths and attach to the underside of top with included brackets for ease of installation. Harness is encased in black liquid tight conduit.

**20-amp power in-feed with plug** is available. Modular end connects to modular power kit.

IMPORTANT: The 20-amp power in-feed limits the system to a single circuit only and accommodates a maximum of 12 duplex receptacles; all modular power kits in the series must be Circuit 1. This infeed will not plug into a 15-amp power outlet.

**25" and 36" jumpers** are available to extend power between duplex receptacles on adjoining tables. Jumper is encased in black liquid-tight conduit. 72" jumpers are for use with rotating 15-amp power in-feed.

All parts are UL 183 listed, with the exception of the 20-amp power in-feed with plug which is UL recognized.

---

**Planning Factors**

Specify the appropriate cut-out size for corded units to install in the top and plug into the duplex outlet underneath the top to bring power to the surface.

➤ See page 3.12.

Specify tops with G1 or G19 grommets to allow desk top electronics to be plugged in under the surface. This is a lower cost alternative and practical for more permanent or semi-permanent configurations, such as teaming environments.

➤ See page 3.11.

---

**Dock Training**

Kimball Meeting & Collaboration
Determining Circuit Usage:
The decision to specify circuit 1 only or to use circuits 1 and 2 together is based on how many tables you wish to power.

Circuit 1 only:
- Utilizes circuit 1 power kits
- Can power up to 6 tables maximum off of one power in-feed
- Provides two duplex receptacles to each table for a total of 12 duplex receptacles per run
- Can be powered with 15-amp hardwire (standard or NYC model), rotating 15-amp hardwire, or 20-amp plug-in power in-feed

Circuits 1 and 2:
- Accommodates a combination of circuit 1 and 2 modular power kits
- Can power 7 or more tables (maximum of 12) off of one power in-feed
- Provides two duplex receptacles to each table for a total of 12 duplex receptacles per run
- Can be powered with 15-amp hardwire (standard or NYC model) or rotating 15-amp hardware.
- Cannot be powered with 20-amp plug-in power infeed
- Circuits 1 and 2 can alternate table to table or they can be in succession (see diagram at left) since the system is non-sequential and will automatically connect to the correct circuit.

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national codes. Verify code requirements before ordering.

### How to Specify

1. **Model**
2. **Material:**
   - LL = TFL with P rim
   - L = HPL with P rim
   - 2L = HPL with J rim
   - T = 3D laminate with SL rim
   - LW = HPL with wood F or M rim
   - W = Wood with wood F or M rim
   - 1LW = HPL with wood S rim
   - 1W = Wood with wood S rim
3. **Rim profile:**
   - P = Softened vinyl rim (LL or L)
   - SL = Sloped rim (T)
   - J = HPL self rim (2L)
   - F = Softened wood rim (LW or W)
   - M = Reed wood rim (LW or W)
   - S = Knife wood rim (1LW or 1W)
4. **Surface finish price group:**
   - STD = Group 1
   - STDK = 3D laminate group 1
   - STD2 = Group 2 (+20%)
5. **Surface finish designator**
6. **Rim finish price group (include for LW and 1LW models only):**
   - STD = Group 1
   - STD2 = Group 2 (+20%)
7. **Rim finish designator (include for LL, L, LW and 1LW models only)**

### Standard Includes

### Cable Management

#### Standard Includes

- **Metal Wire Trough**
  - Trough: metal
  - Attachment hardware
- **Plastic Leg Cable Managers**
  - Set of 3 cable managers: clear or silver plastic
- **Metal Vertical Cable Managers**
  - Snap-on cable manager: metal powdercoat
  - For use with blade base only
- **Flexchain Cable Manager**
  - Cable manager: clear plastic
  - Attachment hardware
- **Expandable Cable Manager**
  - Cable manager: ABS black plastic
  - Attachment hardware

#### How to Specify

#### Standard Includes
- Smart Box Power In-Feed
  - 10' black power cord with 15-amp 3-prong plug
  - Smart box sensor
  - Modular connector
- Table-to-Table Jumper
  - 74" length
- Power/Data Center with Modular Feed
  - Two 15-amp receptacles
  - Two blank data ports
  - Self-storing lid: black plastic or silver metal
  - Plastic body
  - 24" modular feed with double-out interface
  - Overall dimensions 6\(\frac{1}{4}\)"W x 3\(\frac{1}{4}\)"D; fits C5 cut-out
- Power/Data Center with Three-Prong Plug
  - Two 15-amp receptacles
  - Two blank data ports
  - Self-storing lid: black plastic or silver metal
  - Plastic body
  - 8' black cord with 90° right angle, 15-amp, three-prong plug
  - Overall dimensions 6\(\frac{1}{4}\)"W x 3\(\frac{1}{4}\)"D; fits C5 cut-out

Power In-Feed | KCE12IF2 | $461

Power Harness with Mho® Pop-Up Power/Data Center | KCE12PHPDS2PC † | $444

Power Harness with Mho® Pop-Up Power/USB Center | KCE12PHPDUS2PC † | $565

Power Jumper | KCE12J602 | $103

Transitional Jumper | KCE12TJ | $120

Standard Includes

- Power In-Feed
  - 10' black power cord with 15-amp 3-prong plug
  - Sensor box
  - Modular connector

- Power Harness with Power/Data Center
  - Two 15-amp receptacles
  - Two blank data ports
  - Silver, powdercoat finish
  - 60” table-to-table power harness
  - Pop-up lid that sits flush with surface when closed
  - Overall dimensions 8⅜"W x 4⅜"D; fits C4 cut-out

- Power Harness with Power/Data/USB Center
  - Two 15-amp receptacles
  - One blank data port
  - Two USB ports
  - Silver, powdercoat finish
  - 60” table-to-table power harness and 12” tail
  - Pop-up lid that sits flush with surface when closed
  - Overall dimensions 8⅜"W x 4⅜"D; fits C4 cut-out

- Power Jumper
  - 60” length
  - For select applications

- Transitional Jumper
  - 60” black jumper
  - Connects iQ 1.0 to 2.0 when adding new components
