

INSPIRE YOUR
CLIENTS
WITH
ENVIROLEATHER™

MAKE AN IMPACT WITH COLOR

The mood of a space and the feeling that it creates in us is deeply influenced by color. The impact on each individual can evolve with age and life experiences and varies across regions and cultures. Through the application of color theory, commercial interior designers make a powerful impact on the work that is ultimately done in a space. Positive patient outcomes in healthcare, increased learning in higher education, better employee engagement and output in the corporate world, and memorable client experiences in the hospitality market are the ultimate benchmarks of success when specifying and creating color with EnviroLeather™

CONSISTENT CARE

Effective care and maintenance of surfaces in commercial spaces is complicated by the need to be quick and efficient. There is a variety of surface types and recommended cleaning protocol to consider. As a result, Environmental Services plays an important role in the long term investment a facility makes in furniture, fixtures and equipment-including upholstery. We provide you with the best care and maintenance protocol for EnviroLeather™ to get the best possible long term performance. EnviroLeather™ holds up well in a broad range of real world applications, including healthcare.

ENSURE LONGEVITY OF YOUR FURNITURE

EnviroLeather™ is engineered to maximize the useful life of your furniture in the harshest of applications. Beyond our formulating and manufacturing expertise and commitment to ongoing quality control, we take a holistic approach to the long term investment you have made. Studies related to the influence of furniture design and seam styles on the performance of upholstery are shared with manufacturing partners. Care and maintenance best practices are designed to be practical and the risks associated with cutting corners are shared with end users.

MAKE IT ECO-FRIENDLY

Enviroleather™ is designed to be more sustainable by reducing energy consumption and hazardous waste during manufacturing. It also has renewable material and post-consumer recycled content. We specifically designed Enviroleather™ to minimize exposure to toxins by eliminating PVC, plasticizers, flame retardants, heavy metals, antimicrobials and perfluorochemicals. It also has very low VOC emissions and passes the stringent California 01350 indoor air quality test. Help protect the environment and people's health by choosing Enviroleather™.

THE CREATIVE PROCESS

HOW IT WORKS

ENVIROLEATHER™ INSPIRATION

Your focus is on creating an inspiring environment that is beautiful and functional. Begin the selection process with our point of view about color and pattern expressed through several color palettes and corresponding descriptions. Pattern descriptions are meant to encourage a dialogue with your customers. The color palettes are an integrated solution that is flexible, a starting point that is useful, with the intent of saving you time.

MAKE IT YOUR OWN

When you have the time and ambition to channel your creative mind, EnviroLeather™ makes it easy for you to personalize your design board without the inconvenience of traditional customization tools. Utilizing an industry first digital print process you are able to modify pattern colorways with no upfront cost, quick turnaround and only a 5 yard minimum order - with no risk of obsolescence.

USE BRAND COLORS

Organizations that seek to brand their spaces through the use of color now have a user-friendly solution. Whether it is a small remodel or a large new build the flexibility and infinite color capabilities of our eco friendly print process allow you to get the exact color you need.

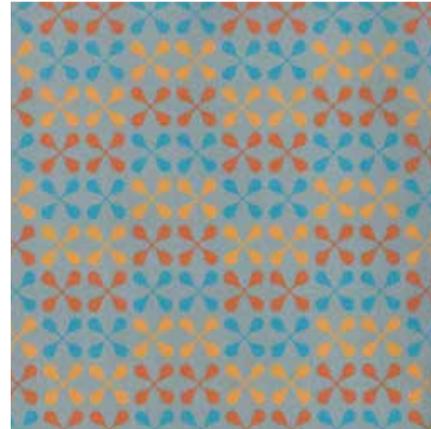

SPECIFY WITH CONFIDENCE

Patterns are printed at our New Hampshire facility on demand and shipped within 3 weeks. The risk of extended lead-times is eliminated with our hybrid digital technology.

CREATIVE FREEDOM TO INSPIRE YOUR CLIENTS

- STEP 1: Select a pattern colorway to work with.
- STEP 2: Identify the color in the pattern you want to modify.
- STEP 3: Specify the replacement color to incorporate (either pantone color, EnviroLeather™ solid or reference another printed color).
- STEP 4: Submit to customerservice@enviroleather.com.
- STEP 5: Receive digital rendering and tell us it is approved.
- STEP 6: Within 2 weeks receive a sample and part number that can be specified.
- STEP 7: Specify a minimum of 5 yards.

ULTIMATE POSSIBILITIES

You are no longer constrained by what you can find in the design library. The digital age affords flexibility previously not practical. EnviroLeather™ lets you create bespoke solutions where your client can walk away knowing that their investment in you and the design process is one that they will be happy to make time and again.

LINEAR

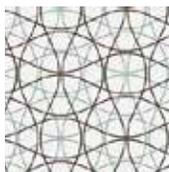

HOLISTIC

A balanced pattern designed as a match-stick stripe with a horizontal shift that features a new stripe on every row and a large color repeat.

MEDITATE

A hand-drawn grid pattern that is drawn over a subtle ground of repeating grids.

SPRIGT

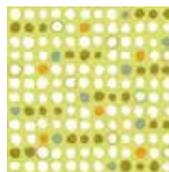

A web-like athletic pattern whose intersecting and undulating lines are in play over a texture-rich ground.

TRANQUIL

A tailored pattern designed as a thread-line stitch embroidered on streaming ribbons.

WHIMSICAL

DROPLETS

A painterly pattern of dots with micro-dots encircling dots and colorful dots dotting the ground.

FROLIC

A stylized motif of Jacks, an icon from the ancient game, appear in a repeat pattern that features a six-color rotation on a white ground.

GARDEN PARTY

A lyrical pattern of parasol shapes, in two views, surrounded by meandering vines articulated in a stitched-line motif.

HARMONY

A sphere pattern imbued with a burst of energy from dandelion-like centers encircled by radial wheels.

ORGANIC

BLOSSOM

A kaleidoscope pattern of stamp-like icons. Large blossoms with starburst centers repeat in alternating colors separated by smaller starbursts that punctuate the design.

BREEZE

A small-scale pattern of leaves organically linked to a ground cover of richly-layered foliage.

FLORA

A self-similar floral pattern rendered as an exquisite air-brushed painting.

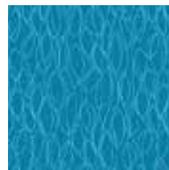

LIANA

A lyrical pattern of stylized leaves and pattern-adorned leaves sprouting in pairs from undulating stems.

PETITE FLORET

A lattice pattern of vines hosting new buds in the Spring and bright berries in the Fall.

PETITE PASTORAL

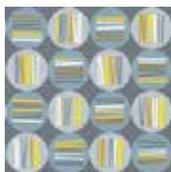

A lanky leaf pattern, drawn with a fine-line, that features limber leaves appearing to sway in a breeze.

LINEN

One of the oldest textiles in the world, linen represents light, purity and wealth. The subtle textural design makes it a sophisticated stand-alone classic or a quintessential coordinate.

GEOMETRIC

BALANCE

A graphic pattern of circles in a half-drop color repeat. The interior of each circle displays a language of sticks arranged in multiple patterns.

SYNERGY

A small-scale pattern of multi-colored cubes linked in design by a network of dotted-lines, reminiscent of a family tree.

SOLIDS

CALIFORNIA

A classic, timeless look with a subtle grain and matte finish. The most popular leather grain suitable for any market.

MONTANA

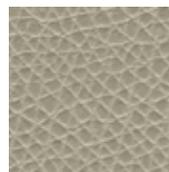

A sophisticated leather grain with a soft hand and subtle glaze effect make it ideal for the traditionalist.

INK-GARD PLUS

A slightly pearlized version of our California Collection designed to resist staining from difficult stains such as ink.

TEXTURES

BERKSHIRE

A two-toned tipping effect results in a distinct leather aesthetic.

SIERRA

A discernible style resembling the luxurious appearance of an Ostrich hide.
