Greer recliners offer three adjustment positions:
- Footrest raised (all models)
- Infinite recline degree to lay flat
- Feet higher than the head (Trendelenburg) models

Optional, black polyurethane push bar helps caregivers reposition the chair.

Optional bump guard is a protective plastic welt cord.

Built-in headrest offers supportive, patient comfort.

Infinite back lock allows locking the back into various positions in 1° increments.

Trendelenburg models allow feet to be higher than head; paddles are located on the right side of the chair as seated.

Footrest lever allows leg rest to be extended independently of the back operation.

Grey, non-marking casters work on both hard and soft surfaces. Individual-locking, single-wheel casters are shown; models with central-locking, single-wheel casters are also available.

Models with grey, central-locking casters with brake are controlled from a foot pedal on the left side of the recliner (as seated).

Arm caps are available in black polyurethane, finished beech wood, and solid surface. EOSCU (Cupron-enhanced EOS) biocidal solid surface arm caps are optional on solid surface arm cap model; upcharge applies.

Model without arm caps is also available.

Optional pull-out footrest allows for patient to ingress and egress more easily. Footrest also can be used for comfort when recliner is in the seated position.

Optional fold-down tray is available on left side of recliner as seated; not available on drop-arm model. Tray is 12”D x 16”W.

Optional moisture barrier is available on seat cushion or on the seat and back cushions.

Drop-arm release unlocks the drop arm.

Drop arm, on applicable models, is shown in the “down” position. Available on left arm only (as seated).
