Price List

Seating and Perks:
Kwik Office seating and Perks products are available to ship within five business days upon receipt of a credit-approved order.

Caseloads, Tables, Systems, and Metal Filing:
Kwik Office Priority, Senator, Interworks EQ, Traxx, Footprint, and Metal Filing products are available to ship within ten business days upon receipt of a credit-approved order.

Order Size:
The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Caseloads, Systems, and Metal Filing orders, individually, may not exceed $100,000 list. Consult your Customer Service Team for any seating order with more than 20 of a specific model. Production schedules will be verified to ensure shipment within the time period listed above.

How to Use this Price List

Kimball has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

We suggest that you become familiar with the format of this price list. You’ll find information about the product line, planning guidelines, pricing, and how to specify the product.

Statement of Line pages provide a snapshot of the entire product line. We’ve included illustrations, tables showing available sizes, and page cross references to the applicable pricing pages.

Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

Planning pages provide a general overview as well as detailed information about the product, connections that can be made with other models, planning factors, and application guidelines.

Surface material pages within each chapter show the selections available for that series. If applicable, COM/COL yardage information can be found here.

➤See the Kimball Surface Materials Reference Guide at www.kimball.com for a complete overview of the Kimball materials program, including:
- Characteristics of wood
- Special wood finishes
- Customer-specified laminate (CSL)
- Customer-specified paint (CSP)
- Fabric application and colorways
- Customer’s own material (COM) overview
- Alliance program
- TB133 process

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball reserves the right to make changes at any time without notice.

Standard product modifications are available on select products. ➤See the Product Modifications Price List at www.kimball.com

Items listed herein are considered by Kimball as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters’ Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.
How to Specify Our Products

Complete specifications are built by following a set of steps. These “How to Specify” steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

• The steps numbered using a solid circle with a white number inside (e.g., 1, 2, or 3) make up of the base model number.
• Steps numbered using an outlined circle with black number inside (e.g., 4, 5, or 6) are required to complete the specification.

Sample Specification:
The example below shows a complete model number for a Definition arc-top double-pedestal desk.
The first three steps in this example comprise the base model number; the rest of the steps complete the specification.

DF3672DDFA W 1 B 93_490 KRC G19LR490 STD MH

Base Model

Refer to the “standard includes” list to see what ships standard as part of the base model.

Options that incur an upcharge or decrease the base price are noted within the “How to Specify” steps.

Follow these steps to build a complete model specification.

Electronic Catalog and Specification Software:

Kimball promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with Configura to develop additional intelligent programming for our products in CET Designer. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.
## Terms and Conditions

### Ordering Procedures:
Purchase orders must be received with complete information, which includes the following:
- Complete/valid model numbers
- All textiles, finish, and material specifications for each line item.
- “Ship to” address and contact
- Special shipping instructions (tagging, requested dates, etc.)
- Billing address
- Net prices

Submit orders electronically via EDI or OrderXchange.

To order literature or check order status on-line, please visit us at www.kimball.com.

The customer bears sole responsibility for order correctness. Orders are accepted only by issuance of Kimball’s formal order confirmation and are subject to the terms and conditions set forth herein, notwithstanding any variance in terms and conditions set forth on buyer’s order forms.

The order confirmation is the final agreement between the customer and Kimball and supersedes all prior oral, written or electronically transmitted statements regarding the order. Kimball will attempt to meet all requested ship or delivery dates. If no specific date is requested, we will assign the best possible ship date available.

### Changes and Cancellations:
A confirmed order may not be changed or cancelled, in whole or in part, without prior written consent of Kimball. Expenses incurred because of the changes shall be charged to the Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Kimball. Changes may affect delivery dates.

No changes or cancellations will be accepted after order entry for non-standard lead time products including:
- Kwik Office offerings
- Engineer-to-Order (modified or non-standard products)
- Alliance program upholstery
- Customer’s Own Material (COM)
- Customer’s Own Leather (COL)
- Customer Specified Laminate (CSL)
- Customer Specified Paint (CSP)
- Mock Ups
- Service Parts/Replacements

### Modified Product:
Our manufacturing flexibility allows us to accommodate requests for non-cataloged product. We are happy to discuss your unique product requirements and determine feasibility and pricing.

#### Contact By Design
for assistance at 800.482.1616 extension 6002.

### Finishes and Materials:
#### Wood Finish Color Matching
Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

#### Fabric Color Matching
Kimball will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

### Terms and Pricing:
#### Net 30 days
If the invoice amount is not paid in full within the terms of the invoice, the invoice may be subject to a monthly finance charge equal to the lesser of 1.5% or the highest amount permitted by law. List prices include freight charges; however, they do not include:
- Storage and insurance charges
- Sales and other taxes
- Local delivery, unloading, or installation

These items will be invoiced as separate line items.

### Selling Information
Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Kimball customers. Kimball price lists and catalogs are not available to the general public.

### Product Design:
Kimball reserves the right to make changes in design, specifications, and construction or discontinue products without prior notice.

### Shipping/Freight:
Products are priced and will be delivered C.P.T. one contiguous U.S. destination, one Canadian destination or one port of exit, freight prepaid (Incoterm 2010). Title shall transfer with risk of loss.

Kimball reserves the right to select the most appropriate shipping terms.
Terms and Conditions
continued

**Delivery:**

**Normal delivery hours** are 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 3:00 p.m. on Friday. Any delivery arrangements made outside of normal delivery times are subject to additional charges. 

See below.

Any charges incurred because of failure to receive a shipment or offload a shipment in a timely manner (maximum time allowed to offload trailer: 3 hours), will be billed to the sold-to customer.

Any charges as a result of rerouting a shipment while in transit will be billed to the sold-to customer.

Any order requiring **Special Delivery Service** will incur additional charges. All such requirements must be noted on the purchase order. These are services that are not included in the standard price of the product or require the usage of specialized carriers. These services include:

- Weekend delivery (after 3:00 p.m., Friday through Sunday evening)—minimum $500 charge.
- Inside delivery—minimum $50 charge.
- Non-dock delivery—minimum $50 charge.
- JIT delivery (specific day and/or time)—Orders under $25,000 list will incur a $125 charge.

• Rush delivery (1-3 days from ship date)—Contact Customer Service for charges.

**Carrier Selection**

Kimball reserves the right to select the most appropriate mode of shipment. Kimball relinquishes all responsibility for goods shipped upon a clean receipt from the carrier. Customer bears the risk of loss or damage during shipment.

**Packaging**

Kimball’s standard method of shipping is to carton all items. Certain full truck load shipments may qualify for special consideration. Contact Kimball for guidelines. International shipments can be crated at the customer’s request. The expense of crating will be the responsibility of the customer.

**Palletizing**

Kimball may elect to palletize key products on projects when it effectively reduces carton waste and improves stability within the shipment.

**Loss, Damage, or Delay**

Kimball shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control including but not limited to fire, strike, weather, wreck or delay in transportation. In the event of delay due to any such cause, the delivery date will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

**Storage**

If the customer requests a change of ship date and the product is in production, Kimball reserves the right to transfer the product to storage at the customer’s risk and expense. All requests to store product must be approved by Kimball Customer Service and may be subject to storage fees. Such transfer to storage will be deemed delivery to the customer for all purposes including insurance, liabilities, invoicing, and payment.

**Returned Merchandise**

Merchandise will only be accepted for return under the following conditions:

1. The product is a “made to stock” item; and
2. Return Goods Authorization (RGA) is given to you by your Customer Service Team.

All returns are subject to a 50% restocking fee. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect.

**Claim Process:**

All products produced by Kimball are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. Kimball customer service will file the freight claims for you. Follow these easy steps:

1. **Before signing for the merchandise, make notation of all visible damage, shortages and/or time of truck arrival on the bill of lading.**
2. **Contact Customer Service within 15 calendar days of delivery receipt to report issue. We will advise whether a freight claim will need to be filed based on mode of transportation.**
3. **If claim must be filed, carrier must be contacted within 15 calendar days of delivery. Retain all shipping cartons for inspection by the carrier agent.**
4. **A copy of the Carrier Disposition Letter must be sent to Customer Service to receive additional credit on concealed damage issues via Redistribution/ LTL carrier shipments.**

For Concealed Damage, follow steps 2 through 4.
Product Warranty

Lifetime Assurance of Quality

Our Pledge:
Kimball stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

Recommendations:
Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Customer Service should be contacted promptly at 800-482-1818.

Limited Product Warranty:
Kimball warrants that its products are free from defects in materials and workmanship given normal use and care for a lifetime of single-shift service. Normal use is defined as the equivalent of a single shift, 40-hour work week and for seating up to 275 lbs. user weight.

Exception: Some products and parts have limited warranty periods. [See Warranty Periods at right.] The following products are warranted for 3-shift 24/7 service:
- Itsa
- Itsa HD task models (up to 400 lbs. user weight)
- Campos
- Joya three-shift pre-configured task
- Joya heavy-duty task (up to 400 lbs. user weight)
- Wish, excluding Wish Classic, (up to 400 lbs. user weight)

At its option, Kimball will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold by Kimball in North America after November 6, 2000, which fails under normal use as a result of such defect.

In the event that use of a product exceeds normal use as defined above, the warranty period for such product will be reduced to 12 years from date of manufacture, and the warranty for the product’s components that fall under different warranty limitations, as listed at right, will be reduced to one-third of the original warranty.

This warranty is made by Kimball to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball installation and/or application guidelines, and installed by an authorized Kimball dealer or agent. Kimball assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

All warranties run from date of manufacture.

Warranty Periods:
Warranty periods are limited for certain products and/or component parts as follows:

10-Year Warranty
- Bingo® side chairs and stools
- Pep™ seating
- Poly™ seating
- Seating mechanisms and controls
- Veneers
- Laminate
- Pneumatic lifts (cylinder assembly)

5-Year Warranty
- High-wear parts (such as casters, glides, drawer slides, moving chair arms)
- Xedee and Priority height-adjust base mechanism and electrical control box
- Electrical/power products
- Inflatable lumbar supports
- Lighting
- Desk sets
- Monitor arms
- Keyboard kits
- Covering materials (such as foam, most textiles, 3D laminate, and decorative trim)
- Markerboards

3-Year Warranty
- Wool felt
- Custom products
- Carnegie fabrics
- Campo mesh
- Helio mesh
- Itsa mesh
- Joya mesh
- Wish mesh

1-Year Warranty
- Joit™

Warranty Exclusions:
This warranty does not cover:
- The substitution of non-Kimball components for use in place of Kimball components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Natural variations in marble and leather
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- C.O.M. (Customer’s Own Material) or any other non-standard material specified by the customer, including attributes such as appearance, durability, quality, performance, colorfastness, etc.
- Alliance program fabrics
- Fabric, leather, and felt fading and wear, discoloration from contact with liquids or change in color or texture caused by application of finishes (flame proofing, stain resistance)
- Alterations to the product not expressly authorized by Kimball
- Products considered to be of consumable nature (such as bulbs, light ballast, and certain electronic products)

Process for Warranty Issues:
1. A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgment number, model number, and a detailed description of the warranty issue should be provided. Serial numbers may be required before the claim can be processed.
2. Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or re-delivery of damaged or defective product.
3. Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for the repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement. Once the warranty repair/replace has been completed, Kimball shall not be responsible for any unauthorized expenses. Kimball will only accept dealer invoices submitted within 90 days of the final approval by Customer Service; invoices received after 90 days will not be accepted for dealer credit or payment. All warranty information should be sent to:
Kimball

Sustainability

At Kimball, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example.

Throughout our more than 40 years of documented environmental actions, we have been a responsible steward of resources and have acted as an agent of sustainable change in our industry.

Design for the Environment is our approach to product development, providing lasting product solutions that benefit people through sustainable business practices.

Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball.

ANSI/BIFMA level™

We offer one of the most sustainable portfolios in the industry, which includes systems, casegoods, tables, and seating.

LEED® Certification
Kimball offers furniture solutions which may contribute toward LEED® certification. The LEED Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- San Francisco, CA showroom

LEED-CI Silver:
- Chicago, IL showroom
- Washington, DC showroom

LEED-CI:
- Corporate Headquarters

Indoor Air Quality
One of the largest contributions office furniture can make to a building’s LEED certification is indoor air quality via low-emitting products. Kimball tests and certifies many of our products to the ANSI/BIFMA e3 2014 standard credits (7.6.1, 7.6.2, 7.6.3).

Our Pura® finish is a proprietary, wood finish system that utilizes a combination of topcoats engineered for the various applications found in the furniture industry. Pura is exceptionally clear and durable, and allows the beauty of wood to show through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball finishes.

Pura has virtually no volatile organic compounds (VOCs) and meets or exceeds indoor air quality (IAQ) standards.

➤ Find more specific details regarding the environmental aspects of our product offerings at: www.kimball.com

---

Square inches should be calculated using this formula: Surface depth x surface width of available storage
Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 12 inches above the surface).
The operating load capacities for various Kimball products shown in the table at right represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

All components meet or exceed the appropriate ANSI/BIFMA Functional and Proof Loading requirement tests:
• X5.6 2016 Panel Systems Test
• X5.5 2014 Desk/Table Products Test
• X5.9 2019 Storage Units Test

ANSI/BIFMA chair testing does not meet or exceed generally Kimball seating products described at right. These performance tests determine the stamina of seating in its day to day use. Individual tests are described at right.

Generally, Kimball seating products listed on this price list meet or exceed the applicable ANSI/BIFMA standards:

ANSI/BIFMA chair testing does not serve as a warranty or guarantee.

**General Purpose Chair Testing:**

**Backrest Strength Test:** Type I — back tilt chair, 150 lb. force applied, 225 lb. proof load. Type II & III — back tilt chair, 150 lb. force applied, 225 lb. proof load.

**Drop Test:** Using 225 lb. weight, 300 lb. proof load with 6" drop.

**Swivel Cycle Test:** 270 lb. on seat rotating base, 60,000 cycles at mid point and 60,000 lowest position.

**Front Load Ease:** 200 lb. alternating for 40,000 cycles.

**Front Stability Test:** Apply 135 lb. on front edge of seat while applying horizontal 4.5 lb. force at top of seat.

**Arm Strength Test—Downward Application:** 169 lb. force applied downward at arm's weakest point, 253 lb. proof load.

**Arm Strength Test—Outward Application:** 100 lb. force applied outward at arm's weakest point, 150 lb. proof load.

**Chair/Chair Base Durability Test:** 2,000 cycles over obstruction, 98,000 over smooth along a 30° distance with a 270 lb. load.

**Backrest Durability Test:**

Type I — with 240 lb. on seat with chair fully reclined with 100 lb. force, 80,000 cycles. Type II & III — with 240 lb. on seat and tilting with 75 lbs. force, 80,000 cycles. After 80,000 are complete, 40,000 will be off center testing.

**Leg Strength Test—Front Application:** 75 lb. force applied, 113 lb. proof load.

**Leg Strength Test—Side Application:** 75 lb. force applied, 113 lb. proof load.

**Footrest Durability Test:** 200 lb. weight applied along a 4° length of the footrest, 50,000 cycles.

**Footrest Vertical Static Load Test:** 200 lb. functional load, 300 lb. proof load.

**Arm Durability Test:** Apply 90 lb. force at 10° angle for 60,000 cycles.

**Out Stop Test for Chairs with Manually Adjustable Seat Depth:** 163 lb. forward force with 55 lb. downward force for 25 cycles.

**Tablet Arm Test—Static:** 150 lb. load level for 1 minute.

**Tablet Arm Load Ease Test—Cyclic:** 55 lb. dropped onto tablet center surface for 100,000 cycles.

**Lounge Testing:**

**X5.4.5 Backrest Strength Test (Horizontal):**

Functional Load — A force of 667 N (150 lbf.) per seating position shall be applied simultaneously for one (1) minute.

5.4.2 Proof Load — A force of 1112 N (250 lbf.) per seating position shall be applied simultaneously for one (1) minute.

**X5.4.6 Backrest Strength Test (Vertical):**

Functional Load — A force of 890 N (200 lbf.) shall be applied simultaneously to each backrest position (as determined by the number of seating positions for one (1) minute).

6.4.2 Proof Load — A force of 1334 N (300 lbf.) shall be applied simultaneously to each backrest position for one (1) minute.

**X5.4.7 Backrest Durability Test (Horizontal):**

The loading device shall be attached to apply an initially vertical downward force, centered on the apparent weakest point of the backrest(s). Apply a 890 N (200 lbf.) force uniformly through an area 406 mm ± 13 mm (16 in. ± 0.5 in.) long by not less than the thickness of the backrest. The loading device shall be cycled for 10,000 cycles.

**X5.4.8 Backrest Durability Test (Vertical):**

A loading device or strap, not greater than 25 mm (1 in.) in horizontal width, shall be attached to the arm so that the load is initially applied horizontally to the armrest structure. The load shall be applied at the apparent weakest point of the armrest structure forward of the unit backrest, but not closer than 25 mm (1 in.) from an unsupported edge.

**X5.4.9 Arm Strength Test (Horizontal):**

The loading device shall be adjusted to apply a 334 N (75 lbf.) force to the backrest of each seating position. When testing multiple seating units, the forces shall be applied simultaneously. A weight of 102 kg (225 lbf.) shall be secured in the center of each seating position. The loading device shall be cycled for 120,000 cycles.

**Functional Load** — For units with a distance between the arms less than 889 mm (35 in.), a force of 445 N (100 lbf.) shall be applied for one (1) minute in the inward direction. For units with distance between the arms greater than or equal to 889 mm (35 in.), a force of 592 N (133 lbf.) shall be applied for one (1) minute in the inward direction.

**Proof Load** — For units with a distance between the arms less than 889 mm (35 in.), a force of 867 N (150 lbf.) shall be applied for one (1) minute in the inward direction. For units with distance between the arms greater
than 889 mm (35 in.), a force of 890 N (200 lbf.) shall be applied for one (1) minute in the inward direction.

**X5.4.10 Arm Strength Test (Vertical):** A loading adapter that is 127 mm (5 in.) long and at least as wide as the width of the arm shall be attached to the top of the arm rest such that the load will be applied at the apparent weakest point of the armrest structure that is forward of the backrest.

Functional Load—For units with armrest width of greater than 75 mm (3 in.), a force of 890 N (200 lbf.) shall be applied for one (1) minute. Remove the force. For units with an armrest width of less than or equal to 75 mm (3 in.), a force of 750 N (169 lbf.) shall be applied for one (1) minute. Remove the force.

10.4.2 Proof Load—For units with armrest width of greater than 75 mm (3 in.) a force of 1335 N (300 lbf.) shall be applied for one (1) minute. For units with an armrest width of less than or equal to 75 mm (3 in.), a force of 1125 N (253 lbf.) shall be applied for one (1) minute.

**X5.4.11 Arm Durability Test (Horizontal):** A loading device or strap, not greater than 25 mm (1 in.) in horizontal width, shall be attached to the arm so that the load is initially applied horizontally in the outward direction to the armrest structure.

The load shall be applied at the apparent weakest point of the armrest structure forward of the unit backrest, but not closer than 25 mm (1 in.) from an unsupported edge. Apply a 445 N (100 lbf.) force at an appropriate rate between 10 and 30 cycles per minute for 50,000 cycles.

**X5.4.12 Arm Durability Test for Multiple Seating Units:** The loading device shall be placed as close to the apparent weakest point of the armrest as possible, without extending beyond the front or rear of the arm.

For units less than 406 mm (16 in.) in length: The loading device shall apply a downward force, initially vertical, centered on the arm. Apply the force uniformly across a distance equal to the length of the arm. Apply a 667 N (150 lbf.) force at an appropriate rate between 10 and 30 cycles per minute. Apply and remove the force for 10,000 cycles.

**X5.4.13 Arm Durability Test for Single Seat Units Angular:** Simultaneously apply a force of 400 N (90 lbf.) to each arm initially at a 10° ±1° angle as shown in Figure 13b.

The arm loading device must follow the arm as it deflects or pivots. The fixture linking the arm loading device to the armrest pad shall stay in contact with the arm pad throughout the loading cycle. If using a test device similar to that shown in Figure 13a, the load application distance must initially be the length specified in the figure. Other methods of applying the load are acceptable if the force and angle applications are equivalent. The force shall be applied and removed for 60,000 cycles.

**X5.4.14 Seating Durability Test:** A 406 mm (16 inch) diameter test bag weighing 57 kg (125 lb.) shall be attached to a cycling device, permitting a free fall to the seat as shown in Figure 14. The free fall shall begin after lifting the test bag 91 mm (3.6 in.) above its “at rest” position but not to exceed 30 mm (1.2 in.) above the uncompressed surface on the seat (as measured at the center of the seat). All seats not being cycled shall be loaded with 102 kg (225 lb.) of weight per seat. Each seating position shall be tested to 100,000 cycles.

**X5.4.15 Drop Test (225/300 lb. 6 in.):**

Functional Load—

a) The test bag shall be raised 152 mm (6 in.) above the uncompressed seat and released one (1) time. See Figures 15a and 15b.

The unit shall be cycled for 200,000 cycles or platform shall rotate for 120,000 cycles.

b) Remove the bag and repeat setup and proof procedures for each remaining seating position.

**X5.4.16 Leg Strength Tests:**

Functional Load—A force of 334 N (75 lbf.) shall be applied once to each front leg individually for one (1) minute.

Proof Load—A force of 503 N (113 lbf.) or a force equal to the weight of the entire unit, whichever is greater.

**X5.4.17 Unit Drop Test:** Lift one end of the unit to the specified height per Table 2 or to the balance point whichever comes first and allow it to drop freely so it lands squarely.

**X5.4.19 Swivel Test:** A 113 kg (250 lb.) load shall be placed on the seat such that the center of gravity of the load is 51 mm, +13 mm, -0 mm 2 in., +0.5 in., -0 in.) forward or rearward of the center line of the spindle. The seat or platform shall rotate for 120,000 cycles.

**X5.4.20 Tilt Mechanism Test:** A test load of 102 kg (225 lb.) shall be secured on the center of the seat.

The unit shall be cycled for 200,000 cycles at an appropriate rate between 10 and 30 cycles per minute. The tilt mechanism should be checked and readjusted as needed to maintain the original conditions.

**X5.4.21 Stability Test:** The same as X5.1.11

**X5.4.22 Tablet Arm Load Ease Test:** A 343 N (77 lbf.) force applied through a 203 mm ±13 mm (8.0 in. ±0.51 in.) diameter area centered on the writing area of the tablet for a total of 100,000 cycles.

**X5.4.23 Tablet Arm Load Test:** Apply the load through a 203 mm ±13 mm (8.0 in. ±0.51 in.) diameter area 25 mm (1 in.) from the edge of the surface at its apparent weakest point. Apply a load of 68 kg, (150 lb.) at the location described in 23.3 b) for one (1) minute and remove the load.

**Features**

**Joints** are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

**Worksurfaces** are 1 3/16"-thick, 3-ply, balanced construction and available in wood or laminate.

**Laminate worksurfaces** feature high-pressure laminate (HPL) and is available in all standard laminate patterns and colors; customer specified laminate is also available.

**Softened rim profile** (P or F) appears on all four edges of the worksurface.

**Black plastic (G1) grommets** are available on select models. See pricing pages for availability.

**Lock cylinders** are shipped installed on Kwik Office models and are keyed randomly. Key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB005.

**Chassis and drawer/door fronts** on Priority Laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

**Drawer sides and back** are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

**Drawer suspensions** feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box drawers are 3/4 extension. File drawers and lateral file drawers are full extension.

**Black filing rods** are standard in all file drawers and accommodate various filing requirements.

**Hinged modesty panels** are standard on fully assembled bridges, returns, kneecase, and single pedestal credenzas. Panel swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.

**Hinged access doors on the approach side of desks** allow access to cable routing compartment.

---

**Priority Laminate models** offer great flexibility in finish selections. The worksurface, vinyl rim, drawer/door fronts, and chassis may be specified in different colors to create a more transitional to contemporary feel.

**Exterior wood surfaces** on **Priority Wood models** are plain-sliced, slip-matched cherry or maple. Veneers are carefully selected and matched to assure proper balance and consistency.

**Rim** is 1/8" thick.

**Pedestals** are full height and letter width on assembled units.

**Drawer fronts** are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

**Studio (89) pulls** in platinum metallic are standard.

# Credenzas and Lateral Files

## Credenzas

### Kneespace Credenza
- Standard Includes:
  - Softened rim profile
  - Two file/file pedestals
  - Hinged modesty panel
  - Finished back
  - One lock per pedestal, key random
  - Center grommet
  - Platinum metallic studio pulls

### Single-Pedestal Credenza with Pedestal on Right
- Standard Includes:
  - Softened rim profile
  - File/file pedestal
  - Hinged modesty panel
  - Finished back
  - Lock, key random
  - Center grommet
  - Platinum metallic studio pulls

### Single-Pedestal Credenza with Pedestal on Left
- Standard Includes:
  - Softened rim profile
  - File/file pedestal
  - Hinged modesty panel
  - Finished back
  - Lock, key random
  - Center grommet
  - Platinum metallic studio pulls

### Kneespace Credenza
- Standard Includes:
  - Softened rim profile
  - Two file/file pedestals
  - Hinged modesty panel
  - Finished back
  - One lock per pedestal, key random
  - Center grommet
  - Platinum metallic studio pulls

## How to Specify

### Single-Pedestal Credenza with Pedestal on Right
1. Model: Q53K2472CRFL201 = 24" x 72" laminate with vinyl rim
2. Finish designator: CC = Cordoba Cherry
   MW = Midtown Walnut

### Single-Pedestal Credenza with Pedestal on Left
1. Model: Q53K2472CLFL201 = 24" x 72" laminate with vinyl rim
2. Finish designator: CC = Cordoba Cherry
   MW = Midtown Walnut

### Kneespace Credenza
1. Model: Q53K2472CKFL201 = 24" x 72" laminate with vinyl rim
2. Finish designator: CC = Cordoba Cherry
   MW = Midtown Walnut

## Two-Drawer Lateral Files

### Two-Drawer Lateral Files
- Standard Includes:
  - Softened rim profile
  - Finished top and back
  - Lock, key random
  - Interlock mechanism
  - Platinum metallic studio pulls

## How to Specify

### Two-Drawer Lateral Files
1. Model: Q53K2436LFF2L01 = 24" x 36" laminate with vinyl rim
2. Finish designator: CC = Cordoba Cherry
   MW = Midtown Walnut

**Bookcases and Highback Organizers**

**Four-Shelf Freestanding Open Bookcases**
- Standard Includes:
  - ¾"-thick shelves
  - Unfinished back
  - Fully finished top with flat edge (no rim profile)

**How to Specify**
1. Model:
   - Q53K3653BCOFL01 = 52 7⁄8"H laminate
   - Q53K3653BCOFW01 = 52 7⁄8"H wood
2. Finish designator:
   - CC = Cordoba Cherry
   - MW = Midtown Walnut

**Pricing**
- Q53K3653BCOFL01: $1007
- Q53K3653BCOFW01: $1813

**Five-Shelf Freestanding Open Bookcases**
- Standard Includes:
  - ¾"-thick shelves
  - Unfinished back
  - Fully finished top with flat edge (no rim profile)

**How to Specify**
1. Model:
   - Q53K3667BCOFL01 = 67"H laminate
   - Q53K3667BCOFW01 = 67"H wood
2. Finish designator:

Exterior surfaces are cherry (plain sliced, slip matched) or walnut (plain sliced, book matched) veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

Rims are solid hardwood with precisely mitered corners.

Decorative molding is standard on desks, returns, bridges, and credenzas.

Leveling glides adjust for uneven floors.

Drawer fronts are ¾" thick 3-ply with vertically matched grain.

Base rails are solid hardwood for impact and wear resistance.

Tops are 1½" thick, 3-ply balanced construction. Wood grain laminate is also available.

Writing shelf is standard on single- and double-pedestal desks with breakfront modesty panel.

Full height pedestals have one pencil drawer, one box drawer, and one file drawer. Hardwood corner post and panel construction is reinforced with tenon and groove joinery.

Drawer sides and back are ½" thick with veneer faces. Drawer bottoms are ⅛" thick. 5-sided construction allows easy removal of drawer front. Dowel joint assembly is used for maximum strength. Interiors are sealed, sanded, and finished with a clear lacquer finish to protect against swelling, shrinking, or warping and to provide a smooth feel and appearance.

Center drawer is standard on double-pedestal and single-pedestal desks. Bottom of drawer is lined with black leather.

Centra™ locking is featured on double and single pedestal desks, credenzas, and lateral files to secure all drawers in the unit with a single lock. Lock cylinders are shipped installed on Kwik Office models and are keyed randomly. Key numbers will be assigned arbitrarily at the factory.

Heavy-duty filing hardware accommodates various filing requirements. See page 2.9 for filing capabilities.

Details

Breakfront modesty

Flush modesty

Modesty panel on double-pedestal desk features a breakfront appearance; single-pedestal desks are available with either a breakfront or flush appearance.

Antique brass pulls (28AB) are standard. Antique brass metal grommets are standard on returns, bridges, and select desks.

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer dividers are included in desks and credenzas for placement in any box drawer.

Full extension, progressive action drawer suspensions, with precision ball bearings on file drawers, provide a smooth, quiet operation. Box drawers have full extension slides with a positive stop action.

Base rails are solid hardwood for impact and wear resistance.

Adjustable Keyboard Kits:

Keyboard kits cannot be used with President and Senator kneespace credenzas due to the central locking mechanism; nor can they be used with Scenario tables and Fluent worksurfaces as they interfere with the support channels.

Only keyboard kit models 99K1706KK2 and Q99K1706KK1 work with Priority Progressive support rails and height-adjustable tables. Keyboard mount slide will need to be oriented parallel with the front edge of the worksurface. To store, lower the keyboard and swing under the surface.

Keyboard kits, when recessed, are not flush to the worksurface edge when mounted in accordance with the manufacturer's instructions.

The following adjustable keyboard kit models comply with ANSI/HFES method 2.

Frame is constructed of kiln-dried maple hardwoods.

Back and seat are fully upholstered. Cushions are high resiliency, CFC-free polyurethane foam.

Nylon glides are 7/8” in diameter and dome shaped.

Details
Seat suspension is constructed of 1/2”-thick, 9-ply, molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 1 5/8” thick.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back is constructed of heavy webbing secured to the frame with staples. 1”-thick foam is applied to the webbing. Upholstery is wrapped over the foam and secured with upholstery staples.

Curved top rail is visible. It separates the front and back upholstery panels and adds to Beo’s aesthetics.

Steam-bent frame is constructed of kiln-dried European beech to supports the body’s curves.

Seat cushions are made of 1½" thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability. Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Nylon glides are ⅞" in diameter.

Details

Upholstered back is constructed of two panels that are sandwiched together. Each panel features a contoured 3-ply cross-banded plywood inner panel. Inner panels are covered with high-resiliency, CFC-free foam (1/2” on the front and 1/4” on the back). Upholstery is wrapped around the inner panels and secured with upholstery staples. Both front and back upholstery panels are securely attached to the top wood rail and cleats with Christmas-tree fasteners.

**Details**

- Side chairs and stools are each stackable up to four high.
- Rubber stack bumpers and tube closures are standard.
- Side chairs are shipped four per carton when applicable.

**Shell**
- Constructed of 7/16"-thick, 8-ply, molded plywood that is cross banded for strength. Shell is attached to the frame with four countersunk wood screws threaded into two wooden cleats that are glued to the shell.

**Arm caps**
- Are 1 5/8" thick solid bentwood, finished to match the shell. Two countersunk wood screws attach each arm cap to the arm supports.

**Arm supports, legs, and cross members**
- Are 25/32" x 3/8" hot rolled, welded, chrome plated, tubular steel.

**Joints**
- Are welded.

**Black plastic glides**
- Fit like a cap over the ends of the tubular steel frame.

**Side chairs may be ganged** with ganging devices that snap onto the legs. Armless models or alternating armless and armchair models may be connected.

*Note: Two armchair models cannot be ganged side by side.*

**Black ganging devices**, ordered separately, are sold in packages of 5 pairs. One pair is required to gang two chairs. Two pairs will gang three chairs.
Desk Chairs

Overview & Pricing

Mesh-back models incorporate a mesh design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions.

Arm structure consists of a steel upright covered in black nylon.

Seat cushions are 21/8” thick—13/4” CFC- and CHC-free molded foam, over a seven-layer molded plywood shell.

Black, dual-wheel casters on desk chairs are 65mm in diameter. Specify hard casters (802) for use on carpet (standard) or soft casters (801) for use on hard floors (upcharge applies).

Upholstered-back models feature a nine-layer molded plywood shell surrounded by molded, CFC- and CHC-free foam and upholstery.

Standard five-star base is 30% glass-filled nylon, textured, black plastic. Cast aluminum base with a polished finish is available as an option (upcharge applies).

Back features a three-position lock with release mechanism.

T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 41/4” range (11 positions) and horizontally within a 21/2” range. Arm caps are black polyurethane.

Seat slider is available as an option to adjust the seat depth for comfort. Seat depth is adjusted by grasping the left lever below the seat, pulling upward, and sliding forward or rearward; locks within a 2” range.

Synchro mechanism provides fully synchronized seat-to-back movement. Allows user to lock the chair in multiple positions within the range of movement using a single lever.

Seat height adjusts from 157/8”–23” via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

Details

4-leg models and mobile models without arms stack up to 6 chairs high; mobile models with arms stack up to 4 chairs high.

Backs are secured to the frame with 4 countersunk flat-head screws, 11-gauge steel plates, and T-nuts. Round back models are constructed using an injection molded polypropylene panel. Flair back models are constructed using 3/8”-thick, 7-ply, molded plywood.

Frames are 7/8” diameter, 14-gauge tubular steel. Cross members are 3/4” diameter, 14-gauge steel. Leg frames are joined to the cross members with metal inert gas (MIG) welds. Plastic end caps are fitted into the frames of armless models.

Legs are angled for stability and available in textured powdercoat finish or smooth platinum metallic paint.

Black, hard casters are standard on mobile models.

Black nylon ball glides are standard on static 4-leg models. Hard casters are standard on mobile models.

Frames are 7/8” diameter, 14-gauge tubular steel. Cross members are 3/4” diameter, 14-gauge steel. Leg frames are joined to the cross members with metal inert gas (MIG) welds. Plastic end caps are fitted into the frames of armless models.

Legs are angled for stability and available in textured powdercoat finish or smooth platinum metallic paint.

Black, hard casters are standard on mobile models.

Back and seat are fully upholstered. Seat is tilted back, and the back is slightly reclined to allow the user to assume a more natural, relaxed posture.

Back upholstery, including 3/4”-thick foam for the inside back and 1/8” thick foam for the outside back, is applied to the back as a slipcover and secured with upholstery staples.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user’s legs.

Arm caps are injection molded nylon and attached to the frame with a pressure fit. They are color matched to the frame.

Cushions are high resilience, CFC-free polyurethane foam. Seat cushion is 1 1/4” thick.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the cross members. Seat pan is attached to the seat frame with four machine screws and T-nuts.

Transport dolly is available at standard lead times. ➤ See the Seating Price List.

### Seatings

#### Mesh back
- Incorporate a ribbed design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. The mesh is secured to a structural, black plastic frame made of glass-filled polypropylene.

#### Seat height
- Adjusts from 16⅛" to 22½" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

#### Five-star base
- Available in glass-filled nylon black plastic.

#### Black, hard, dual-wheel casters on desk chairs
- 65mm in diameter.

#### Seat cushions
- Are 2⅛" thick—1⅓" CFC- and CHC-free molded foam, plus ⅝" Dacron top pad.

#### Fabric upholstery
- Is unglued, ensuring optimal air movement.

#### T-shaped arm rests
- Standard with 2D adjust-ability. User can adjust the arm vertically within a 4" range (11 positions); technician can adjust the arm horizontally within a 1⅓" range (unlimited positions). Arm caps are black polyurethane.

#### Autofit synchro mechanism
- With automatic weight regulation and fine adjustment is standard. 126° maximum opening angle between seat and back; can be locked in four positions.

#### Side chairs
- Feature a ¾” tubular steel frame. Mesh-back construction is the same as desk chair. Seat cushions are 1⅓" CFC- and CHC-free molded foam. Stackable up to 4 high.

---

**Statement of Line**  ➤ See page 5.1  
**Surface Materials**  5.20

---

---
Mesh back, available in seven colors, is 84% texturized polyester and 16% elastin. The mesh is pulled over a metal frame and stapled into a plastic insert at the bottom.

Seat cushions feature a seamless, pull-over style upholstery. 1.0 models have 2½" of molded, CFC-free, urethane foam applied over a recycled plastic seat shell. 2.0 models (shown) have 1" slab foam with a ½" foam overlay topper and a ½" foam bottom (to give contour to seat) applied over a plywood seat shell.

5-prong base on 1.0 and 2.0 task chairs is constructed of extremely rigid, glass-filled nylon. Black surface is textured for scuff resistance.

Black, hard dual-wheel casters are standard.

Arm caps are soft, self-skinning polyurethane foam molded over a steel core for strength.

Arms are height adjustable within a 2½" range by the push of a button. 1.0 models (shown) lock into one of 7 positions. 2.0 models lock into one of 5 positions.

Height- and width-adjustable arms on 1.0 models also have a width adjustable range of 4¼".

Contoured “sit spot” and waterfall front edge provides optimal seated support and prevents undue pressure in the lower thigh/knee area.

**Note:** Lounge pieces take more production time than side or guest seating. Orders of more than 5 units may experience longer lead times.

### Details

- **Frame** is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

- **Outside panels** are ½"-thick, high-grade polyurethane foam. Upholstery is a sewn slipcover that is stapled into place.

- **Lounge units** feature a wall-saver back leg.

- **Legs and rails of base frames** are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. The base frame is then attached to the seat frame with wood screws through the corner blocks. Units over 48"L feature additional screws to provide extra support. Rails and top of the legs are accented with a decorative reveal.

- **Seats** have a high-tension strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

- **All models are fully upholstered.** Bottom is finished with a black, fabric dust cover prior to the wood frame being attached.

- **Piping** is standard around the entire edge of both the front and back of the back cushion.

- **Cushions** are high-resiliency, CFC-free, polyurethane foam. Seat cushions, specifically, are 5"-thick, high-grade, laminated polyurethane foam that is custom shaped.

- **Non-skid glides** are ¾" in diameter and adjustable.

- **Ottoman and bench frame** are constructed of 5½"-thick, high-grade polyurethane foam applied to a ¾" plywood frame using lap joint construction that is glued and screwed. A sewn slipcover is applied over the foam and attached with upholstery staples. Benches feature a sewn seam in the center. Legs and rails of base frames are constructed using double dowel and glue construction with corner blocks, which are also glued and screwed to the base rails. The rails feature a ¼" setback when attached to the legs. Tops of the legs are accented with ¼" decorative reveal. The base frame is then attached to the seat frame with wood screws through the corner blocks.

- **Details**
  - **Back** features a non-stretch woven suspension that is stapled to the frame, over which upholstery is placed.
  - **Back cushions** are 5½"-thick, high-grade polyurethane foam wrapped with ¾ oz. bonded polyester, which is slipcovered and closed with a zipper.
  - **Contrasting upholstery** may be selected for the back cushion; use electronic specification tool for accurate pricing.
  - **Contrasting piping** may be specified in Kimball fabric or leather.

- **Kwik Office Models**
  - **One-Seat Lounge (QK35AA)**

Desk and Side Chairs

Overview & Pricing

STATURE® Seating

GSA SIN 711-18

Seating
Kwik Office

Outer back is fully upholstered. Back shell is contoured, blow-molded polyethylene with built-in stress-relieving flex.

Back cushion is high-resiliency, CFC-free, polyurethane foam and 1 ½” thick. Back is upholstered using a slipcover-style upholstery technique.

Hardwood base caps are kiln-dried maple supported by a rigid steel substructure.

Arms on desk chairs are maple hardwoods with black urethane arm caps. Arms are attached to the seat with a metal support bracket and ¼”-diameter machine screws.

Seat cushion is CFC-free molded urethane foam and 2” thick. Seat is upholstered using a pull-around upholstery technique.

Waterfall front edge slopes forward to reduce pressure and increase circulation for the user’s legs.

Hardwood-frame side chairs are kiln-dried maple. Joints are double doweled and glued to ensure maximum strength. Frame assembly is mounted in holes bored into the leg and secured with steel brackets and wood screws.

Hard, black, dual-wheel casters for use on carpeted floors are standard.

Seat rails on side chairs are ¾” outside diameter, 14-gauge, tubular steel.

Glides on wood frame side chair are dome-shaped plastic and 7/8” in diameter.

Details

Adjustability features on desk chairs include knee tilt, upright back lock, tilt tension, swivel, and pneumatic height adjustment. Shroud and controls are black.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the metal seat rails on side chair frame and the control mechanism of desk chair.
High-Performance Task Chairs

Mesh Back | Mesh-Upholstered Seat

Overview & Pricing

GSA SIN 711-18

Optional lumbar support is made of high-performance polyurethane elastomer. Position of the lumbar support is adjusted by sliding it up and down on a track within a range of 2¾".

Seat cushion is 2½" thick and consists of 1¾" of CFC- and CHC-free molded foam over a seven-layer molded plywood shell, covered with performance mesh.

5-prong base plastic base is standard. Plastic base is constructed of rigid, glass-filled nylon, features a black textured surface for scuff resistance; aluminum base in platinum metallic or polished finish is available (upcharge applies).

65mm hard dual-wheeled casters (C40) are standard on task chairs and stools; soft dual-wheeled casters (C41) for use on hard floors are available (upcharge applies).

- High-performance task chair
- Upholstered back, upholstered seat
- Plastic wishbone
- Height- and width-adjustable arms with adjustable arm caps (4D)
  - 40¼"–45½"H x 26¼"–27½"W x 23¾"D

**QK20TUPU4DLH**
- High-performance low-height task chair
- Upholstered back, upholstered seat
- Plastic wishbone
- Height- and width-adjustable arms with adjustable arm caps (4D)
  - 38½"–41⅛"H x 26¼"–27½"W x 23¾"D

**QK20TUPU4DSTS**
- High-performance sit-to-stand
- Upholstered back, upholstered seat
- Plastic wishbone
- Height- and width-adjustable arms with adjustable arm caps (4D)
  - 43⅛"–51½"H x 28¼"–27½"W x 23¾"D

**Details**

Wishbone back is available in plastic (injection-molded, glass-filled nylon).

Inner seat panel is molded ¾"-thick, 7-ply, single-shell construction with a waterfall front edge.

All Wish high-performance task chairs meet 300 lb. weight and three-shift work requirements and are warranted for three-shift, 24/7 service.

**How to Specify**

1. **Model**
2. **Back:**
   - Upholstery grade
   - Upholstery number
3. **Seat:**
   - Upholstery grade
   - Upholstery number
4. **Wishbone finish:**
   - 462 = Cinder plastic
   - 501 = Platinum metallic plastic (+$58)
5. **Arm upright finish** (include for 2D and 4D only):
   - 462 = Cinder
   - 497 = Polished aluminum (+$58)

**Lumbar support pad**, made of polypropylene, moves 2 1/2” for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

**Height-adjustable arms** adjust with a push button to one of 5 positions within a range of 2 1/4” and can be specified with fixed or 3-D adjustable arm caps.

**Arm supports** are glass-filled nylon, insert molded over a steel core for superior support.

**5-prong base** is constructed of rigid, glass-filled nylon. Black surface is textured for scuff resistance.

**Seat slider option** is available on task chairs to adjust the seat depth for comfort. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2” range. Upcharge applies. Seat slider is not available on stools.

**Low seat-height option**, compatible with the BIFMA recommended minimum of 15”, is available. The seat height adjustment range is 3”. Upcharge applies.

**Contoured CFC-free polyurethane foam** provides comfort consistency and proper ergonomic support.

**Back cushions** have 1 3/4” CFC-free polyurethane foam to enhance comfort and reduce fatigue. Edges of foam used on seat and back are wrapped with 3/8” of higher density foam for cleaner edges and contours.

**Arm caps** are soft, black, self-skinning polyurethane foam, insert molded over a steel core for strength.

**Seat cushions** have 2” base foam, plus a 1/2” soft topper pad to enhance comfort and reduce fatigue. Base foam includes 1/2” filler centered on the bottom of the cushion for added support. Seat cushions feature a waterfall front edge.

**Hard dual-wheel casters** (C1) are standard.

**Wishbone back frame** is injection molded, glass-filled nylon. Frame is attached with 2 high-tensile M10-1.5 x 35mm Allen-head bolts with grade 8 heavy steel flat washers.

**Inner back panel** is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

**Inner seat panel** is molded 9/16”- thick, 9-ply (1/4” poplar per ply), single-shell construction with a waterfall front edge.

**Seamed slipcover-style upholstery** on the back and seat accommodates a wide variety of fabrics and leather.

**Kwik Office Models**

**Task Chair with Height-Adjustable Arms (QK20BT)**
- Fixed arm caps
- 39 3/4”- 44”H x 27 1/2”W x 26 1/2”D

**Details**

Interworks EQ panels, Traxx and tiles, Footprint worksurfaces, and metal bevel and flat profile storage components are available in a wide offering to allow you to complete your office in one quick stop.

➤ See the Kimball Panel Systems Price List and Kimball Surfaces and Storage Price List for detailed product information and application guidelines.

Interworks EQ tackable acoustical panels are available in all standard heights and widths for maximum flexibility when configuring quick set ups.

Traxx and tiles are available to coordinate with 66"H Interworks EQ panels.

Flat profile undersurface storage and metal supports are available in all non-metallic, core collection paints for consistent color palette options throughout your office setting. Pedestals, lateral files, and mobile pedestals are available for your selection.

Traxx starter kits ad wall-mount connectors are available to start a panel run from a building wall.

Bevel profile overhead storage is metal and available in all non-metallic, core collection paints. Available in receding door cabinets, half-height shelf, or full-height shelf models.

Worksurfaces are available in a variety of shapes, sizes, and profile options for your specifying convenience. They are offered in select laminates and feature coordinating vinyl rims.
The workstations shown at right are typical of configurations that are possible using Kwik Office systems components.
Tackable Acoustical Panels

34", 42", and 48"H

Standard Includes

- Top cap
- Two wireway covers
- Two panel hinges
- Two panel glides
- Carpet grippers
- Power distribution assembly on powered panels

How to Specify

1. **Model**
2. **Power option:**
   - P = Powered
   - N = Non-powered
   - H = Hardwired (+$73 to non-powered)
3. **Top cap material:**
   - P = Paint
4. **Type of power system (omit for non-powered and hardwired):**
   - 84 = 8-wire, 4-circuit
5. **Top cap profile:**
   - C = Crowned
6. **Wireway cover punch option**
   - ➤See page 6.1 for designators.
7. **Trim finish designator**
8. **Hinge color designator**
9. **Side 1 fabric grade**
10. **Side 1 fabric number**
11. **Side 2 fabric grade**
12. **Side 2 fabric number**

**Standard Includes**
- Top cap
- Two wireway covers
- Two panel hinges
- Two panel glides
- Carpet grippers
- Power distribution assembly on powered panels

**How to Specify**
1. Model
2. Power option:
   - **P** = Powered
   - **N** = Non-powered
   - **H** = Hardwired (+$73 to non-powered)
3. Top cap material:
   - **P** = Paint
4. Type of power system (omit for non-powered and hardwired):
   - **B4** = 8-wire, 4-circuit
5. Top cap profile:
   - **C** = Crowned
6. Wireway cover punch option (omit for 18"W):
   - See page 6.1 for designators.
7. Trim finish designator
8. Hinge color designator
9. Side 1 fabric grade
10. Side 1 fabric number
11. Side 2 fabric grade
12. Side 2 fabric number
13. End trim (required for finished look at end of panel runs)
   - See page 6.17.

**Electrical components**
- See page 6.22.
### Supplemental Brackets

</tr>
<tr>
<td>S Bracket 1/2&quot; 1/2&quot; 24&quot; Q10PSPNCS</td>
<td>$112</td>
</tr>
</tbody>
</table>

Supplemental Bracket Spacer Q10PSBSPCR No charge

Specify supplemental brackets for maximum stability when wing panel is not tied to worksurface at front and back.

Specify bracket spacer when using a supplemental bracket to reinforce the connection between:
- 10P tackable acoustical (monolithic) panels and 10P sectional or glass panels (old models); or
- 10P tackable acoustical (monolithic) panels and 11P sectional or glass panels.

The bracket spacer will accommodate the difference in the depth of the top channel (cable trough).
## Finish Channels

For Same-Height Panel Connections

### Standard Includes
- Finish channel top cap
- Fabric channel
- Metal base cover
- Alignment clip

### How to Specify

1. **Model**
2. Top cap material:
   - \( P \) = Paint
3. Top cap profile:
   - \( C \) = Crowned
4. Trim finish designator
5. Fabric grade
6. Fabric number

---

T-configurations with one lower-height in-line or perpendicular panel require specification of additional models, including the straight/T finish channel shown on this page.

➤ See page 6.12 for lower-height inline T configuration.

➤ See page 6.14 for lower-height perpendicular T configuration.
Select finish channel based on the difference in panel heights.

IMPORTANT: T-configurations with one lower-height inline panel (as shown on this page) require specification of an additional finish channel model and a top cap not on this page:

- Same-height straight/T finish channel the same height as the lower panel (10P**CNT); and
- 3-way/T top cap (10PCNTTC5 or 10PCNTTC6) to sit between the straight/T finish channel and the varied-height 3-way finish channel.

➤ See page 6.14 for T-configurations with one lower-height perpendicular panel.

Straight/T finish channels
➤ See page 6.11.

3-way/T top caps
➤ See page 6.15.
## Finish Channels

For Varied-Height 4-Way Connections—One Lower Panel

### Standard Includes
- Finish channel top cap
- Fabric channel
- Alignment clip
- In-line fill cap

- Q10P46CNHL: 105
### Standard Includes

- Finish channel top cap
- Two fabric channels
- Two alignment clips
- Two in-line fill caps

### How to Specify

1. **Model**
2. Top cap material:
   - P = Paint
3. Top cap profile:
   - C = Crowned
4. Trim finish designator:
   - Paint number or 501 = Platinum Metallic (+10%)
5. Fabric grade
6. Fabric number

### Finish Channels

For Varied-Height 4-Way Connections—Two Lower Panels

Select finish channel based on the difference in panel heights.

Models on this page can also be used to create T-configurations with one lower-height perpendicular panel. Specify:
- Varied-height 4-way/X with two lower-height panels finish channel (10P**CNHLL) for the side with the lower-height perpendicular panel; and
- Same-height straight/T finish channel in the appropriate height for the straight side (10P**CNT).

Note: One of the fabric channels included with the varied-height model will not be used.

Straight/T finish channels ➤See page 6.11.

GSA SIN 711-1
Trim Top Caps

Model | Description | Price
--- | --- | ---

**Corner/L Top Caps**
Q10PCNLTC1 | Tops 2 varied height 90° perpendicular panels at low panels. | $36
Q10PCNLTC2 | Tops 2 varied height 90° perpendicular panels at low panels. | 36

**3-Way/T Top Caps**
Q10PCNTTC1 | Tops 3 varied height panels (2 low, 1 high) at low panels. | $36
Q10PCNTTC2 | Tops 3 varied height panels (2 low, 1 high) at low panels. | 36
Q10PCNTTC3 | Tops 3 varied height panels (2 low, 1 high) at low panels. | 36
Q10PCNTTC4 | Tops 3 varied height panels (1 low, 2 high) at low panel. | 36
Q10PCNTTC5 | Tops 3 varied height panels (1 low, 2 high) at low panel. | 36
Q10PCNTTC6 | Tops 3 varied height panels (1 low, 2 high) at low panel. | 36

**3-Way/Y 120° Top Cap**
Q10PCNYTC1 | Tops 3 same height panels | $36

**4-Way/X Top Caps**
Q10PCNXTC1 | Tops 4 same height panels (4 high) at all panels. Includes two alignment clips. | $36

Select appropriate top cap for your application based on drawings above.

When using a 3-way/T top cap, specify a straight finish channel that is the same height as the lower panels.

When using a 3-way varied-height finish channel, specify a 10PCNTTC5 or 10PCNTTC6 top cap, as well with a straight/T finish channel.

For 10PCNLTC1 and 10PCNLTC2, 10PCNTTC1, 10PCNTTC2, 10PCNTTC3, and 10PCNTTC4, specify a hi-lo end trim for the exposed edge of the higher panel.

- Corner/L and 3-way/T top caps
- See page 6.15.
Standard Includes

• Traxx starter
• In-line filler cap

How to Specify

1. Model
2. Top cap material (omit for end trim):
   P = Paint
3. Trim finish designator

End Trim

1. Model
2. Trim finish designator

Specify the starter to match the height of the panel.

Traxx Panel Starter Kit includes only the necessary hardware to attach panel perpendicular to Traxx.

Selection and purchase of the proper attachment fasteners for your wall is the responsibility of the installer.

In-line filler cap, included, is used to fill the gap at top of panel side rail when using Traxx panel starter kit or panel wall mount.

</table>

Power distribution assemblies accommodate up to 4 receptacles.

Prior to 2007, Interworks used an unshielded 6-wire and 4-wire system. “Transitioning” models enable connection of previous-generation electrical system with the current 8-wire system.

See the Kimball Panel Systems Price List.

#### How to Specify

1. **Model**
2. **Type of electrical system:**
   - 84 = 8-wire, 4-circuit

#### Standard Includes

- Power distribution assembly or jumper cable

<td>No charge</td>
</tr>
</tbody>
</table>

Standard duplex access is not available in 30"W or 36"W panels. Leviton brand or equivalent modular duplexes are required.

Junction box is required for field installation of hardwired electrical; not for use in 18"W panels.

Specify one raceway removal tool per order when specifying hardwire panels.
**New York City Retrofit Kits**

<table>
<thead>
<tr>

<td>1070</td>
</tr>
</tbody>
</table>

NYC electrical is only required in starter panels (first panel in run).

They are not for use in 18"W or 24"W panels.

**How to Specify**

1. Model
2. Finish designator

**Standard Includes**

- Internal wireway with hardwire electrical system
- Jumper cable
- Junction box assembly
- Two end caps: 462 Cinder
- Wireway covers; one with knockouts to punch as needed, one blank.
**Power/Data Poles**

**Standard Includes**
- Poles
- Cover
- Ceiling plate
- Appropriate base cover
- Alignment clips
- In-line fill caps

**How to Specify**

1. **Model**
2. **Top cap profile:**
   - C = Crowned
3. **Finish designator**

**Poles**

- Accommodate up to two ceiling power entry assemblies, specify separately.
- Ceiling power entry assembly
  - See page 6.23.

Data channels are used to run voice/data cables through two adjacent panels at different heights.

Knockouts are provided at each panel height to allow for communication access.

For 4-way/X configurations, use in-line data channels plus in-line fill caps for each lower panel in the configuration.
## Traxx Components

### Traxx

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Standard Includes

- **Traxx**
  - Set of 2 Traxx
  - Four splice plates

- **Splice Plates**
  - Set of 4 plates

- **Fastener Concealment**
  - Roll: black vinyl or black felt

### How to Specify

1. Trax
2. Finish price group: **STD** = Group 1
3. Finish designator

Splice Plates or Fastener Concealment

1. Model

---

Traxx can be cut to size in the field.

IMPORTANT: Specify vinyl fastener concealment when using presentation tools. Accommodates two sets of Traxx.

Four splice plates are included with each set of Traxx. Specify additional splice plates only if needed for your installation.
## Fabric Tiles

### Pricing

| 60” |     |     | QHIT6036A     |                    | 464 | 529 |

**IMPORTANT:** 36”H tiles correspond to 66”H Interworks EQ panels.

Tiles can be field scribed. Additional trim channels should be specified separately if additional tiles are created.

---

**Standard Includes**
- Fabric tile
- 2 matching trim channels

**How to Specify**
1. Model
2. Panel fabric grade
3. Panel fabric number

---

Statement of Line ➤See page 6.2
Planning 6.5
Pricing 6.29
Surface Materials 6.49
End Trim

How to Specify

1. Model
2. Finish price group:  
   **STD** = Group 1
3. Finish designator

Standard Includes

- End trim

Specify end trim for finish detail when end of Traxx and tiles are exposed.
Use full end trim to cover the exposed edge of tile and upper and lower Traxx. Use single end trim to cover the end of a single Traxx.

Trim cap slips into the top ledge of the upper Traxx to add finishing detail for Traxx applications.

Full end trim may be used for finish detail when end of wall mounted overhead is exposed.

**Rim Profiles:**
- Vinyl (P) on wire manager
- Vinyl (P) on double rim

**Grain Direction:**

### IMPORTANT
- Brackets must be specified separately.
- Side edges are finished to match the vinyl rim; wire manager on applicable models is on the back edges.
- Return combo dimensions are determined from left to right when seated at the worksurface.
## U-Top Laminate 1\(\frac{3}{16}\)" Worksurfaces

### Standard Includes
- Worksurface

---

### How to Specify
1. Model
2. Rim option:
   - 3 = Wire manager
   - 1 = Single rim
3. Rim profile:
   - P = Vinyl rim
4. Surface finish price group:
   - STD = Group 1
5. Surface finish designator
6. Vinyl rim finish designator
7. Wire manager finish designator (omit for single rim model)

---

| Gusset Bracket |                                                                             |        |
| QFBG | Non-handed. For use as additional support for metal support panel that is not next to component or modesty panel. 97/8" x 97/8". | $34    |
## Worksurface Support Panels

### Standard Includes
- End Panels
  - Panel
  - Two floor glides (one glide on 8" return support panel)

Note: End panels, support panels and corner post are designed to secure modesty panel.

### How to Specify
1. **Model**
2. **Surface finish price group:**
   - STD = Group 1
3. **Finish designator**

Gusset bracket may be specified separately to provide additional support when used with a return or support panel.

<td>3</td>
<td>QIF8423M</td>
<td></td>
<td>265</td>
</tr>
</tbody>
</table>

**Important:** All supports must be specified separately.

Modesty panels are pre-drilled and attach 4" inset from rear of pedestal or end panel only. Gap between top of modesty panel and underside of worksurface is 1 1/2"; gap from bottom of modesty panel to floor is 3".

To determine modesty panel width required, subtract total **nominal** width of support (pedestals or end panels) from **nominal** width of worksurface. Example:

- 72"W worksurface = 30"W support (Two 15"W peds) = 42"W modesty panel required

See the Kimball Surfaces & Storage Price List for planning guideline chart.

Not for use as standalone units.

File drawers utilize drawer sides for front-to-back filing.

Standard Includes

- Chassis: metal
- Drawer fronts: metal
- Four spacers
- Lock, keyed randomly between 001–025: black
- Open top

How to Specify

1. Model
2. Pull option:
   - E = Extended
   - ARC462 = Arc, cinder (+$21)
3. Lock option:
   - KRB = Key random
   - KSB = Key specific(-$27); specify lock core separately.
4. Metal finish price group:
   - STD = Group 1
5. Metal finish designator

How to Specify

1. Model
2. Pull option:
   - E = Extended
   - ARC462 = Arc, cinder (+$21)
3. Lock option:
   - KR8 = Key random
   - KSB = Key specific(-$27); specify lock core separately.
4. Metal finish price group:
   - STD = Group 1
5. Metal finish designator

Standard Includes

- Chassis: metal
- Drawer fronts: metal
- Cushion on cushion top model: all seating fabrics, except leather
- Lock, keyed randomly between 001–025: black
- Four non-locking casters
- One counterweight

Lock Cores for Key Specific Option
**Overview**

**Top** is finished so the file can be used as a stand-alone unit.

**Roll-out shelf with lift door** (in applicable five-high models) replaces top drawer and adds 1" to overall height of the file. Accommodates standing binders up to 12"H.

**Built-in anti-rebound catch** prevents drawer from accidentally rolling open.

**Heavy-gauge frame** is reinforced at all corners and built into the front of the file so openings are always true and square. Right angle bend of the coach seam makes the strongest use of formed metal and presents a clean exterior with no exposed welds.

**Counterweight kit**, specified separately, is required for all individual freestanding units. Kits include counterweight and bracket, packaged individually.

**Four glides**, standard, provide 3/4" adjustability and allow for sturdy, four-point loading.

**Steel drawer interiors** are pre-painted cinder.

**Knockouts** are standard for ganging side-by-side.

**Locking** is standard. Select key random or key specific. Note: Lock cores must be specified separately for key specific option.

**Two 6"H half-height drawers** may replace existing drawer in any position.

**Full ball-bearing, progressive-slide drawer suspension** allows both the drawer and suspension to extend together and provides smooth drawer operation.

**Silencing bumpers** ensure quiet drawer operation and are added to suspension wherever a steel-to-steel contact would otherwise be made.

**Side-to-side file bar** is standard; one per drawer.

**Front-to-back file bars** are available separately for easy field installation.

**Label holder** is standard; one per drawer.

**Drawer Pulls:**

Drawer pull is recessed along the full front edge.

**Locks:**

Lateral files are predrilled to accept lock cores. Lock secures all drawers in the unit. Select key random or key specific when specifying.

**Keying:**

**Key Random Option**—Key numbers will be assigned arbitrarily at the factory with key numbers ranging from QKSCD001 to QKSCD025. Locks are shipped separately for field installation.

**Key Specific Option**—Specify any key number between QKSCD001 and QKSCD025. Locks are shipped separately for field installation. IMPORTANT: If you select the key specific option, you must specify the lock core separately. ➤ See page 7.14.

## Filing Hardware:

Heavier lines in the illustrations at right indicate filing hardware.

Front-to-back file bars can be specified separately.

See the Perks chapter in the *Kimball Desks & Accessories Price List*.

Side-to-side file bar is standard; one per drawer.

Drawer divider can be specified separately.

Lateral Files

**Two-High Lateral Files**
- Standard Includes:
  - Two standard-height drawers
  - One side-to-side file bar per drawer
  - 18"D x 25 3/4"H

**How to Specify**

1. **Model:**
   - QLFF18302 = 30"W
   - QLFF18362 = 36"W
   - QLFF18422 = 42"W
2. **Pull:**
   - F = Full pull
3. **Lock option:**
   - KRB = Key random
   - KSB = Key specific (-$27)
4. **Base:**
   - X = No additional base
5. **Finish price group:**
   - STD = Group 1
6. **Finish designator**

**Pricing**

- QLFF18423: $1855

**Four-High Lateral Files**
- Standard Includes:
  - Four standard-height drawers
  - One side-to-side file bar per drawer
  - 18"D x 48 11/16"H

**How to Specify**

1. **Model:**
   - QLFF18304 = 30"W
   - QLFF18364 = 36"W
   - QLFF18424 = 42"W
2. **Pull:**
   - F = Full pull
3. **Lock option:**
   - KRB = Key random
   - KSB = Key specific (-$27)
4. **Base:**
   - X = No additional base
5. **Finish price group:**
   - STD = Group 1
6. **Finish designator**

**Pricing**

- QLFF18304: $1862
- QLFF18364: $2162
- QLFF18424: $2411

**Five-High Lateral Files**
- Standard Includes:
  - Five standard-height drawers
  - One side-to-side file bar per drawer
  - 18"D x 60 1/8"H

**How to Specify**

1. **Model:**
   - QLFF18305 = 30"W
   - QLFF18365 = 36"W
   - QLFF18425 = 42"W
2. **Pull:**
   - F = Full pull
3. **Lock option:**
   - KRB = Key random
   - KSB = Key specific (-$27)
4. **Base:**
   - X = No additional base
5. **Finish price group:**
   - STD = Group 1
6. **Finish designator**

**Pricing**

- QLFF18305: $2312
- QLFF18365: $2546
- QLFF18425: $2789

**Five-High with Lift Door**
- Standard Includes:
  - Four standard-height drawers
  - Roll-out shelf with lift door
  - One side-to-side file bar per drawer
  - 18"D x 62 1/8"H

**How to Specify**

1. **Model:**
   - QLFF18305LD = 30"W
   - QLFF18365LD = 36"W
   - QLFF18425LD = 42"W
2. **Pull:**
   - F = Full pull
3. **Lock option:**
   - KRB = Key random
   - KSB = Key specific (-$27)
4. **Base:**
   - X = No additional base
5. **Finish price group:**
   - STD = Group 1
6. **Finish designator**

**Pricing**

- QLFF18305LD: $2411
- QLFF18365LD: $2641
- QLFF18425LD: $2886
Counterweight Kit

**Standard Includes**
- Required for freestanding files

**How to Specify**
- Model:
  - QLFCW30 = for 30"W files
  - QLFCW36 = for 36"W files
  - QLFCW42 = for 42"W files

**Pricing**
- QLFCW30 $219
- QLFCW36 $219
- QLFCW42 $219
**Drawer Pulls:**

- **Extended** Rail Arc

Extended is recessed along the full front edge and is painted the same color as the unit. Rail pull is textured black. Arc pull is available in 462 Cinder.

**Locks:**

Lateral files are predrilled to accept lock cores. Lock secures all drawers in the unit. Specify key random or key specific.

**Keying:**

- **Key Random Option**—Key numbers will be assigned arbitrarily at the factory with key numbers ranging from QKSCD001 to QKSCD025. Locks are shipped separately for field installation.
- **Key Specific Option**—Specify any key number between QKSCD001 and QKSCD025. Locks are shipped separately for field installation. **IMPORTANT:** If you select the key specific option, you must specify the lock core separately. ➤See page 7.14.

**ADA-Compliant Models:**

Lock is placed at 38⅞"H, making it accessible from a seated position. Rail or arc pulls are available.

### Filing Hardware:

- Heavier lines in the illustrations at right indicate filing hardware.
- Front-to-back file bars can be specified separately. 
  - See the Perks chapter in the Kimball Desks & Accessories Price List.
- Side-to-side file bar is standard; one per drawer.
- Drawer divider can be specified separately. 
  - See page 7.14.
## Lateral Files

### Two-High Lateral Files
- **Standard Includes**
  - Two drawers
  - Two side-to-side file bars per drawer
  - 18"D x 27\(\frac{1}{4}\)"H

### Three-High Lateral Files
- **Standard Includes**
  - Three drawers
  - Two side-to-side file bars per drawer
  - 18"D x 39\(\frac{3}{4}\)"H

### Four-High Lateral Files
- **Standard Includes**
  - Four drawers
  - Two side-to-side file bars per drawer
  - 18"D x 51\(\frac{1}{8}\)"H

### Five-High Lateral Files
- **Standard Includes**
  - Five drawers
  - Two side-to-side file bars per drawer
  - 18"D x 64\(\frac{1}{2}\)"H

### Five-High with Lift Door
- **Standard Includes**
  - Four drawers
  - Fixed shelf and lift door
  - Two side-to-side file bars per drawer
  - 18"D x 64\(\frac{1}{2}\)"H

### Tops, File Bars, Dividers, and Locks

#### Laminate File Tops

- **Standard Includes**
  - Single top may be secured to any combination of file widths to create a continuous surface
  - Vinyl rim on front edge
  - 18"D x 1¾⁴⁄₁₆"H

- **How to Specify**
  1. Model: QSS1830LFTL = 30"W
  2. Model: QSS1836LFTL = 36"W
  3. Model: QSS1842LFTL = 42"W
  4. Model: QSS1860LFTL = 60"W
  5. Model: QSS1872LFTL = 72"W
  6. Model: QSS1884LFTL = 84"W

- **Pricing**
  - QSS1830LFTL: $332
  - QSS1836LFTL: $369
  - QSS1842LFTL: $415
  - QSS1860LFTL: $565
  - QSS1872LFTL: $705
  - QSS1884LFTL: $868

#### Front-to-Back File Bars

- **Standard Includes**
  - Black
  - Set of two (one set required per drawer)
  - Provides two rows of letter-size or one row of legal-size filing in 30"W file; two rows of letter-size or legal-size filing in 36"W file; three rows of letter-size or two rows of legal-size filing in 42"W file

- **How to Specify**
  1. Model: Q99KFFB

- **Pricing**
  - Q99KFFB: $27

#### Side-to-Side File Bars

- **Standard Includes**
  - Galvanized metal

- **How to Specify**
  1. Model: QKFD30SS = for 30"W unit
  2. Model: QKFD36SS = for 36"W unit
  3. Model: QKFD42SS = for 42"W unit

- **Pricing**
  - QKFD30SS: $64
  - QKFD36SS: $69
  - QKFD42SS: $74

#### Drawer Dividers

- **Standard Includes**
  - Hooks on back of drawer body and can be used in any file.
  - Black
  - 10¹⁵⁄₁₆"D x 3¹⁵⁄₁₆"W x 7¹₂"H

- **How to Specify**
  1. Model: QKFDPM

- **Pricing**
  - QKFDPM: $41

#### Lock Cores for Key Specific Option and Change Keys

- **Important**
  - Lock cores must be specified separately for models with key specific option (KSB)
  - Change key is required to remove QKSCD lock cores in the field; it is not required for the initial installation of lock cores

- **How to Specify**
  1. Model: QKSCD = Lock core and key
  2. Key number (omit for change key): 001 to 025

- **Pricing**
  - QKSCD: $27
  - QKSCD1CK: $8
