

Kimball®

TEEM®

GET TOGETHER

Teem is made to support all kinds of interaction—from impromptu conversations to group meetings where technology is relied upon. Cable management panels maintain a clean look by keeping cords out of sight. Power can be accessed right on the table, allowing workers to plug in and share ideas. Material choices pair well with other Kimball products like Stow casegoods. And a choice of heights and table shape options offer plenty of ways to fit your collaborative needs.

TEEM™

Made for the places people gather, Teem keeps people connected to their technology and each other. Both sides of the media cabinet can be equipped with monitors or marker boards, and your choice of table base and top make the space even more functional.
