### **Reimagine Healthcare with Kimball Health**

NEW ORLEANS, LA (November 2, 2019) –In the wake of accelerated changes impacting healthcare, the role of space has never been as pivotal as it is today. With a holistic portfolio of products that span the healthcare landscape, Kimball Health delivers transformational spaces that keep pace with the demands of today and elevates every experience to impact the way healthcare is delivered tomorrow. The innovative, highly styled portfolio of healthcare products from Kimball Health will be showcased at the Healthcare Design Expo and Conference in the Ernest N. Morial Convention Center in New Orleans, LA from November 2-5, 2019.

Known as the premier healthcare design industry show, Healthcare Design is devoted to how the design of responsibly built environments directly impacts the safety, operation, clinical outcomes, and financial success of healthcare facilities, both now and into the future, by highlighting best practices and top healthcare design products.

“By looking at things differently and discovering what brings out people’s best, we’re creating innovative product offerings that redefine healthcare spaces and challenge the familiar” said Aneetha McLellan, Director of Kimball Health Sales, Innovation and Design. “Kimball Health is transforming experiences by connecting people + place to deliver a more personalized level of care.”

Healthcare is currently undergoing the most extreme transformational shift in a century. Kimball Health is meeting this shift by pushing the boundaries and embedding principles of adaptability, flexibility, and mobility in our products to support the landscape of today’s healthcare facilities. Located in space 911, the featured collections create environments that are efficient for clinicians, yet meaningful for patients with seamless and durable solutions for both public zones and clinical spaces.

*Embra*™ is a thoughtfully equipped lounge and sleep sofa collection where guests can feel welcome, connected and comfortable. The simple design quickly converts from sitting space to a generous sleeping surface. Optional lighting, technology support, personal storage and surfaces respond to the needs of guests in community settings

or patient spaces. As teams and workloads continue to grow in healthcare, we're being challenged to maximize every inch of space. Now, more than ever, the walls and surfaces need to do more "to earn their place." Designed with full functionality in mind to maximize wall space and integrate into healthcare spaces, *Work|Able*™ takes a modern approach with honest materials and simplicity in design that facilitates collaboration and opens up a whole new way of leveraging the wall.

Designed to support the evolving healthcare landscape, *Alterna*™ is a seamless and durable solution for the entire facility – from public zones, to clinical areas, workspaces and more. *Greer*™ is a modern and modest, full-function patient recliner, built with quality and value in mind. The small-scale design works perfectly for today's smaller footprint spaces while still providing comfort for all body shapes and sizes.

Also featured in the space will be Kimball Health's ever-adaptable *Pairings*® *Nooks* seating collection that provides privacy and comfort, *Pep*™ and *Joelle*™ ancillary seating provides versatility to meet the needs of today's healthcare facilities. *Xsede*® *Height Adjust* allows users to raise or lower their worksurface, supporting fluid, natural movement throughout the day. Paired with the light scale *Helio*™ task chair, this combination comfortably supports a wide variety of work styles.
