# Quickship for Crisis

We at Kimball Health believe in safety, wellness, and environments that impact the quality of care for everyone. The COVID-19 (Coronavirus) Crisis has placed us all in trying times and put us in a situation to be more conscious of our surroundings and the great caregivers who continue to put themselves in the center of this pandemic. This is the time to be the social partner that can impact our communities and help provide solutions right now.

To help support facilities struggling to provide immediate access to care, Kimball Health is offering a “Quickship for Crisis” program to help care teams accommodate for this rapid influx of critical patients.

### QUICKSHIP FOR CRISIS

# Typicals

Kimball Health offers many solutions for many environments. In a time of crisis, mobilizing care is critical. It is our social responsibility to support thought-starters and ideas around acute care settings utilizing a variety of 6'x6' adaptable and flexible triage environments.

Unprecedented challenges create opportunities to look differently at delivering care. Environments during a crisis may not reside within the building envelope, but may reside in pre-fab or temporary areas that are not typical. Re-imagining the landscape of care can help support care professionals in critical and different ways.
