Product Positioning

Canopy height adjust offering includes a bench with optional table ends, end media walls and screens to create a work environment with varying degrees of privacy with the unique canopy screens to divide the space.

Specifications:

- Range of adjustment: 28 1/2" to 43" (includes worksurface)
- Lifting capacity: 265 lbs. per bench side
- Controller: Up/down programmable
- Bench motor: Two motors, One control box
- Noise level: 39dBA
- Volts: 120V AC 24V DC
- Amps (maximum): 6
- Standby power: .05 watts
- Frequency and phase: 60hz
- Adjustability speed: .5 per second
- Duty cycle: 10% (2 min. on; 18 min. off)
- Anti-collision: Yes
- Overheat protection: Yes
- UL1286 listed: Yes

IMPORTANT Canopy components are UL 1286 listed as furniture system. Electrical components attached to the bench are UL 962 listed.

Canopy
Kimball Benching
**Bench 1**
- No power/data tray.
  ➤ See page 2.15 for product info.
  ➤ See page 2.37 to specify.

**Bench 2**
- With power/data tray for use with Axil Z power/data center.
  ➤ See page 2.16 for product info.
  ➤ See page 2.38 to specify.

**Bench 4**
- With power/data tray for use with Interlink iQ single-circuit power system.
  ➤ See page 2.17 for product info.
  ➤ See page 2.39 to specify.

**Programmable Memory Control Switch**
➤ See page 2.14 for product info.

Bench models include a sit-to-stand base and two worksurfaces. Benches support a maximum weight of 300 lbs. per worksurface.

Specify the type of bench based on power/data needs. ➤ See far right column for descriptions.

Worksurfaces, which are part of the bench model, have square edges and are 3/4" thick. They are available in:
- Thermally fused laminate (TFL) with vinyl or ply rim
- High-pressure laminate (HPL) with vinyl, ply rim or plywood edge
- Wood veneer with a wood rim
- Plywood with exposed plywood edge

Sit-to-stand base adjusts in height from 28"–42 1/2". Base is available in 501 platinum metallic at no upcharge.

Each worksurface has its own lift columns and central control box for synchronization.

Two-column leg compresses inside itself in lower positions. Illustration shows bench in its lowest position.

Crossrails span between height-adjust legs and supports power/data trays.

Center-mount fixed screens can be specified for use on benches; screens are specified separately. Privacy worksurface screens and canopy screens are also available. Two screens are specified per bench. They can be the same or different.

Up/down switch (one per side) is standard; programmable switch is available separately.

Anti-collision function on control box (one per side) reduces damage to the desk and surrounding objects in the event of collision with a firm object. If an obstruction is detected, the table will stop and move in the opposite direction. The control box also has a built-in safety feature to shut down should the motor overheat and includes a 7' power cord.

Bench Types:

Bench 1
No power/data tray. ➤ See page 2.15

Bench 2
Power/data tray for use with power/data center. ➤ See page 2.16

Bench 4
Power/data tray for use with Interlink I3 single-circuit power system. ➤ See page 2.17
Benches can be used singly with one frame providing a two-person workstation or several benches can be connected to form a dual-sided run.

Height-adjustable table ends are available in rectangular and half-round shapes.

Ganging connector, specified separately, connect benches together. Ganging connector is screwed to the underside of the crossrails of both benches. Specify 28F29GCP when connecting two benches together.

Canopy screens offer an optional level of privacy.

Optional wood truss adds a customized accent to base frames.

Worksurface grommets, cut-outs, and accessory frames are available factory installed.

Cable management accessories store and organize cables beneath the worksurface.

1" gap minimum between side-by-side worksurfaces is required to minimize pinch/clearance hazards. Ganging connector is sized to provide the required 1" minimum clearance when worksurfaces are installed appropriately.

Different screen types are designed to align when used together bench to bench. Worksurface privacy screen brackets are designed to align with a center screen or canopy.
**Travel Range:**
Benches have a 14½" travel range from 28" to 42½", which includes the worksurface thickness. Each worksurface works independently of the adjoining or facing bench.

**Bench Depth:**
Bench is available in one overall depth. Worksurfaces are positioned in one location to maintain the overall depth of 59¼" to align with end media and table end units.

### Distance between Legs:

<table>
<thead>
<tr>
<th>Width of top</th>
<th>Dimension A (Inside)</th>
<th>Dimension B (Outside)</th>
</tr>
</thead>
<tbody>
<tr>
<td>60&quot;</td>
<td>27½&quot;</td>
<td>32¾&quot;</td>
</tr>
<tr>

<td>44³⁄₄&quot;</td>
</tr>
</tbody>
</table>

**Perks trackless keyboard kit**
(model 99K1806KAT) can be installed on the user side of worksurfaces with a suggested clearance of 9¾" from the front of edge of the worksurface. See the Perks chapter of the Kimball Desks & Accessories Price List.
**Overview**

*Dimensions, continued*

---

**Gap Between Worksurfaces or Screens:**

- **Benches with no screens**
- **Two 15" worksurface privacy screens**
- **Two 36\(\frac{1}{4}\)" fixed height center screens**
- **Two 43" canopy screens**
- **36\(\frac{1}{4}\)" fixed height center screen and 15" worksurface privacy screen**
- **15" worksurface privacy screen and 43" canopy screen**
- **36\(\frac{1}{4}\)" fixed height center screen and 43" canopy screen**

---

**IMPORTANT:** For benches with screens, two screens must be specified (one for each side of the bench). They can be the same or different.

**IMPORTANT:** Even though a gap exists between the worksurface and center or canopy screens, cables cannot exit from the worksurface through the gap; specify a grommet or accessory frame.
Overall Height:

- Two 15"H worksurface privacy screens
- Two 22 1/8"H fixed-height center screens
- Two 36 1/4"H fixed-height center screens
- Two 43"H canopy screens
Edge/rim profiles differ based on the top or screen material selected.

**Softened Vinyl Rim (P)**
- Applies to TFL or HPL worksurfaces, center screens, and worksurface privacy screens
- 2mm vinyl edge
- Profile is on all four sides

**Softened Wood Rim (F)**
- Applies to wood veneer worksurfaces
- 2mm wood rim
- Profile is on all four sides

**Ply Rim (E)**
- Applies to TFL or HPL worksurfaces, center screens, and worksurface privacy screens
- 1mm edge
- Profile is on all four sides

**Plywood Edge (D and D2)**
- Applies to HPL and plywood worksurfaces, canopy screens, center screens, and worksurface privacy screens
- No rim; exposed plywood on all four sides
- Small voids may be visible in the edge, an inherent characteristic of plywood
Details

**Bench models** include a base and two worksurfaces. There are four bench types based on no power or two different integrated power options. Adjustment range is 28”–42¼”. Base is available in 501 platinum metallic at no upcharge.

➤ See page 2.15 for bench 1.
➤ See page 2.16 for bench 2.
➤ See page 2.17 for bench 4.

**Worksurfaces,** which are part of the bench model, have square edges and are ¾” thick. They are available in:
- Thermally fused laminate (TFL) with vinyl or ply rim
- High-pressure laminate (HPL) with vinyl, ply rim or plywood edge
- Wood veneer with a wood rim
- Plywood with exposed plywood edge

**Worksurface edge/rim profiles** differ based on the top material selected.
➤ See page 2.13.

**Several flexible worksurface options** are available for routing cords and cables and accessing power and data. As well, accessory frames can accommodate accessories for increased productivity.

**Factory-installed worksurface options** include:
- Worksurface grommets (G1 and G19)
- Worksurface cut-outs for power/data centers (C4, C6, G20, G28 and C29)
- Accessory frames (G34)

These options are available in predetermined locations. Upcharges apply.
➤ See page 2.26 for grommets.
➤ See page 2.27 for cut-outs.
➤ See page 2.28 for accessory frames.

**Grain direction** runs with the width.
*Note: Rotary woodgrain patterns on plywood tops will vary from one top to another.*

Connections

**Ganging connector,** model 28F29GCP, is specified separately to link benches together.

Planning Factors

When specifying storage, the maximum clearance under the height-adjustable bench frame to the floor is 24¹/₄” with the leveling glide in the lowest position.

**Perks hanging CPU holder** cannot be used with Canopy benches as it will interfere with the understructure.

**Canopy center and worksurface screens** are specified in the same width as the bench.

**Clamp-on monitor arms and power units** cannot be used with Canopy bench.

Related Products

**Perks trackless keyboard arm,** model 99K1806KAT, can be installed under the bench worksurface on user side.
➤ See the Perks chapter of the Kimball Desks & Accessories Price List.

**Cable management accessories** for benches and end units, including the cable trays, and baskets are available.
➤ See page 2.36.
**Bench 1 models** provide a basic bench without an integrated power/data tray. 
*Note: Base shown here without worksurfaces, which are standard with all bench models.*

- **Holes in the mid-crossrail** to attach two fixed center or canopy screens are standard on all bench models. Decorative crossrail covers are required if no screens are specified.
- **Two-column leg** compresses inside itself in lower positions.
- **Blade** supports and attaches the worksurface to the base.
- **Control box** (one per side) is standard.
- **Up/down switch** (one per side) is standard; programmable switch is available separately.

---

**Statement of Line**
- Planning: 2.8
- Pricing: 2.37
- Surface Materials: 2.76
Bench 2 models provide an integrated power/data tray running through the center of the base with an opening to accept one Axil Z power/data center; specified separately. Note: Base shown here without worksurfaces, which are standard with all bench models.

Blade supports and attaches the worksurface to the base.

Two-column leg compresses inside itself in lower positions.

Holes in the mid-crossrail to attach two fixed center or canopy screens are standard on all bench models. Decorative crossrail covers are required if no screens are specified.

Up/down switch (one per side) is standard; programmable switch is available separately.

Control box (one per side) is standard.

Integrated power/data tray attaches to the bottom side of the crossrails.

Axil Z power/data center, specified separately, fits in cut-out provided in the power/data tray.
**Bench 4 models** provide an integrated power/data tray running through the center of the base to accept an Interlink iQ single-circuit power system; specified separately. Note: Base shown here without worksurfaces, which are standard with all bench models.

**Blade** supports and attaches the worksurface to the base.

**Two-column leg** compresses inside itself in lower positions.

**Holes in the mid-crossrail** to attach two fixed center or canopy screens are standard on all bench models. Decorative crossrail covers are required if no screens are specified.

**Up/down switch** (one per side) is standard; programmable switch is available separately.

**Control box** (one per side) is standard.

**Integrated power/data tray** provides openings for power inserts.

**Interlink iQ single-circuit power system,** components specified separately, mounts to the underside of the power/data tray of Bench 4. The system consists of a power infeed which connects to the power harness with two Axil Z power/data centers. A maximum of four benches can be supported by one power in-feed. The power infeed features a sensor box that prevents overloading.

➤ See page 2.68

Note: When specifying end units with Interlink iQ, one end unit will count as one bench.
Optional wood truss is available to add a customized accent to all bench, end media wall and fixed end components.

Trusses are constructed of solid beech and available in paints or wood finishes.

**Trusses on Both Sides of Bench Frame**
Order a quantity of two per bench as shown.

**Trusses on Every Other Frame or Specific Frames**
Order a quantity of four for the configuration shown.

**Trusses on All Adjustable- or Fixed-Support Frames**
Order a quantity of seven for the configuration shown.
Height-adjustable table ends attach to either end of a bench to create an additional personal workspace or communal meeting area.

Each model includes:
- Sit-to-stand base
- One worksurface
- Frame to attach to bench.

Adjustment range is 28”–42½”. Base is available in 501 platinum metallic at no upcharge.

Worksurfaces have square edges and are available in the same materials as the bench:
- Thermally fused laminate (TFL) with vinyl or ply rim
- High-pressure laminate (HPL) with vinyl, ply rim or plywood edge
- Wood veneer with a wood rim
- Plywood with exposed plywood edge

Worksurface edge/rim profiles differ based on the top material selected.

Glides are standard with a silver metal top and black plastic base. They are 2¼” diameter and ½”H. Stem is ½” and leveling range is ¼”. If more levelling is required, a break in the bench run may be necessary.

Power options for height-adjustable table ends are the same as offered on benches.

Table ends with power/data tray for use with Axil Z power/data center—models 28F3060BNERT2SE and 28F3060BNEHR2SE—provide integrated power/data tray running through the center of the base with an opening to accept one Axil Z power/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach table end to the bench.

With power/data tray for use with for use with Interlink iQ single-circuit power system—models 28F3060BNERT4SE and 28F3060BNEHR4SE—provide an integrated power/data tray running through the center of the base with an opening to accept an interlink iQ single-circuit power system with two Axil Z per/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach table end to the bench.

Rectangular and Half-Round Two worksurface shapes are available: rectangle and half-round. Grain direction runs with width.

Factory-installed grommets and cut-outs are available in predetermined locations the same as the bench; upcharge applies. ➤See pages 2.26–2.27.

Standard and Programmable One up/down switch control box ships standard with each table end. Programmable memory control switch with four settings and display can be specified separately to replace a standard module. Both the standard and the programmable switches can be mounted on the left or right side of the worksurface and are field installed.

Table ends without power/data tray—models 28F3060BNERT1SE and 28F3060BNEHR1SE—provide a basic table end without an integrated power/data tray. The H-frame ships with the unit and replaces the bench crossrail to attach table end to bench. Frame is open to the floor.

Glides are standard with a silver metal top and black plastic base. They are 2¼” diameter and ½”H. Stem is ½” and leveling range is ¼”. If more levelling is required, a break in the bench run may be necessary.

Power options for height-adjustable table ends are the same as offered on benches.

Table ends with power/data tray for use with Axil Z power/data center—models 28F3060BNERT2SE and 28F3060BNEHR2SE—provide integrated power/data tray running through the center of the base with an opening to accept one Axil Z power/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach table end to the bench.

With power/data tray for use with for use with Interlink iQ single-circuit power system—models 28F3060BNERT4SE and 28F3060BNEHR4SE—provide an integrated power/data tray running through the center of the base with an opening to accept an interlink iQ single-circuit power system with two Axil Z per/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach table end to the bench.
Fixed End Media Wall

Fixed end media wall attaches to the end of a bench and provides an impromptu meeting area. The inside curve can be specified with a writable laminate or can accommodate a monitor. The unit ships knock down and cannot be used as a freestanding unit.

Canopy screen ships with the unit and is 59 1/4"W x 52"H. Three quarter-inch thick exposed plywood edge is standard with a variety of material combinations in HPL, writable HPL and felt.

Equipment shelf offers space to locate media equipment. It is 11 1/8"D and spans the width of canopy. Top surface is HPL with 3/4" thick exposed plywood edge. Shelf sits 19 1/2" above the floor. The equipment shelf cannot be used as a seat.

Optional G19C center grommet in shelf (center back) is available to manage media cords to power source. See page 1.7 for finish options.

Fixed frame has a 501 platinum metallic paint finish and accommodates the wood truss (specified separately).

Flat-screen TV or monitor can be mounted to a Canopy screen. TV or monitor should not exceed 60" diagonal in size or 40 lbs. maximum. A fixed TV mount should be used with wood screens not exceeding 5/8" projection. Tilt and full-mount TV mounts cannot be mounted on a canopy screen.

Connections

Flat-screen TV or monitor can be mounted to a Canopy screen. TV or monitor should not exceed 60" diagonal in size or 40 lbs. maximum. A fixed TV mount should be used with wood screens not exceeding 5/8" projection. Tilt and full-mount TV mounts cannot be mounted on a canopy screen.

Fixed end media wall without power/data tray — model 28F6070MWBEF1 — provides a basic unit without an integrated power/data frame. The H-frame ships with the unit and replaces the bench end crossrail to attach the fixed end media wall to bench. Frame is open to the floor.

With power/data tray for use with Interlink iQ single-circuit power system — model 28F6070MWBEF4 — provides an integrated power/data tray running through the center of the base with an opening to accept an interlink iQ single-circuit power system with one Axil Z per/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach the fixed end media wall to the bench.
Fixed End Seat for Bench

- **Canopy screen** ships with the unit and is 59 1/4" W x 52" H. Three quarter-inch thick exposed plywood edge is standard with a variety of material combinations in HPL, writable HPL and felt.

- **Upholstered seat** is 18 7/8" deep and spans the width of canopy. The cushion attaches to an HPL shelf with 3/4" thick exposed plywood edge. The cushion sets 20 7/8" above the floor.

- **Fixed frame** is 501 platinum and accommodates the wood truss (specified separately).

- **H-frame** ships with the unit and replaces the end crossrail to attach to the bench. Power options are not available.
End media walls with height-adjustable worksurface are available as freestanding units and "for bench" models that much be attached to a bench for support.

**Model for bench** attaches to either end of a bench to create a meeting area. These models cannot be used as a freestanding unit.

**Freestanding models** feature an additional floor frame for stability in stand-alone applications.

**Units** ship knocked down.

**Height-adjustable worksurfaces** features a sit-to-stand frame.

**Adjustment range** is 28"–42½".

**Glides** are standard with a silver metal top and black plastic base. They are 2¼” diameter and ½”H. Stem is ½” and leveling range is ¼.” If more leveling is required, a break in the bench run may be necessary.

**Canopy** can be used for privacy and to provide a mounting place for flat-screen TV or monitor.

**Equipment shelf** offers space to locate media equipment. It is 11¼”D and spans the width of canopy. Top surface is HPL with ¾” thick exposed plywood edge. Shelf sits 19¼” above the floor. The equipment shelf cannot be used as a seat.

**Fixed frame** supports equipment shelf. Frame on end media walls for bench attaches to bench.

**Floor frame on freestanding models** includes cross members (shown as dashed lines) for increased stability.
End Media Wall with Height-Adjustable Worksurface

continued

Details

Worksurfaces have square edges and are available in the same materials as the bench:
- Thermally fused laminate (TFL) with vinyl or ply rim
- High-pressure laminate (HPL) with vinyl, ply rim or plywood edge
- Wood veneer with a wood rim
- Plywood with exposed plywood edge

Worksurface edge/rim profiles differ based on the top material selected.
➤ See page 2.13.

For bench attachment

Freestanding

Each model includes:
- Sit-to-stand base
- One worksurface
- Fixed frame with equipment shelf

IMPORTANT: Canopy, model 28F6052CASE, is required and must be ordered separately. It attaches to the back of the equipment shelf frame. The overall height with the canopy screen installed is 69⅞”, which is taller than the bench with canopy.

Frame is available in 501 platinum metallic at no upcharge.

Canopy
Kimball Benching

Statement of Line ➤ See page 2.3
Planning 2.8
Pricing 2.37
Surface Materials 2.76

One up/down switch control box ships standard with each table end. Programmable memory control switch with four settings and display can be specified separately to replace a standard module. Both the standard and the programmable switches can be mounted on the left or right side of the worksurface and are field installed.

Fixed end media wall with power/data tray for use with Axil Z power/data center—models 28F6070MWRD2SE, 28F6070MWE2SE, and 28F6070MWL2SE—provides an integrated power/data tray running through the center of the base with an opening to accept an interlink iQ single-circuit power system with two Axil Z per/data center; specified separately. The power data tray is attached to the H-frame, which replaces the bench end crossrail to attach the fixed end media wall to the bench.

Connections

Ganging connector, model 28F22GCP, is specified separately to link end media wall to a bench.

Flat-screen TV or monitor can be mounted to a Canopy screen. TV or monitor should not exceed 60” diagonal in size or 40 lbs. maximum. A fixed TV mount should be used with wood screens not exceeding ⅝” projection. Tilt and full-motion TV mounts cannot be mounted on a canopy screen.

End media wall cable manager, model 28A0326CM, is available to mount to canopy below TV to route cables from TV to optional equipment shelf grommet.

Related Products

Cable management accessories for benches and end units, including cable trays and baskets, are available.
➤ See page 2.36.

Wood truss can be used on fixed frame.
➤ See page 2.18.
Meeting booth is a two-sided unit that attaches to either end of a bench. One side features a sit-down meeting area; the opposite side provides an height-adjustable worksurface.

Three canopies are required to complete the meeting booth. The overall height with canopies installed is 63¾".

Canopy screen, model 28F7243CAS, mounts at the center of the base frame with included attachment brackets.

Height-adjustable worksurface is 28¼"D x 72"W.

Two canopy screens, model 28F3043CAS, attach to the back of each seat frame; specified separately.

Two upholstered seats are standard with the meeting booth unit. They are installed onto an HPL platform with exposed plywood edges.

Fixed frame worksurface is 27¼" diameter. No grommet or cut-out options are available.

Frame consists of a fixed side supporting the round top and seats and an height-adjustable frame on the opposite side.
Meeting booth frame consists of a fixed side supporting the round top and seats, and an adjustable height frame on the opposite side. The unit ships knocked down, and cannot be used as a freestanding unit.

Frame is available in 501 platinum metallic at no upcharge.

Adjustment range on height-adjustable worksurface is 28”–42½”. Base is available in 501 platinum metallic at no upcharge.

Worksurfaces have square edges and are available in the same materials as the bench:
- Thermally fused laminate (TFL) with vinyl or ply rim
- High-pressure laminate (HPL) with vinyl, ply rim or plywood edge
- Wood veneer with a wood rim
- Plywood with exposed plywood edge

Note: Finish for the round and rectangular worksurfaces will be the same.

Worksurface edge/rim profiles differ based on the top material selected.

> See page 2.13.

Grain direction on worksurfaces runs with the width.

Factory-installed grommets and cut-outs in height-adjustable worksurface are available in predetermined locations; upcharge applies.

> See pages 2.26–2.27.

Meeting booth with power/data tray for use with Axil Z power/data center—model 28F7263MB2SE—provides integrated power/data tray running through the center of the base with an opening to accept one Axil Z power data center; specified separately.

Glides are standard with a silver metal top and black plastic base. They are 2¼” diameter and ½”H. Stem is ¾” and leveling range is ¼”. If more leveling is required, a break in the bench run may be necessary.

Connections

Ganging connector, model 28F29GCP, is specified separately to link meeting booth to bench.

Related Products

Wood truss

> See page 2.18.

Meeting booth without power/data tray—model 28F7263MB1SE—provides a frame without an integrated power/data frame. Frame is open to the floor.

Meeting booth with power/data tray for use with Interlink iQ single-circuit power system—model 28F7263MB4SE—provides an integrated power/data tray running through the center of the base with an opening to accept an interlink iQ single-circuit power system with two Axil Z per/data center; specified separately.
Factory-Installed Worksurface Grommet Options
For Benches, Ends, and Meeting Booths

Available Finishes

- **G1 Grommets**:
  - MB Matte Black
  - SL Silver

- **G19 Grommets**:
  - 405 Designer White
  - 487 Brushed Nickel
  - 490 Chrome
  - 501 Platinum Metallic
  - 514 Carbon Metallic
  - 544 Silver Pearl

How to Specify

1. Insert the location and finish designator into model number sequence as indicated on the pricing page.

   Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

   For example:
   - **G1CMB** = G1 grommet, center, matte black
   - **G19C501** = G19 center, right, platinum metallic

   IMPORTANT: Only the grommet locations shown in the matrix at left are available as standard.

---

**G1 Plastic Grommets**
- Rectangular Worksurfaces on Bench: **G1C** +$186
- Rectangular, Half-Round, Half-Ellipse, Ellipse, or Round Worksurface: **G1C** +$93

**G19 Metal Grommets**
- Rectangular Worksurfaces on Bench: **G19C** +$186
- Rectangular, Half-Round, Half-Ellipse, Ellipse, or Round Worksurface: **G19C** +$93

*When you specify a grommet option on a bench, you will receive the two of same grommet(s), one on each side of the bench.

**G1 plastic grommet** is a two-piece unit with snap-in lid. Lid cut-out slides open to route cables or can be closed when not in use.

**G19 metal grommet** is a two-piece unit with black brush access. Top locks in place.
How to Specify

1. Insert the location designator into model number sequence as indicated on the pricing page.

IMPORTANT: Only the cut-out locations shown in the matrix at left are available as standard.

*When you specify an accessory frame option on a bench, you will receive the two of same accessory frames, one on each side of the bench.

### Accessory frames accommodate worksurface accessories.

Frame opening is 35"W; any combination of accessories can be used up to a maximum of seven 5"W units (10"W units count for two units; 15"W units count for three units). Accessories can be specified to fill the entire space or partially to allow cables to exit the worksurface.

**Perforated cable tray** is recommended to organize cables below the worksurface.

- See page 2.33 for product info.
- See page 2.66 to specify.

**KIMBALL BENCHING**

**Planning**
- See page 2.8

**Pricing**
- See page 2.37

**Surface Materials**
- See page 2.76
Canopy offers a variety of screen types that can be used in combinations to provide varying degrees of privacy and functionality.

Benches are specified with two screens, one for each user. Screen type can be the same on both sides or different. Screens are specified in the same width (60” or 72”) as the bench. Select from:
- Fixed-height center screens
- Fixed canopy screens
- Worksurface privacy screens

Height-adjustable table ends with rectangular or half-round worksurface are only available with a worksurface privacy screen. End worksurfaces are narrower to align the bench depth and require a 59¼"W screen.

End media wall with height-adjustable worksurface (round, half-eclipse, ellipse) are only available with one width (59¼") and height (52") canopy. When mounted to the frame, the overall height is 69¼" which is taller than the bench canopy.

Note: Fixed-height center screens and worksurface privacy screens are not applicable to end media walls.

Meeting booth is only available with canopies. Available 30” and 72” widths. Height aligns with bench canopy.

Note: Fixed-height privacy screens and center screens are not applicable to meeting booths.
Fixed-height center screens are available to mount on a bench frame only. They should be specified in the same width (60" or 72") as the bench. Center screens mount to the bench frame cross rail with brackets that ship with the screen. They are non-handed.

Two heights are available: 22½" and 36¼". Heights including mounting brackets and overall height when mounted on a bench are shown below.

<table>
<thead>
<tr>
<th></th>
<th>22½&quot;H</th>
<th>36¼&quot;H</th>

<td>44½&quot;H</td>
<td>56½&quot;H</td>
</tr>
</tbody>
</table>

Screens are ¾" thick and rimmed on all four sides. Screen rims are offered in the same rim options as worksurfaces. Screens are available in:

- Thermally fused laminate (TFL), same on both sides; 2mm vinyl or 1mm ply edge band
- High-pressure laminate (HPL), same laminate on both sides; 2mm vinyl, 1mm ply edge band, or exposed plywood edge
- Writable HPL; same on both sides (or with a contrasting HPL on the outside); 2mm vinyl, 1mm ply edge band, or exposed plywood edge
- Non-tackable felt is available on one side of all screens

Edge/rim profiles differ based on the screen material selected. See page 2.13.

Vinyl rims can be specified in a contrasting color.

TFL and HPL woodgrain runs with width.

TFL and HPL screens are standard with the same laminate on both sides.
Fixed canopy screens are available for bench, meeting booth, and end media wall. Canopies are specific to each application.

Canopy screens are 3/4" and are only available with the exposed plywood edge. Materials include:
- High pressure laminate (HPL); same laminate on both sides
- Writable laminate; same on both sides or with a contrasting HPL on the outside
- Non-tackable felt is available on the inside of curve

**Fixed canopy screens**

**Canopies for a bench** must be specified in the same width (60" and 72") as the bench. The height of bench canopy is shorter than the end canopy. Canopy mounts to the bench frame crossrail with brackets that ship with the canopy.

<table>
<thead>
<tr>
<th>Canopy</th>
<th>Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>43&quot;H</td>
<td>46&quot;H</td>

<tr>
<td>With mounting bracket</td>
<td>Overall when mounted on bench</td>
</tr>
</tbody>
</table>

**Canopy screen for end media wall with height-adjustable worksurface** comes in one width (59 1/4"W). The height of end canopies are taller than the bench canopy. The canopy mounts to the frame behind the equipment shelf. Attachment screws ship with the end media wall. Canopy is 52"H with an overall height of 69 3/4" when mounted on end media wall with height-adjustable worksurface.

**Canopy screen for meeting booth** come in two widths (30" and 72"). The height of the canopy is the same overall height (63 3/8"H) as the bench canopy.

**Meeting booth seat canopy** is 30" wide. A quantity of two is required. The canopy mounts to the frame behind the seat cushion. Attachment screws ship with the meeting booth frame.

**HPL woodgrain** runs with width (horizontal) on canopies on meeting booth.

**HPL woodgrain** on canopy screen for bench runs with width (horizontal).

**HPL woodgrain** on canopy screen for end media wall runs with height (vertical) due to the material size constraints.
Details

**Worksurface privacy screens** attach to a bench worksurface and height-adjustable table end worksurface. Screens are available in several styles, materials and rim options.

**Screens** are ¾" thick and rimmed on all four sides. Screens are available in:

- Thermally fused laminate (TFL), same on both sides; 2mm vinyl or 1mm ply edge band
- High-pressure laminate (HPL), same laminate on both sides; 2mm vinyl, 1mm ply edge band, or exposed plywood edge
- Writable HPL; same on both sides (or with a contrasting HPL on the outside); 2mm vinyl, 1mm ply edge band, or exposed plywood edge
- Non-tackable felt is available on the user side of TFL, HPL, and writable laminate

**Edge/rim profiles** differ based on the screen material selected. ➤See page 2.13.

**Vinyl rims** can be specified in a contrasting color.

**TFL and HPL woodgrain** runs with width (horizontal).

**Mounting rail** runs continuous width of screen and has a 501 Platinum Metallic finish.

**Bench cross rail covers** must be specified for each worksurface screen to cover holes in crossrail that are visible when not using a center screen or canopy.

**Worksurface privacy screens** are 15"H. When mounted on a worksurface, the exposed screen above the worksurface is 13¾", Screen mounts flush to the back of worksurface. Screens are specified in the same width as the bench or table end.

**Worksurface privacy screens with accessory rail** are for use with dedicated accessories, which can be used in any combination along the rail. Accessory rail screens are available in all material options with the exception of writable laminate and felt.

**Accessory rail** sits flush with the screen surface. The rail is 12" high and is narrower than the screen width approximately 4¾" on each side. 59¾" and 60" screen rail width is 51¾", 72" screen rail width is 63¾". Rail is painted 501 Platinum Metallic finish.

**Worksurface privacy screens with bungee cords** provide a versatile board to display photos and project inspiration ideas. Items tuck between webbing without the need of a pin or magnet. Bungee screens are available in all material options with the exception of writable laminate and felt. The bungee cord is a white cord with black flecks. The eyelets that attach cords to the screen are silver. Cords are woven under and over each other to create the web design.

**Six accessories** are available in all paint colors to accent workspaces.
Benches with a factory-installed G34C accessory frame will accommodate a variety of dedicated accessory options.

➤ See page 2.34 for dual and single M/Flex monitor arms.

Accessory frame is an aluminum frame with opening 35"W x 21/2"D and only available in 501 Platinum Metallic. Any combination of accessories can be used up to a maximum of seven 5"W units (10"W units count for two units: 15"W units count for three units). Accessories can be specified to fill the entire space or partially to allow cables to be routed to the underside of the surface in open areas.

Perforated cable tray is designed to be used specifically with the accessory frame to organize cables beneath the worksurface. It mounts directly beneath the accessory frame. Available in all paint colors.

Six work tools are available to help organize desktop. Available in all paint colors to accent workspaces; marker holders is available in Designer White writable paint.

Mounting plate can be specified separately to install a Perks Salt KCE02SUSM or Pepper KCE02PPSM unit (sold separately) to bring desktop power to the worksurface. The opening is 1 3/4" in diameter can also be used alone for cords to exit to the underside of the worksurface. Available in all paint colors.

Perks trackless keyboard kit (model 99K1806KAT) can be installed on the user side of worksurfaces with a suggested clearance of 9 3/8" from the front of edge of the worksurface. ➤ See the Perks chapter of the Kimball Desks & Accessories Price List.

Personal task light features an articulating fixture head with single touch on/off button located next to the LED lens. Spring tension provides adjustable positioning of the arm. Light output is 350 lumens, color temperature of 3900K, with color rendering index of 80. LED rated lifespan is greater than 20,000 hours. Power supply is 6-watt wall transformer with 4'11" black cord. UL Listed. Mounting plate available in all paint colors ships standard to mount light in accessory frame. Task light is not freestanding.
Details

**Monitor arms** are designed specifically for installation into the G34 Accessory frame.

**Single and dual M/Flex models** feature a center post with two adjustable cable management clips at the base of pole.

**Monitors up to 20 lbs.** can be accommodated:
- Single monitor arm supports one monitor 4-20 lbs.
- Dual monitor supports two monitors 4-20 lbs. each. Each arm adjusts independently of the other for the greatest versatility.

**100mm x 100mm VESA plates** are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.

➤ Contact Apple Computer directly to purchase an appropriate VESA plate separately.

Connections

**Monitor arms ship with mounting plate** that fits into the G34 accessory frame and is additionally secured to the underside of the worksurface. The mounting plate is available in all paint colors. The G34 grommet option on the worksurface must be specified to use these monitor arms. See page for other Perks monitor arm options for tops without the G34 accessory frame.

Planning Factors

When installing a monitor arm with a Bench canopy screen, the monitor arm will need to be used in the lowest position to assure that the screen does not conflict with the canopy arch when the table is in the highest position.
**Details**

Canopy will accommodate Perks grommet/bolt-through mount monitors arms.

➤See the Perks chapter in the Kimball Desks & Accessories Price List to specify.

**Connections**

Arm with integrated cable management reach is 20" on single models and 22" on dual cross-bar models. Height adjustment range is 12" on single models and 11 1/2" on dual crossbar models.

Monitors up to 15 1/2 lbs. can be accommodated:
- Single model supports one monitor between 5–15 1/2 lbs.
- Dual crossbar model supports two monitors up to 12 1/2 lbs. each.

Note: Dual-arm crossbar monitors must have two monitors attached at all times for balance.

100mm x 100mm VESA plates are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.

➤Contact Apple Computer directly to purchase an appropriate VESA plate separately.

**Planning Factors**

IMPORTANT: Monitor mounts are specific to arm style and are not interchangeable between single and dual monitor applications.

For grommet/bolt through models, be careful to install so as not to interfere with the height-adjustable base frame, modesty panels, screen, or cut outs that are attached to the worksurface. When installing a monitor arm with a Bench canopy screen, the monitor arm will need to be used in the lowest position to assure that the screen does not conflict with the canopy arch when the table is in the highest position.

When installing a monitor arm with a Bench canopy screen, the monitor arm will need to be used in the lowest position to assure that the screen does not conflict with the canopy arch when the table is in the highest position.

Clamp-mount monitor arms are not compatible with Canopy.
Canopy provides several cable management accessories that are designed for use on benches, table ends, all end media wall units and meeting booths.

Cables must be routed to the underside of the worksurface through a G1 or G19 grommet or G34 accessory frame for benches with screens.

Important: Cables cannot be routed between the worksurface and fixed-height privacy, center, or canopy screens. Even though a 5/16” gap will exist between a center or canopy screen and the worksurface; cables cannot pass between.

J-hooks are standard in all bench and end unit power/data trays and ganging connectors. They provide support for power in-feeds, and cables that run in the recessed center are connecting power between units. Quantity of J-hooks varies with the length of tray.

Plastic cable carrier guides cables from the worksurface to the power source, preventing kinks in the cables as the worksurface moves. The top screws to the underside of the worksurface and can lay in the power/data tray or be secured with provided high-strength magnets. The carrier features 1/2” x 1/2” openings on the inside to slip cords into each opening which accommodates one 1/4” cord and one data cable per side. Links in the carrier can be removed to adjust to the desired length. Carrier can also be installed using the magnets to the column leg below the tray on all bench frames to manage power cords from the power data/tray to a floor or wall outlet.

Perforated cable tray is designed to be used specifically with the G34C accessory frame to organize cables beneath the worksurface. Three openings in the bottom of the tray allow the plastic cable carrier (purchased separately) to organize cables to the power/data tray. Magnets supplied with the cable carrier secure to the inside of perforated cable tray.

Cable basket secures power and data cables neatly to the underside of a worksurface. It is available in two widths and is installed on either side of the table frame. It can be used with all grommets and cut-outs, including the G34C accessory frame.
## CANOPY®
### Bench 1
#### Without Power/Data Tray

**Standard Includes**
- Bench frame
- Two worksurfaces
- Two electric height-adjustable mechanisms with control box
- Two standard up/down control switches
- Two 6’ power cords

Ganging connector, model 28F29GCP, may be specified to link bench to bench. 
See page 2.40 to specify.
Bench 4

With Power/Data Tray for Use with Interlink iQ Single-Circuit Power System

Standard Includes
• Bench frame
• Two worksurfaces
• Two electric height-adjustable mechanisms with control box
• Two standard up/down control switches
• Two 6’ power cords
• Power/data tray

How to Specify

1. Model
2. Material/rim material:
   - LL = TFL with vinyl rim
   - LLD = TFL with ply rim
   - L = HPL with vinyl rim
   - LD = HPL with ply rim
   - LD2 = HPL with plywood edge
   - MD = Writable lam. with vinyl rim
   - MD2 = Writable lam. with ply rim
   - W = Wood with plywood rim
   - W = Wood with wood rim
   - D = Plywood with self edge
3. Rim profile (omit for plywood (D, LD2, MD2):
   - P = Softened vinyl rim (LL, L, M)
   - E = Flat ply rim (LLD, LD, MD)
   - F = Softened wood rim (W)
4. Grommet/cut-out option:
   - X = None
      ➤ See pages 2.26–2.28 for designators.
5. Surface finish price group (include for HPL (L), HPL with ply rim (LD), and wood (W) models only):
   - STD = Group 1
   - STD2 = Group 2 (+20%)
6. Surface finish designator
7. Rim finish designator (omit for wood (W) and plywood (D, LD2, MD2) models
8. Paint designator:
   - 501 = Platinum metallic (no upcharge)

Ganging connector, model
28F29GCP, may be specified to link bench to bench.
➤ See page 2.40 to specify.

**Bench and End Media Wall Accessories**

**Standard Includes**
- Attachment hardware

**How to Specify**

**Bench Crossrail Hole Covers**
- **Model**: 2
- **Paint designator**: 501 = Platinum metallic (no upcharge)

**Programmable Memory Control Switch** (black)
- **Model**: 45FPROGS
- **Dimensions**: 1 1/2" x 4 7/8" x 3/4"
- **Price**: $122

**Ganging Connector**
- **For End Media Wall with Height-Adjustable Worksurface**
- **Model**: 28F22GCP
- **Dimensions**: 16" x 22 1/2" x 1 1/4"
- **Price**: $211

- **For Bench-to-Bench and Meeting-Booth-to-Bench Connections**
- **Model**: 28F29GCP
- **Dimensions**: 16" x 28 1/2" x 1 1/4"
- **Price**: $287

**Wood Truss**
- **Paint Finish**
  - **Model**: 28F14WTP
  - **Price**: $315

- **Wood Finish**
  - **Model**: 28F14WTW
  - **Price**: $315

**IMPORTANT:** Specify two programmable memory control switches (45FPROGS) for each bench model; one for each worksurface.

Rectangular Height-Adjustable Worksurface

Standard Includes
- Rectangular worksurface
- Height-adjustable frame
- Standard up/down control switch
- H-frame to connect to bench

How to Specify

1. Model
2. Material/rim material:
   - LL = TFL with vinyl rim
   - LLD = TFL with ply rim
   - L = HPL with vinyl rim
   - LD = HPL with ply rim
   - LD2 = HPL with plywood edge
   - M = Writable lam. with vinyl rim
   - MD = Writable lam. with ply rim
   - MD2 = Writable lam. with plywood rim
   - W = Wood with wood rim
   - D = Plywood with self edge
3. Rim profile:
   - P = Softened vinyl rim (LL, L, M)
   - E = Flat ply rim (LLD, LD, MD)
   - F = Softened wood rim (W)
4. Grommet/cut-out option:
   - X = None
   - ➤ See pages 2.26–2.28 for designators.
5. Surface finish price group:
   - STD = Group 1
   - STD2 = Group 2 (+20%)
6. Surface finish designator
7. Rim finish designator
8. Paint designator
   - 501 = Platinum metallic (no upcharge)

Fixed End Media Wall for Bench

HPL, Felt, and Writable Laminate

**Pricing**

GSA Contract Pending

**Standard Includes**

- Canopy
- Equipment shelf
- Fixed frame with H-frame to attach to the bench end
- Hardware

**How to Specify**

1. Model
2. Canopy material:
   - LD2 = HPL on both sides
   - FLD2 = Felt on inside curve, HPL outside
   - MD2 = Writable laminate on both sides
   - FMD2 = Felt on inside curve, writable laminate on outside curve
   - MLD2 = Writable laminate on inside curve, HPL on outside curve
3. Felt color designator, if applicable
4. HPL or writable laminate finish designator
5. Center grommet for equipment shelf:
   - G19C = Center grommet (+$93)
   - X = No grommet
6. Equipment shelf HPL finish designator
7. Paint designator:
   - 501 = Platinum metallic (no upcharge)

6. Worksurface finish designator
7. Worksurface rim finish designator
8. Center grommet for equipment shelf:
   - G19C = Center grommet (+$93)
   - X = No grommet
9. Equipment shelf HPL designator
10. Paint designator
    - 501 = Platinum metallic (no upcharge)
Freestanding End Media Wall

Round Height-Adjustable Worksurface

**Standard Includes**

- Round worksurface
- Height-adjustable freestanding frame
- Standard up/down control switch
- Equipment shelf

**How to Specify**

1. **Model**

2. **Material/rim material:**
   - LL = TFL with vinyl rim
   - LLD = TFL with ply rim
   - L = HPL with vinyl rim
   - LD = HPL with ply rim
   - LD2 = HPL with plywood edge
   - M =Writable lam. with vinyl rim
   - MD = Writable lam. with ply rim
   - MD2 = Writable lam. with plywood trim
   - W = Wood with wood rim
   - D = Plywood with self edge

3. **Rim profile:**
   - P = Softened vinyl rim (LL, L, M)
   - E = Flat ply rim (LLD, LD, MD)
   - F = Softened wood rim (W)

4. **Grommet/cut-out option:**
   - X = None

5. **Worksurface finish price group:**
   - STD = Group 1
   - STD2 = Group 2 (+20%)

6. **Worksurface finish designator**

7. **Center grommet for equipment shelf:**
   - G19C = Center grommet (+$93)
   - X = No grommet

8. **Equipment shelf HPL designator**

9. **Paint designator**
   - 501 = Platinum metallic (no upcharge)

This unit must be attached to a bench. Order ganging connector model 28F29GCP separately. See page 2.40 to specify.

Cushion fabric is applied railroad (horizontal) fashion.

This unit must be used with a canopy. Order one 28F7243CAS and two 28F3043CAS models. See planning pages for details. See page 2.58 to specify.
Tops and Pneumatic Base

Standard Includes
- Base
- Mounting hardware

How to Specify

Top
1. Model
2. Material/rim material:
   - LL = TFL with vinyl rim
   - LLD = TFL with ply rim
   - L = HPL with vinyl rim
   - LD = HPL with ply rim
   - LD2 = HPL with plywood edge
   - M = Writable laminate with vinyl rim
   - MD = Writable laminate with ply rim
   - MD2 = Writable laminate with plywood rim
   - W = Wood with wood rim
   - D = Plywood with self edge
3. Rim profile:
   - P = Softened vinyl rim (LL, L, M)
   - E = Flat ply rim (LLD, LD, MD)
   - F = Softened wood rim (W)
4. Surface finish price group:
   - STD = Group 1
   - STD2 = Group 2 (+20%)
5. Surface finish designator
6. Rim finish designator

With TFL or HPL

Round Top
42" diameter ¾"  28W42RD  $601  $649  $873  $942  $1657

Rectangular Top
24" 42" ¾"  28W2442RT  $402  $439  $479  $526  $924

With Writable Laminate, Wood, or Plywood

Round Top
42" diameter ¾"  28W42RD  $899  $970  $1713  $1338  $1747

Rectangular Top
24" 42" ¾"  28W2442RT  $491  $952  $542  $658  $1041

\(^1\) Wood truss is constructed of beech wood. Canyon, Driftwood, Monterey, and Tuscan straight grain finishes on wood truss will be a complementary color match without the grain pattern.

\(^2\) Available on wood truss only. These finishes will coordinate with finishes of the same name on price group 2 sapele.

\(^3\) Available on Canopy worksurfaces only; upcharge applies.

IMPORTANT: Wood finishes applied to solid hardwood are complementary to the same wood finish applied to wood veneer, but not an exact match.

Contact Customer Service for more information.

IMPORTANT: Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.
See the Kimball Surface Materials Reference Guide at www.kimball.com for a complete overview of the Kimball materials program, including:
- Characteristics of wood
- Special wood finishes
- Customer-specified laminate (CSL)
- Customer-specified paint (CSP)
- Fabric application and colorways
- Customer’s own material (COM) overview
- Alliance program
- TB133 process
