* Lifting capacity loads must be balanced across the worksurface. To determine the maximum lifting capacity, deduct the weight of the worksurface from the lifting capacity weight listed above.

* See applicable worksurface pricing pages for worksurface weights by size.

IMPORTANT: The customer bears the responsibility to verify that the installation of Xsede Height Adjust desks and benches complies with all local municipal electrical codes.

Some municipalities require the worksurface and base to be sold as an assembly that is listed as a furniture system (UL 1286). In these justifications, specify an Xsede configured desk (base sold with a worksurface) model.

Xsede Height Adjust bases, sold separately, have been evaluated to meet all requirements of UL 962 and bear the ETL mark. Base-only models are available for use with specific Xsede worksurfaces (sold separately) which align cut-outs, grommets, and screen brackets with the base understructure.

Xsede Height Adjust base-only models can accept other Kimball worksurfaces in 3/4", 1\(\frac{3}{8}\)", and 1\(\frac{1}{2}\)" thickness. It is the customer’s responsibility to maintain recommended safety clearances to minimize pinch/crush hazards when using other Kimball worksurfaces. Field installed grommets and cut-outs are recommended where standard locations may interfere with the base understructure. Worksurface size should not exceed the recommended size.

Use of non-Kimball worksurfaces is not recommended and is the sole responsibility of the customer and may void the product warranty.
**Freestanding Desk Components**

Configured desk models ship with a worksurface.

Component desks can also be created with component worksurface and base, specified separately.

T-leg, T-leg L-configuration, and C-leg freestanding desks and component bases feature an extendable frame in 6" increments.

T-leg, C-leg, and T-leg L-configuration freestanding desks and component bases are available in two height range options:
- Standard-height models adjust in height from 26"–42 1/4" (including worksurface)
- Extended-height models adjust in height from 22 1/2"–48 1/2" (including worksurface)

Column leg compresses inside itself in lower positions (T-leg shown).

Single-column H freestanding desks and component bases feature a standard-height column and on an H-frame platform that adjusts in height from 26"–42 1/4" (including worksurface). The frame is fixed and will accommodate widths as per the application matrix. ➤See page 4.8.

Desk and component worksurfaces are available in TFL, HPL, or wood veneer. Worksurface is 1 3/16" thick (1 1/8" for TFL) with a 3mm vinyl rim or veneer edge band.

Up/down switch is standard T-leg, L, and single-column bases; programmable switch is available separately.

Xsede foot design includes leveling glides, providing 1/2" adjustment for uneven floors.

Several safety features are standard on T-leg, L, and single-column bases:
- Anti-collision function on control box will engage when a firm obstruction is detected and will stop worksurface travel.
- Overheat protection will stop the unit should the motor overheat due to being heavily load or if driven continuously. Operation of the desk can resume in approximately 15 minutes.
- Overload protection detects if the load is too heavy and will stop the unit. Remove the load and resume use.
- Control box includes a 9' power cord with two-prong plug.
Component bases include the base frame and ships ready to assemble. IMPORTANT: Worksurfaces must be specified separately. Configured desk models include the base and the worksurface and ships ready to assemble.

Four base styles are available:
- T-leg
- T-leg L-configuration
- C-leg
- Single-column H

Three standard color options on bases:
- 362 Cinder
- 405 Designer White
- 501 Platinum Metallic

Additional paint colors available at an upcharge.

T-leg bases can be paired or are available configured with:
- Rectangular main worksurface and a rectangular return (non-handed)
- Extended straight (handed)
- Extended cove (handed)

Non-handed L-configuration models can be assembled in the field to accommodate left- or right-handed configurations.

C-leg bases can be paired or are available configured with rectangular worksurfaces only. IMPORTANT: C-leg bases are not available with 120° curved corner worksurfaces.

T-leg L-configuration bases can be paired or are available configured with:
- Rectangular main worksurface and a rectangular return (non-handed)
- Extended straight (handed)
- Extended cove (handed)

Non-handed L-configuration models can be assembled in the field to accommodate left- or right-handed configurations.

Field-installed caster kit is available separately as a set of four for use on T-leg base used with 23"D rectangular desks only. Not available for C-leg. Locking casters feature a low profile and are black plastic. They raise the table height 1 1/2". When casters are used, maximum weight for desk is 130 lbs.

Black plastic glides are standard. They are 2" diameter and leveling range is 1/2".

Programmable control switch with four settings and display screen can be specified separately to replace the standard module.

Switches can be mounted on the left or right side of the worksurface and are field installed; one per desk.

Field-installed caster kit is available separately as a set of four for use on T-leg base used with 23"D rectangular desks only. Not available for C-leg. Locking casters feature a low profile and are black plastic. They raise the table height 1 1/2". When casters are used, maximum weight for desk is 130 lbs.

Black plastic glides are standard. They are 2" diameter and leveling range is 1/2".

Planning Factors

1" minimum clearance around the sides and back is required when placing height-adjustable worksurfaces next to each other to minimize pinch/crush hazards. A clearance of less than 5/16" is acceptable next to a fixed wall or panel where the clearance is maintained through the travel range. It is recommended to place height-adjustable desks with a generous perimeter clearance to eliminate pinch points and collision with other objects.

Stationary pedestals, overhead storage or components should not be installed in the path of the height-adjustable desks. Underside of desk frame to floor is 22 1/8" for standard-height and 17 5/8" for extended-height models with the leveling glide in the lowest position.

- 405 Designer White
- 501 Platinum Metallic

Additional paint colors available at an upcharge.

T-leg bases can be paired or are available configured with rectangular main or 120° curved corner worksurfaces.

C-leg bases can be paired or are available configured with rectangular worksurfaces only. IMPORTANT: C-leg bases are not available with 120° curved corner worksurfaces.
Worksurfaces

Product Information

Details

Worksurfaces have square edges are available in:
- 1\(\text{\textfrac{1}{8}}\)-thick thermally fused laminate (TFL)
- 1\(\text{\textfrac{3}{8}}\)-thick high-pressure laminate (HPL)
- 1\(\text{\textfrac{1}{8}}\)-thick high-pressure laminate (HPL) with a wood rim
- 1\(\text{\textfrac{1}{8}}\)-thick wood veneer

Softened rim profile is featured for both vinyl rim (available on TFL and HPL surfaces) and wood rim (available on HPL and wood surfaces)

Four worksurface shapes are available:
- Rectangular
- 120° curved corner
- Extended straight
- Extended cove

Not all worksurface shapes can be used with all component bases. See page 4.8 for application matrix.

Rectangular main worksurfaces are available in two depths:
- 23"D worksurfaces are available in widths of 36", 42", 48", 54", 60", 66", and 72".
- 29"D worksurfaces are available in widths of 48", 54", 60", 66", and 72".

Rectangular return worksurfaces are available in a depth of 23" and widths of 36", 42", and 48". Grain direction runs with the depth (front to back). These worksurfaces are used with rectangular main worksurfaces to create L configurations.

120° curved corner worksurfaces are available in one size; grain direction runs diagonally.

Extended straight worksurfaces are available in one size; grain direction runs with the width.

Extended cove worksurfaces are available in one size; grain direction runs with the width.

Factory-installed grommets and cut-outs are available in predetermined locations; upcharge applies. See pages 4.18 and 4.19.

Planning Factors

1" minimum clearance around the sides and back is required when placing height-adjustable worksurfaces next to each other to minimize pinch/crush hazards.

A clearance of less than \(\text{\textfrac{5}{16}}\)" is acceptable next to a fixed wall or panel where the clearance is maintained through the travel range.

It is recommended to place height-adjustable desks with a generous perimeter clearance to eliminate pinch points and collision with other objects.

Stationary pedestals, overhead storage or components should not be installed in the path of the height-adjustable desks.

Perks hanging CPU holder cannot be used with Xsede height adjust freestanding component desks as it will interfere with the understructure.

For both clamp- or grommet/bolt-through Perks monitor arms, be careful to install so as not to interfere with the height-adjustable base frame, modesty panel, screen, or cut-outs that are attached to the worksurface.

Worksurfaces are available with lower volume pricing. See pricing pages.

Related Products

Perks monitor arms
See the Perks chapter of the Kimball Desks & Accessories Price List.
All height-adjustable worksurfaces must have a 1" minimum clearance around the sides and back to minimize adjacent surfaces to minimize pinch/crush hazards.

Base feet are 23¾"D.

**Perks trackless keyboard kit** (model 99K1806KAT) can be installed on the user side of worksurfaces with a suggested clearance of 9¾" from the front of edge of the worksurface. The unit can be installed on clearances slightly less than 9¾", but will position the keyboard tray platform further away from the surface and reduce the undersurface storage area.

➤See the Perks chapter of the Kimball Desks & Accessories Price List.

---

**Height Range:**

Heights include a 1½"-thick worksurface. Deduct ½" for TFL surfaces.

➤See component base pricing pages for height information excluding a worksurfaces.
Fabric Privacy Screens with Frame

**Details**

Fabric privacy screens with frame attach to freestanding desk worksurfaces (component or configured models) to provide space division and privacy above and below the worksurface. Privacy screens feature a tackable fabric surface (panel fabric) with an aluminum frame which is available in all paint colors. Attachment brackets are painted to match the frame.

**Important:** Privacy screens are prohibited on desks with C-leg bases as they are a tip hazard due to placement of the column being off center.

- **29”H privacy screens with 12” above and 17” below** are designed to provide more privacy below the worksurface. They are available in three widths and are typically narrower than the surface. In the lowest position, the screen will be 14½” above the floor.

- **Side privacy screens with frame** mount to the end of a worksurface to provide side-to-side privacy. They can be used alone or with privacy screens to create the highest level of privacy when dividing space. Side privacy screens are available in tackable fabric (panel or seating fabric) or markerboard and have an aluminum frame that is available in all paint colors. Metal attachment sleeve will feature the same paint as the frame. When mounted to the worksurface, the screen will align to the same height as the privacy screen at 12” or 21”. Two depths are available. Side privacy screens do not hang below the surface.

- **Models with accessory rail on the user side** are available for both privacy screens and full-height privacy screens. They accept Canopy screen rail accessories. The rail runs the width of the screen and is located 4” from the top of the screen and is ½”H. Accessory rail is painted to match the frame and attachment brackets.

- **Six Canopy screen accessory rail accessories** are available for use on Xsede screens. They are available in all paint colors to accent the workspace. See the Canopy chapter in the Kimball Benching Price List.

**Planning Factors**

Privacy screens can be mounted with a 1” maximum gap to manage cables and accommodate a clamp-mount monitor arm.

- **Privacy screens** can be specified to span the full width or they can be narrower than the desk worksurface. A center cut-out or grommet is recommended on the narrower application to avoid interference with the screen’s mounting brackets.

Privacy screens can be mounted flush to the back of the worksurfaces.

- **48”W privacy screens** can be specified for use on 120° curved corner desk.

Due to limited space, specify cable basket 45F14CBS to fit between the screen’s mounting brackets when a 48”W screen is mounted on a bench with 23” or 29”D worksurfaces.

When a clamp-mount monitor arm is used on a surface with privacy screens, the screens must be mounted with a 1” minimum gap away from the worksurface to accommodate the monitor arm’s mounting assembly.
## Perks® Solutions for Now Privacy Screens

### Details

**24”, 30” and 40”H edge-mount privacy screens** are resin. Applicable to standard-height desks only; cannot be used on extended-height desks. Must specify 6” narrower than the worksurface width.

**32”, 38” and 44”H edge-mount privacy screen/modesty screens** are resin. Applicable to standard- and extended-height desks. Must specify 6” narrower than the worksurface width.

**27”H clamp-mount privacy screens** are available in TFL or resin. Applicable to standard- and extended-height desks. Widths are sized for height-adjust model widths or they may be specified narrower than the worksurface.

**27”H full edge-mount privacy screens** are available in resin or glass. Applicable to standard and extended-height desks. Widths are sized for height-adjust model widths or they may be specified narrower than the worksurface.

**Side privacy screens** are available for use on freestanding desks.

> See the Kimball Solutions for Now Price List for details.
Details

Modesty panels provide user privacy and conceal electrical components on freestanding applications. Panels are 10"H. Modesty panels can extend the full width of the worksurface (as shown above) or be narrower than the surface. They can be used on rectangular main, extended straight, extended cove surfaces of freestanding L configurations.

TFL, HPL, and wood veneer modesty panels are ¾" thick and are edge banded in the same material.

Resin modesty panels are ¼" thick.

Connections

Mounting brackets ship standard with the modesty panel:
- 48"W includes two brackets
- 54"–72"W includes three brackets

Brackets for TFL, HPL, and wood modesty panels are black and hidden behind the panel.

Brackets for resin modesty panels feature a silver cover plate to conceal the black mounting brackets.

Planning Factors

To avoid interference, do not place storage, power/data beam, and other objects beneath the desk with modesty panel.

Privacy screens cannot be used with modesty panels.

Clamp-mount monitor arms cannot be used with modesty panel. It is recommended to field install a grommet-mount model in a location to clear the modesty.

Modesty panels cannot be used with height-adjustable benches.

When using a narrower modesty panel than the worksurface width, it is recommended to use a center grommet or cut-out, because the left and right locations could sit outside the modesty depending on the width specified.

Modesty panels are not sized to fit 120° curved corner desks or the return side of freestanding L configurations. Specify a smaller width, such as 66"W modesty for a 72"W worksurface.

Full-width modesty panels mount in front of the blade supporting the worksurface. On 23"D worksurfaces, the modesty panel will sit directly in front of the blade approximately 1". 29"D worksurfaces offer more flexibility for modesty panel placement, which can be inset approximately 2½" when used with grommets and cut-outs and up to 4" without.
Perks® Monitor Arms

Details

Arm with integrated cable management reach is 20" on single and dual independent models; 22" on dual crossbar models. Height adjustment range is 12" on single and dual independent models; and 11½" on dual crossbar models.

Monitors up to 15½ lbs. can be accommodated:
- Single model supports one monitor between 5–15½ lbs.
- Dual independent model supports two monitors between 5–15½ lbs. each. Each arm adjusts independently of the other for the greatest versatility.
- Dual crossbar model supports two monitors up to 12½ lbs. each. Note: Dual-arm crossbar monitors must have two monitors attached at all times for balance.

100mm x 100mm VESA plates are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.

Connections

- Single monitor arms are available in clamp-mount (99KSMAM2CMS) and grommet/bolt-through (99KSMAM2GMS) models.
- Dual crossbar monitor arms are available in clamp-mount (99KSMACBMBCMS) and grommet/bolt-through (99KSMACBMBGMS) models.

Clamp
Grommet/Bolt-Through

Planning

Planning Factors

IMPORTANT: Monitor mounts are specific to arm style and are not interchangeable between single and dual monitor applications.

For clamp- or grommet/bolt-through models, be careful to install so as not to interfere with the height-adjustable base frame, modesty panel, screen, or cut-outs that are attached to the worksurface.

Bench with center-mount fixed screen can be used with clamp-mount and grommet/bolt-through models.

When privacy screens are used on a bench of freestanding desk with a clamp-mount model, the screens must be mounted with a 1” minimum gap away from the worksurface to accommodate the monitor arm’s mounting assembly.

Connections

- Clamp-mount models must be mounted on the straight edge of a worksurface. They are a two-piece assembly, so the clamp can be positioned without sliding across the surface.

Grommet/bolt-through models can be used in holes up to 2.3” in diameter. They cannot be placed over a pedestal, modesty panel, or support panel. Bolt-through application can utilize a hole as small as ½” in the surface.

Refer to assembly instructions.
Cable Management

**Perks power outlet strip**, mounted under the worksurface, powers up to six desktop components including the control box to power the desk. This limits the number of cables that connect to building power.

**Desktop grommets** allow cables to pass through the worksurface to limit managing cables over the back of the worksurface.

**Metal cable basket** secures power and data cables neatly to the underside of any worksurface. IMPORTANT: 23”D worksurface with C-leg base has a reduced area for accessory options on the approach side due to leg and frame placement. ➤See page 4.11.

**Plastic cable carrier** guides the power strip cord and data cables from the worksurface to the power source preventing kinks in the cables as the desk moves. The top screws to the underside of the worksurface and is held in place on the leg in two locations using high strength magnets. Magnets snap into the vertebrae at any location top to bottom. The carrier features ½” x ½” openings on the inside to slip cords into; each opening accommodates one ¼” cord and one data cable per side. Links in the carrier can be removed to adjust to the desired length. Available in two lengths to accommodate height ranges.
Several desktop power outlets are available to bring power to the desk top.

Perks power outlet strip, mounted under the worksurface, powers the control box to power the desk. This limits the number of cables that connect to building power.

Metal cable basket secures power and data cables neatly to the underside of any worksurface.

IMPORTANT: 23”D worksurface with C-leg base has a reduced area for accessory options on the approach side due to leg and frame placement. ➤See page 4.11.

Modesty panels are available to conceal undersurface components and cables.

Vertical cable manager can be used alone or with a plastic cable carrier as shown. The cable manager clips onto any side of the leg of freestanding desk models. When using with a cable carrier, it can be placed over the entire length, or you can remove links in the cable carrier to just partially route cables into the top. Available in two heights specific to standard- and extended-height models.
Details
Xsede Height Adjust provides several flexible options for routing and concealing cords and cables. These include:
• Factory-installed worksurface grommet options (G1 and G19)
• Factory-installed cut-outs for power/data centers (C4, C6, G20, G28, and C29)

Factory-installed grommets and cut-outs are available in predetermined locations.
➤ See pages 4.18 and 4.19.

G1 plastic grommet is a two-piece unit with snap-in lid. Lid cut-out slides open to route cables or can be closed when not in use. Available in:
SL Silver
MB Matte Black

G19 metal grommet is a two-piece unit with black brush access. Top locks in place. Powdercoat finish in the following colors:
405 Designer White
501 Platinum Metallic
514 Carbon Metallic
490 Chrome
487 Brushed Nickel
544 Silver Pearl

C4 cut-outs are for use with:
• Mho® retractable power/data center with 3 prong plug (KCEB2PDPSPC)
• Mho retractable power/data/USB center with 3 prong plug (KCEB2PDUPCS)

C6 cut-outs are for use with:
• Node® power center (KCEBN20PP)
• Node® power/USB center (KCEBN11PU)

G20 cut-outs are designed for use with Ellora® power/data center (99KPDCAM).

G28 cut-outs are designed for use with Ellora® power/USB/data center (45APDCS).

C29 cut-outs are designed for use with Ashley Trio™ power/USB center (KCE0409ATSMWW).

Undersurface-mount power units are available.
➤ See page 4.49.

Above-surface clamp-mount power units are available.
➤ See page 4.48.

IMPORTANT: All power/data centers must be specified separately for field installation.

IMPORTANT: 23”D worksurface with C-leg base are available with G1 and G19 grommets and C29 cut-out only due to reduced area on the approach side.
➤ See page 4.11.
Factory-Installed Grommets

G1 and G19 Grommets

**G1 Plastic Grommets**

- **Rectangular Worksurface**
  - G1L +$93  G1R +$93  G1LR +$186  G1C +$ 93  G1A +$279

- **L-Configuration (main surface)**
  - G1L +$93  G1R +$93  G1LR +$186  G1C +$ 93  G1A +$279

- **L-Configuration (return surface)**
  - G1C +$ 93

- **120° Curved Corner**
  - G1C +$ 93

- **Extended Straight or Cove**
  - G1L +$93  G1R +$93  G1LR +$186  G1C +$ 93  G1A +$279

**G19 Metal Grommets**

- **Rectangular Worksurface**
  - G19L +$93  G19R +$93  G19LR +$186  G19C +$ 93  G19A +$279

- **L-Configuration (main surface)**
  - G19L +$93  G19R +$93  G19LR +$186  G19C +$ 93  G19A +$279

- **L-Configuration (return surface)**
  - G19C +$ 93

- **120° Curved Corner**
  - G19C +$ 93

- **Extended Straight or Cove**
  - G1L +$93  G1R +$93  G1LR +$186  G1C +$ 93  G1A +$279

* Not applicable to 23”D x 36”W and 23”D x 42”W worksurfaces as they interfere with the understructure.

**IMPORTANT:** Grommets are not available for worksurfaces on single column H-base. 23”D worksurface with C-leg base are available with G1 and G19 center grommets only due to reduced area on the approach side.

---

**Available Finishes**

- **G1 Grommets:**
  - MB Matte Black
  - SL Silver

- **G19 Grommets:**
  - 405 Designer White
  - 487 Brushed Nickel
  - 490 Chrome
  - 501 Platinum Metallic
  - 514 Carbon Metallic
  - 544 Silver Pearl

See page 4.17 for complete description of G1 and G19 grommets.

**How to Specify**

1. Insert the location and finish designator into model number sequence as indicated on the pricing page.

   Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

   For example:
   - G1LMB = G1 grommet, left, matte black
   - G19R501 = G19 grommet, right, platinum metallic

   **IMPORTANT:** Only the grommet locations shown in the matrix at left with a designator and price are available as standard.
Factory-Installed Cut-Outs

C4, C6, G20, G28, and C29 Cut-Outs

How to Specify

1. Insert the location designator into the model number sequence as indicated on the pricing page.

IMPORTANT: Only the cut-out locations shown in the matrix at left with a designator are available as standard.

*Height (thickness) for TFL worksurfaces is 1/16" less than laminate or wood worksurfaces; making the overall height 1/16" less than shown here.

**Actual weight of the worksurface, not shipping weight. Use to calculate the lifting capacity of the base and worksurface of the complete desk.

See Base Comparison chart on page 4.2.

How to Specify

1. Model
2. Worksurface material: 
   - LL = TFL with P rim
   - L = HPL with P rim
   - LW = HPL with F wood rim
   - W = Wood with F wood rim
3. Rim profile:
   - P = Softened vinyl (LL or L)
   - F = Softened wood (LW or W)
4. Grommet/cut-out option (omit for 36" and 42"W models):
   - See pages 4.18 and 4.19 for designators.
   - X = No grommet or cut-out
5. Worksurface finish price group (omit for LL models):
   - STD = Group 1
   - STD2 = Group 2 (+20%)
6. Worksurface finish designator
7. Rim finish price group (omit for LL, L, and W models):
   - STD = Group 1
   - STD2 = Group 2 (+20%)
8. Rim finish designator (omit for W models)
9. Quantity range designator:
   - PQ1–9 = 1–9 worksurfaces
   - PQ10–20 = 10–20 worksurfaces (-$35 each)
   - PQ21+ = 21+ worksurfaces (-$70 each)

*Height (thickness) for TFL worksurfaces is ⅛" less than laminate or wood worksurfaces; making the overall height ⅛" less than shown here.

---

### How to Specify

1. **Model**
2. **Worksurface material:**
   - LL = TFL with P rim
   - L = HPL with P rim
   - LW = HPL with F wood rim
   - W = Wood with F wood rim
3. **Rim profile:**
   - P = Softened vinyl (LL or L)
   - F = Softened wood (LW or W)
4. **Grommet/cut-out option for main surface:**
   - See pages 4.18 and 4.19.
   - X = No grommet or cut-out
5. **Grommet/cut-out option for return surface:**
   - See pages 4.18 and 4.19.
   - X = No grommet or cut-out
6. **Worksurface finish price group (omit for LL models):**
   - STD = Group 1
   - STD2 = Group 2 (+20%)
7. **Rim finish price group (omit for LL, L, and W models):**
   - STD = Group 1
   - STD2 = Group 2 (+20%)
8. **Paint designator:**
   - 462 = Cinder
   - 405 = Designer White
   - 501 = Platinum Metallic
   - See page 4.52 for additional paint colors (+$592)

### Ellora Power/Data Center with Hinged Lid for G28 Grommet
- Housing: silver or black powdercoat
- Hinged lid (allows technology to remain connected when lid is closed while concealing the connection)
- Three 15-amp power receptacles
- One USB
- Two data openings
- Data port adapter kit: black
- 10’ cord

### Ellora Single-Circuit Power/Data Center with Hinged Lid for G20 Grommet
- Housing: silver powdercoat
- Hinged lid (allows technology to remain connected when lid is closed while concealing the connection)
- Three 15-amp power receptacles
- One USB
- One data opening
- Data port adapter kit: black
- 10’ cord

### Node Power Center
- 10’ cord with three-prong plug
- Two power receptacles
- Metallic silver powdercoat finish
- Fits C6 cut-out

### Node Power/USB Center
- 10’ cord with three-prong plug
- One power receptacle
- One duplex USB
- Metallic silver powdercoat finish

**Kimball Panel Fabric**
Price Grades A–E

➤ See the Surface Materials Reference Guide at www.kimball.com for the most up-to-date list of available panel fabric patterns.
Kimball has analyzed each model to most accurately reflect the yardage requirements.

The yardage requirement for each model is listed for 66"W directional, 66"W non-directional, and 54"W directional, where applicable.
