

Seating Fabric Alliance Program

Order memo samples through enviroleather customer service, our website alliance page or visit www.enviroleather.com
Customer Service: 866.332.0700
All patterns not listed must be ordered as a COM.

TB133 Info

TB133 results are based on the contents of the sample evaluated. Fabric content and characteristics may be changed by fabric supplier without notice. These changes may alter the evaluation results. Kimball Office is not responsible for any fabric changes that alter the evaluation results. Customers need to confirm that the content has not changed from what is listed below.

TB133 test results apply to fabric and chair combinations. Review specific series for TB133 approval status.

APPLICATION GUIDELINES

Please note that Guidelines 1-4 are explanations of characteristics that you may see on your chair due to the construction of the fabric. We can still upholster fabrics associated with these guidelines, however, you may see some of the characteristics described.

- 1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours and certain seams.
- 2 Matched directional textiles (ex: stripes, plaids, patterns) may not be aligned. Examples: decorative stitching, tufting/buttons, seams, seat to back match, etc.
- 3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

Fabric Restriction Guidelines

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

- 5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

X= Fabric will be applied Random. Contact By Design if specific matching requirements are requested.

Pattern Name	Grade	Application Guidelines	Deletions	TB133 Status	Contents	Finish	Backing	FR's
