# SURFACE MATERIALS

## Program Overview

## Surface Materials

### Textiles Collection:

Our collection of textiles, including fabrics, vinyls, and leathers, offers timeless classics and trendy colors to keep the offering fresh and current.

The textiles collection contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between upholstery and panel fabric offerings.

### Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest finishes, such as Brighton Maple, to the darkest ones, such as Urban Walnut, our wood finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Select coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on work-surfaces installed at a 90° angle to each other.

### Discontinuation Policy:

Kimball strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

### Disclaimer:

If surface material changes occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball reserves the right to cancel or make changes to standard products and surface materials.

# WOOD

## Overview

Kimball's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our proprietary wood finish system utilizes a combination of topcoats engineered for the various applications found in the furniture industry. It is exceptionally clear and durable, and allows the beauty of wood to show through. The durability, depth, clarity, and beauty of our wood finishes meet the high expectations customers have of Kimball finishes, and meet or exceed indoor air quality (IAQ) standards.

Finish sheen levels are consistent across all Kimball series, featuring a satin finish with a 40° sheen, except for select traditional casegoods and select tables as noted on their respective overview pages.

All wood products are susceptible to color change from age and exposure to UV rays (sunlight and other sources), especially cherry, maple, and straight grain veneers. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad can be considered to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have unique grain characteristics and color.

Maple veneers are plain sliced and slip matched. Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are plain sliced, and applied book matched.

Cherry veneers are plain sliced and slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Almond, Canyon, Driftwood, Monterey, Portobello, Sable, and Tuscan are straight grain finishes.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

## Surface Materials

### To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth. Always wipe with the grain.
- Dry with a separate cloth if needed. Always wipe with the grain.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately with a blotting action.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.
- Lift objects to move them; never pull objects across the finished surface.

▶ See the appropriate Kimball price list for the list of finishes available for each product line.

IMPORTANT: Wood finishes applied to solid hardwood are complementary to the same wood finish applied to wood veneer, but not an exact match.

▶ Contact Customer Service for more information.

# WOOD

## Special Wood Finishes | Overview

Kimball offers the following options for special wood finishes:

- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:

- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

**IMPORTANT:** Kimball reserves the right to decline the opportunity to match a finish color.

### Upcharges:

A one-time fee of **\$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, or a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

### Approval Process:

- ① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- ② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

*Note: The one-time fee of \$300 will not be charged unless a custom match finish is required.*

*Note: Bingo is not available in special finishes. Special finishes are not available on straight grain veneers.*

### Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix on the next page shows the types of woods used for each series.

### How to Specify

- ① **Model:**  
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.
- ② **Finish type:**  
For the "Finish type" step, insert a special code (in place of STD):  
**ZCHY1** = Special cherry finish  
**ZMAP1** = Special maple finish  
**ZWAL1** = Special walnut finish  
*Note: Choose the special finish code based on the standard wood species used in the series (see matrix on next page).*
- ③ **Finish designator:**  
For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:  
**MA00174KOG** = Amber on Maple  
**WA02905KOG** = Amber on Walnut  
**WA02905KOG** = Mocha on Walnut

# LAMINATE

## Gallery Program

### Program Details:

The Gallery program is an on-trend collection curated from trusted laminate suppliers. As we know, trends come and go, sometimes quite quickly. When we see colors/patterns losing industry presence, we will delete and replace with new styles. Gallery laminates that remain popular could possibly transition into the Kimball standard laminate program.

HPL, TFL, and vinyl rims are included in the program; however not all products in our offering are available with the Gallery laminate option. Due to Gallery laminate size availability, some restrictions may occur on specific product sizes.

➤ See the series chapter within the applicable price list for availability details by product and/or model.

### Ordering Process:

- Kimball orders and procures all Gallery laminates.
- Order Gallery laminate in the same manner as ordering Kimball standard laminate
- Specify GAL1 or GAL2 for the laminate price group and the applicable color designator
- Allow a six-week lead time
- Warranty will be the same as with Kimball standard laminate

### Upcharges:

A percentage of upcharge based on the group is applied to each Gallery laminate selection and the total is added to the original list price. Gallery group 1 laminates incur a 5% upcharge; group 2 incurs a 6% upcharge.

IMPORTANT: Individual models may incur multiple upcharges based on the total number of locations for which a Gallery laminate is specified.

➤ See examples at right.

### Example 1:

Priority double pedestal desk, model 53KE3060DFBLL8

Laminate Location	Laminate Selection	Upcharge
Worksurface	G1008 Timeless (group 2)	6%
Front	G1011 Pepperdust (group 1)	5%

# LAMINATE

## Customer-Specified Laminate (CSL)

Customer-specified **high-pressure laminate** (CSL) is available on select laminate products.

➤ See the appropriate Kimball price list to see if CSL is available on a particular product.

➤ Contact your Customer Service Team to initiate approval.

Kimball reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.

➤ Contact **By Design** at 800.482.1616, extension 6001.

Kimball orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

UL approved suppliers are:

- Wilsonart
- Nevamar
- Lamitech
- Formica
- Pionite

### Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

### How to Specify

- ① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.
- ② **Finish type:** For the “Finish type” step, insert a special finish code (in place of STD).  
**ZFMA1** = Formica  
**ZLMT1** = Lamin-Art  
**ZLTC1** = Lamitech  
**ZNEV1** = Nevamar  
**ZPTE1** = Pionite  
**ZWST1** = Wilsonart
- ③ **Finish designator:** For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

# SOLID SURFACE

## Surface Materials

### **Solid**

IMPORTANT: The list at left reflects the complete Kimball paint and non-paint finish offering; however, not all products are offered in all colors.

➤ See the appropriate Kimball price list for the list of colors available for each product line.

Metallic paint finishes may appear to have variations in color due to its reflective qualities.

Customer-specified paint (CSP) is available.

➤ See page 14.

# PAINT

## Customer-Specified Paint (CSP)

Customer-specified paint (CSP) is available on select painted products. ▶ See the appropriate Kimball price list to see if CSP is available on a particular product.

### Pricing:

A **one-time fee of \$300** (net) will be billed for the development of each new custom (customer specified) paint. This fee covers all Kimball product lines on which the paint may be used. Models receiving a custom paint will also be assessed an upcharge.

A **10% upcharge per line item** (model) for customer specified non-metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

A **20% upcharge per line item** (model) for customer specified metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

### The Process:

- ① Send desired paint sample (no smaller than 3" x 5") to Customer Service along with a complete list of the products to which the custom paint is to be applied. **Include dealer name, contact, and project reference.**
- ② Custom paints will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

IMPORTANT: Kimball reserves the right to decline the opportunity to match a paint color.

## Surface Materials

GSA Non-Contract

### How to Specify:

- ① **Model:**  
Build the complete model specification (excluding finish type and finish designator) by following the "How to Specify" on the appropriate pricing page for the product that is to receive the custom paint.
- ② **Finish type:**  
For the "Finish type" step, insert a special paint code ( in place of STD):  
**ZPNT1** = Special non-metallic paint  
**ZPNTM1** = Special metallic paint
- ③ **Finish designator:**  
For the "Finish designator" step, insert the designator provided to you by Customer Service.

**KOFELTCUTYDG** = wool felt
- ② Felt color

# TRANSLUCENT/WHITE SCREEN FABRIC

Translucent/white screen fabric is a PVDF (polyvinylidene fluoride) material. It allows 80% light transmission with minimal color shift. It is permanently UV resistant and colorfast, and dirt and water repellent. The textile structure and its feel are state of the art; slight variations in the appearance of the fabric are due to small differences in raw materials.

Content:	100% PVDF
Cleaning:	See at right.

Translucent/White

## Cleaning Information:

- A lot of contaminations can be removed with hot water.
- Always rub off stains carefully, because powerful mechanical attack can cause damage at the coating or the structure of the fabric.
- Cleaning should be done from the outside to the inner side of the stain to avoid dispersing it.
- Most suitable for cleaning is to use an absorbent white cloth; microfiber cloth recommended.
- Repeat the cleaning procedure to remove stubborn stains. If the stains of the dirt is old and dried, it might have a negative effect on complete cleaning.

## For Oil and Grease

- Use a petroleum ether as a detergent for best results.
- Depending on the type of oil and grease, it may be necessary to repeat the cleaning procedure for several times.

## For Dust and Dirt

- Dust should be moistened with hot water and then rubbed off carefully.
- If the stain is still on the fabric, hot water with some detergent "tenside" added may be used. The detergent tenside should be carefully rubbed on to the stained area and then rinsed with fresh water.

## Important:

- Cleaning detergents should always be used with care, and if necessary tested on a hidden section of the fabric.
- Avoid using high pressure cleaners since they may damage the coating and the structure of the woven fabric; specifications might be influenced in a negative way.
- In no case should the fabric may be treated with ketones (e.g. acetone), since this damages the coating irreparably.
- Use of abrasives should be avoided because it could damage the fabric surface.

# KIMBALL PANEL FABRICS

## Overview

### Standard Application:

Directional fabrics are “cut up the roll” for standard application unless specified differently.

### Railroad Application:

All fabrics will be applied in railroad (horizontal) fashion to:

- Narrate tiles
- Priority tiles and wall panels
- Stow wallpanels
- Tackboards greater than 48"W when using a seating fabric or greater than 60"W when using a panel fabric
- Xsite tiles
- Xsede tiles

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear on when railroaded.

Railroad application of Kimball panel fabrics and COM for all products that are not listed above or do not have railroading listed as an option in the applicable price list requires a custom quote.

➤ Please contact **By Design**.

**IMPORTANT:** Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect. Flip is more easily recognized on fabrics with a nap or shimmer when viewing fabrics applied in standard application and railroad application side by side.

### Cut Yardage Program:

All Kimball panel fabrics are available on a cut yardage basis. Fabric is available in whole yards only. List prices include freight.

# KIMBALL UPHOLSTERY

## Overview

### Characteristics:

- Certain fabrics may relax over time (e.g., some woven fabrics) creating a loosely upholstered appearance.
  - Some fabrics may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
  - Fabrics are cut to provide the best match possible when transitioning from piece to piece.
  - Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.
  - Kimball will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
  - Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
  - Due to Bloom’s three-dimensional back and arm design, comfort wrinkles (CW) are common with many upholsteries. This is especially true for leathers, vinyls, and denims.
- See Bloom Upholstery Guideline at [www.kimball.com/furniture/bloom](http://www.kimball.com/furniture/bloom)

### Flammability Standard Regulation Testing:

#### California TB117–2013

California Flammability Regulation #117–2013 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings.

**All shipments of Kimball upholstery comply with Regulation #117–2013** and our invoices and law labels for such goods bear certification that our upholstered products comply.

#### UFAC

**All Kimball seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria** to reduce chance of ignition by burning cigarettes. This applies to all Kimball upholstery patterns.

### TB133 Factor:

TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball offers a wide variety of seating products that can be manufactured to meet TB133.

➤ Please contact **By Design**.

### Advisory:

Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants or composite flammability testing. Kimball assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

### Railroad Application:

Railroad application of any fabric must be custom quoted.

➤ Please contact **By Design**.

### Cleaning Codes:

#### Code B

- Cleanable with diluted bleach solution

#### Code D

- Dry clean only.

#### Code L

- Use a clean cloth with warm water and mild soap as soon as possible.

#### Code S

- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

#### Code W

- Use water-based cleaning agents or foam.

#### Code WS

- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

#### Fire Retardant Fabrics

- Solvent-based fabric cleaning or dry cleaning are recommended.
- Cleaning with water or water-based cleaners could result in salt ringing.
- Test proposed cleaning procedure on a small portion of fabric before cleaning entire piece.

### Cleaning Leather:

#### Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

#### Deep Cleaning

- Use mild non-detergent soap or cleaner. Repeat with clean water.
- Do not soak leather.
- Air dry.

#### For Florence Leather Only

- Cleaning solutions with up to 10% bleach solution may be used with caution.

*Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.*

#### Characteristics:

- Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

# KIMBALL UPHOLSTERY

## Contrasting Upholstery and Piping Options

### Contrasting Upholstery:

Contrasting upholstery is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:

- Beo
- Bloom
- Boyd (all models)
- Event (all models)
- Nate & Natty (all models)
- Pose (lounge models)
- Villa (lounge, corner, and wedge models)
- Wish (upholstered-back models)
- Wish Classic (all models)

Select any contrasting Kimball, Alliance Program, COM, or COL upholstery.

**IMPORTANT:** When specifying contrasting fabric, use an electronic specification tools for pricing. If one is not available, you may contact Customer Service.

### Special Applications:

- Pose contrasting back upholstery applies to the cushion back only. Remainder of the chair (seat, arms, and outer shell) is contrasting.

### Contrasting Button:

Contrasting button is available on the following seating series at no upcharge:

- Beo (button back model)

Kimball fabric or leather **MUST** be specified if you desire a contrasting upholstery on the button; Alliance program upholstery is not available for contrasting button.

### Contrasting Piping:

Contrasting piping is available on the following Kimball seating at no upcharge:

- Arpeggio (all models)
- Pose (lounge models)

Kimball fabric or leather **MUST** be specified; Alliance program upholstery is not available for contrasting piping.

### How to Specify

- ① Follow the “How to Specify” steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric, button, or piping information in the order outlined.

# ALLIANCE PROGRAM UPHOLSTERY

## Overview

Kimball has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc-Com, Carnegie, CF Stinson, Designtex, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs.  
➤ See Surface Materials at [www.kimball.com](http://www.kimball.com) for a list of graded-in fabrics from our alliance program partners.

**IMPORTANT:** Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

**IMPORTANT:** The information provided in this section of the price list is the most current information available at the time this reference guide was published.

➤ Contact Customer Service before finalizing any orders to check availability.

### Lead Time:

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

### TB133:

Contact **By Design** about TB133 requirements.  
*Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.*

### Samples:

For memo samples, contact our alliance partners directly.

#### Arc-Com

800.223-5466  
[www.arc-com.com](http://www.arc-com.com)

[www.mayerfabrics.com](http://www.mayerfabrics.com)

#### Momentum Textiles

800.366.6839  
[www.themomgroup.com](http://www.themomgroup.com)

#### Ultrafabrics®

877.309.6648  
[www.ultrafabricsllc.com](http://www.ultrafabricsllc.com)

## How to Specify

- ① Follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section.
- ② For the “upholstery grade” step, add the appropriate three-letter supplier prefix to the fabric grade:  
**ARC**[grade] = Arc-Com  
**CAR**[grade] = Carnegie  
**CFS**[grade] = CF Stinson  
**DT**[grade] = Designtex  
**MHM**[grade] = Maharam  
**MAF**[grade] = Mayer Fabrics  
**MOM**[grade] = Momentum  
**ULT**[grade] = Ultrafabrics
- ③ For the “upholstery designator” use the designator for the pattern/color:

Example:

① K46CC ② **CARJ** ③ 6136\_10 ④ STD  
⑤ MC

# ALLIANCE PROGRAM UPHOLSTERY

## Applicability by Seating Line

Kimball has listed general applicability guidelines for each seating frame due to application constraints or aesthetic concerns in the matrix at right.

Appearance guidelines indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.

*Note: Specific seating and fabric combinations that are not possible are noted for applicable graded-in Alliance fabrics on the following pages.*

Due to Bloom's three-dimensional back and arm design, comfort wrinkles are common with many upholsteries. This is especially true for leathers, vinyls, and denims.

➤ See Bloom Upholstery Guideline at [www.kimball.com/furniture/bloom](http://www.kimball.com/furniture/bloom)

**IMPORTANT:** These guidelines do not constitute any responsibility nor any warranty on the part of Kimball as to appearance, behavior, or durability of a material.

Joya	•	•	•	•		•	
Lolita	•	•	•	•		•	•

## Surface Materials

### Key:

- = Guideline or restriction applies to seating line.

### Appearance Guidelines:

- Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

### Restrictions:

- Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
- Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.
- Textiles that have an uneven or irregular surface cannot be used with topstitched upholstery. The topstitch disrupts the visual appearance of the upholstery. Contact **ByDesign** to see if it is possible to eliminate the topstitch in order to use the fabric.

# CUSTOMER'S OWN MATERIAL

For Panels, Tiles, Screens, Overhead Storage, Tackboards, and Highback Organizers

Surface Materials

GSA Non-Contract

## Kimball COM Policy:

While Kimball inspects fabrics for mill imperfections, some are difficult to recognize. Kimball is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM fabrics and expediting delivery of the material to Kimball.

IMPORTANT: Kimball reserves the right to decline a fabric that may not be suitable for application to product.

## COM Application Testing:

Application testing is required for non-preapproved fabrics on panels, tiles, screens, overhead storage, and highback organizers.

➤Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:

- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

## Preapproved COM:

➤Contact your Customer Service Team to obtain information on preapproved COMs.

## U.L. Listing/Flammability:

Before Kimball accepts and enters an order that will have COM fabrics, COM must be UL listed for use on:

- Cetra
- Interworks EQ
- Narrate
- Xsite

As well, COM must be UL listed, meet ASTM E84 Class A, NFPA 701, or GSA 100% Polyester Waiver Program for use on:

- EverySpace center screens and privacy screens
- Kore
- Perks
- Priority
- Stow
- Tackboards (Definition, EverySpace, Perks, President, Priority, Senator, Transcend
- Traxx tiles
- Xsede

All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

## Yardage/Measurements

Directional and non-directional yardage requirements have been calculated based on 66"W directional, 66"W non-directional, and 54"W directional (where applicable). If your fabric is less than 66"W, some size restrictions may apply.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

## Shipment of COM

After the fabric has passed the approval process described, Kimball will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

Ship your material to the appropriate location based on the product you are ordering.

➤See page 47.

## Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 4 weeks of the acknowledged ship date or all excess COM yardage will be discarded.

## Repeat Fabrics:

It is Kimball standard process to match repeat fabrics on fabric covered overhead and highback organizer doors.

Repeat fabrics will be matched in what Kimball deems the best possible application of the pattern.

Additional COM yardage is required for repeat fabrics.

Repeat	Additional Yardage required per Overhead Door
0-6"	None
6"-12"	0.166 yards
12"-18"	0.500 yards
18"-24"	0.666 yards
24" or more	1.000 yard

*Note: If the customer requires that the repeat fabric be applied in a random fashion, Kimball requires written notification in advance of order processing to that effect.*

➤Contact your Customer Service Team to obtain necessary waiver.

## Checklist:

When ordering COM for Kimball products, please make sure you have done the following:

- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

# CUSTOMER'S OWN MATERIAL & LEATHER

For Kimball Seating and Cushion-Top Pedestals

Surface Materials

GSA Non-Contract

## Kimball COM Policy:

Kimball inspects fabrics for mill imperfections, but some are difficult to recognize. Kimball is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

## Yardage/Measurements:

Kimball has analyzed each model to most accurately reflect the yardage requirements. The yardage requirement for each model is based on

54"W fabric and cutting the fabric up the roll.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

For widths other than 54", increase the yardage requirement by the factors below:

Fabric width	Increase yardage
50"-53"	15%
48"-49"	30%
45"-47"	45%

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.

➤Contact Customer Service.

## Decorative Fabric Patterns:

Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

The illustration above depicts two seat cushions in the proper

placement on a piece of decorative fabric. Please note the unusable fabric. It is not always appropriate to place a seat pattern at the edge of the fabric. Due to this circumstance, please include an additional one-half yard per order.

*Note: If repeats are not to be matched, please contact Customer Service.*

## Directional Fabrics:

Some COM fabrics are considered directional that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball.

"Up the Roll"

"Railroaded"

Application of COM fabrics—"up the roll" or "railroaded"—will be as depict-

ed on the swatch card or website. If a different application is desired, the pattern must be custom quoted.

➤Please contact **By Design**.

## Customer's Own Leather:

Customer's own leather yardage (size) requirements for Kimball seating are based on an average hide size of 45-50 sq. feet. Consult Customer Service for requirements for other hide sizes.

The shape of a hide and the usable, clean square footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

## COM/COL Storage:

Kimball will store excess COM/COL for 4 weeks after completion of order for Kimball seating. Unallocated COM fabric will be stored for three months.

Kimball must be advised if COM is to be retained longer than three months for a future order or if it is to be returned.

## Flammability Compliance:

All COM/COL must meet application codes and regulations, including TB117-2013, California Proposition 65, and California AB 2998.

➤[www.p65warnings.ca.gov/products/furniture-products](http://www.p65warnings.ca.gov/products/furniture-products)  
 ➤[leginfo.legislature.ca.gov](http://leginfo.legislature.ca.gov) (search for bill AB2998; session 2017-2018)

By selecting COM/COL, customer certifies that the material meets such codes and regulations. Customer is solely responsible for compliance and may contact the fabric manufacturer to confirm certification or Kimball for assistance.

Kimball strives to create upholstered products with no added fire retardants. Written documentation, preferably from the material manufacturer, is required confirming that fabric or leather (COM/COL) provided by the customer does NOT contain any added fire retardant chemicals. Kimball will label the product(s) with "Contains no added flame retardant chemicals."

# CUSTOMER'S OWN MATERIAL & LEATHER

## Process for Kimball Seating and Cushion-Top Pedestals

Surface Materials

GSA Non-Contract

### Step ①

Review applicability guidelines and restrictions for the seating frame, if applicable.

▶ See page 46.

### Step ②

Send a sample to Kimball for application testing/approval. Sample should be no smaller than 5" x 7" for fabric or 4" x 4" for leather. Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:

Kimball  
Attn: COM Administration  
1600 Royal Street  
Jasper, IN 47546

Kimball will advise of approval or disapproval. Approval signifies only that such fabric or leather can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball as to appearance, behavior, or durability of the fabric or leather.

### Step ③

Verify yardage requirements.

### Step ④

Prepare and send your purchase order. Purchase order must include:

- Fabric vendor
- Pattern number and name
- Color number and name
- Application instructions (i.e., direction of pattern) for striped, plaid, patterned, or unusual fabrics and which face to use if fabric is reversible.

*Note: If you do not supply application instructions, Kimball will apply the fabric in what it determines to be the best manner, and cannot be held responsible after the upholstery is applied.*

Kimball will send an acknowledgement of your order with a tentative order ship date and the date by which your COM or COL must be received. If your material is not received by the specified date, your ship date will be reassigned.

### Step ⑤

After you receive order acknowledgement from Kimball, ship your material to the appropriate location based on the product you are ordering.

▶ See page 47.

Please include:

- Dealer name and p.o. number
- Kimball seating model number
- Quantity of chairs
- Kimball acknowledgement number

**IMPORTANT:** If you are using a COM on products produced at two different facilities, such as Interwoven seating and Kimball systems, you must have the correct yardage of COM shipped to both manufacturing facilities. Do not ship it to just one facility.

# CUSTOMER'S OWN MATERIAL & LEATHER

## Applicability by Kimball Seating Line

Kimball has listed general applicability guidelines for each seating frame due to application constraints or aesthetic concerns in the matrix at right.

Appearance guidelines indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.

Due to Bloom's three-dimensional back and arm design, comfort wrinkles are common with many upholsteries. This is especially true for leathers, vinyls, and denims.

➤ See **Bloom Upholstery Guideline** at [www.kimball.com/furniture/bloom](http://www.kimball.com/furniture/bloom)

**IMPORTANT:** These guidelines do not constitute any responsibility nor any warranty on the part of Kimball as to appearance, behavior, or durability of a material.

### Appearance Guidelines:

- Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

### Restrictions:

- Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
- Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.
- Textiles that have an uneven or irregular surface cannot be used with topstitched upholstery. The topstitch disrupts the visual appearance of the upholstery. Contact **ByDesign** to see if it is possible to eliminate the topstitch in order to use the fabric.

# CUSTOMER'S OWN MATERIAL & LEATHER

Where to Ship

Surface Materials

Docks 12-13 Plant 5  
1037 E 15th Street  
Jasper, IN 47546

**IMPORTANT:** If you are using COM or COL on products produced at two different facilities, you must have the correct yardage or square footage amounts shipped to both manufacturing facilities. Do not ship it to just one facility.

**IMPORTANT:** Include the following information with all COM/COL shipments:

- Dealer name
- Dealer PO number
- Model number(s) for application
- Sales order number, if applicable

### Codes & Regulations:

All COM/COL must meet application codes and regulations, including TB117-2013, California Proposition 65, and California AB 2998.

► [www.p65warnings.ca.gov/products/furniture-products](http://www.p65warnings.ca.gov/products/furniture-products)

► [leginfo.legislature.ca.gov](http://leginfo.legislature.ca.gov) (search for bill AB2998; session 2017-2018)

By selecting COM/COL, customer certifies that the material meets such codes and regulations. Customer is solely responsible for compliance and may contact the fabric manufacturer to confirm certification or Kimball for assistance.

Kimball strives to create upholstered products with no added fire retardants. Written documentation, preferably from the material manufacturer, is required confirming that fabric or leather (COM/COL) provided by the customer does NOT contain any added fire retardant chemicals. Kimball will label the product(s) with "Contains no added flame retardant chemicals."

# TB133 PROCESS OVERVIEW

for COM, COL, and Alliance Program Upholstery

Surface Materials

COM/COL GSA Non-Contract

Kimball provides TB133 testing services for COM (Customers Own Material), COL (Customers Own Leather), and Alliance Program upholstery orders. We require that COM, COL, or Alliance Program upholstery first be evaluated for application approval, then for TB133 approval.

California Technical Bulletin No. 133—Flammability Test Procedure for Seating Furniture for Use in Public Occupancies—provides guidelines for a full-scale, composite burn test. To obtain TB133 certification, a specific model/upholstery combination must be subjected to and pass TB133 testing.

**IMPORTANT:** The CAL TB133 Seating Fabric Inquiry Form must be submitted prior to order entry for all seating with COM, COL, or Alliance Program upholstery specified to meet TB133.

➤ See page 49.

## The Process:

- ① If specifying Alliance Program upholstery for TB133, contact Customer Service to receive a custom quote for your seating order.
- ② Complete the CAL TB133 Seating Fabric Inquiry Form and submit it to Customer Service.
- ③ Kimball will determine:
  - If the fabric is similar in content to a previously approved fabric for the chair model;
  - If additional testing is required because no similar test documentation was found for the model/upholstery combination; or
  - If the combination will not meet TB133 requirements, based on previous testing.
- ④ If a burn test is required, pricing for the testing will be as follows:
  - \$1300 (including shipping) for testing services; plus the
  - Chair price (test sample)

*Note: COM price is invoiced at Kimball Upholstery price grade 1, plus the cost of the COM; COL is invoiced at price grade 3 plus the cost of the leather. All Alliance Program upholstery orders must be custom quoted.*
- ⑤ If the model/upholstery combination passes testing, you will receive proof of TB133 certification, at which time you may place your seating order.

<p><b>NOTE:</b> California Technical Bulletin No. TB133 is a full scale burn test. Kimball will provide TB133 testing services for COM (Customer's Own Material), COL (Customer's Own Leather) or Alliance Partner pattern orders. TB133 Certification is based on actual testing. Approval can also be determined by similar, previously tested fabrics on similar chair models by experts familiar with TB133 testing. As there are a wide array of materials and chair models it is inconceivable to test all possible material and model combinations. All COM, COL and Alliance patterns must first be evaluated for application approval, then for TB133 approval.</p>	
<b>COM APPROVAL INFORMATION</b>	
<input type="checkbox"/>	Fabric is similar in content to a previously approved fabric for this chair model and will not require a full scale burn test. Letter of Assurance is available upon request.
<input type="checkbox"/>	Additional testing will be required because no similar test documentation was found for this content/model. To proceed with TB133 testing, please submit a purchase order and yardage needed for a specific model. Certification Letter is available upon request.
<input type="checkbox"/>	Based on previously tested models, this will not meet TB133 requirements.
