

BLOOM®

The following upholstery list includes those materials that will and will not result in Comfort Wrinkles on the Bloom Chair. Due to the inherent nature & stretchability of different fabrics and leather, when upholstering the Bloom chair we have encountered “comfort” wrinkles along the curve of the arms and in some cases the top of the chair. The list below includes the materials we have tested to date. If a material is not listed, it has not yet been evaluated to determine if comfort wrinkles will exist in the material. We will continue to update this listing as we continue to upholster and evaluate different upholstery options.

View link below for comfort wrinkle results:
