Steam-bent frame is constructed of kiln-dried European beech to support the body’s curves.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall’s finish.

Cleanout is standard to make cleaning easy and simple.

Seat suspension is constructed of 9/32”-thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine-stretched across the open perimeter and stapled at the edges to form a secure suspension.

Seat rails are reinforced with wood corner blocks and cleats attached with glued and wood screws.

Seat assembly is attached with wood screws to wood cleats on the frame.

Seat cushion is made of 1 1/4” thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Contrasting upholstery on backs and seats is available on Nash guest chairs. If different price grades are selected, use our electronic specification tool for accurate pricing.

Nash chairs and stools are rated for one-shift usage and warranted up to 253 lb. user weight.

Nylon glides are 7/8” in diameter.

Brushed aluminum foot rail protector is standard on front rails of Nash bar stools.
