Adjustability Features

	High Back	Mid-back	Fixed
Knee tilt	•	•	•
Swivel	•	•	•
Pneu. height	•	•	•
Tension control	•	•	•
2-position back lock	•	•	•

- standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in tilt lever. Recommended for users weighing 275 lbs. or less.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.
