Paradolia™

Paradolia™

Paradolia screens and suspension panels offer a contemporary solution that creates privacy and reduces acoustical distractions. Its soft contours contribute to a warm atmosphere while providing a tackable surface. The A-frame screens divide space while serving as a collaboration tool, and are easily nested for storage. The wall panels attach to a suspension rod with leather straps, providing functional sound absorption for walled environments.

STATEMENT OF LINE

A FRAME *Designed by Tim Alpen*
